

One thing may be said which will speak eloquently in favor of the organization. The sum lost by the Bank since it was founded in 1846 by forgery, is under \$2,000, and the loss through the dishonesty of its employes is still less.

If we consider that the amount of cash passing over its counters during the last year was \$41,268,654, we will see evidence of constant care and attention to the smallest details.
