Tiga Defeat Due to Treason-Military Leaders on That Front Are Being Tried by Court-Martial

Christiania, Oct. 2—A Russian pro-fessor, Ruabanovitch Sorbonne, is at present in Bergen on his way to Paris. An interview in the Bergen Aftenblad contains interesting statements as to the contains interesting statements as to the latest events in Russia—partly differing from the statements in the allied and neutral press. Describing the general situation as extremely difficult, the professor, who personally took part in the Moscow conference as a delegate of the executive committee of the Peasant Parts. Party, thinks that all Russian parties will agree to resist the restoration of reaction. He confirmed the assertion that the Russian defeat at Riga was due to treason on the part of Russian generals. The soldiers were fighting stubbornly, but orders were issued to retire, and a contact when the student is suited to the residual statement of the soldiers. catastrophe was inevitable. A special commission of Workmen's and Soldiers' Council has now instituted action for Council has now instituted action for high treason against the military leaders on this front. Any idea of a separate peace with Germany is excluded, even the Maximalists being unwilling. The Lenin group, however, had been bribed by Germany. The Maximalists' intriguing leader escaped in time. He is sure to be hanged if he returns. The same fate is awaiting Robert Grimm. Describing himself as a friend of a great demother of the professor said went northward by the Pacific it is peace of nations, the professor said went northward by the Pacific it is period of depression when work will be more than the demand unless labor conditions improve and there is labor conditions i hirnself as a friend of a great democratic peace of nations, the professor said the mistake of the allies' governments was in refusing passports to the so-called Stockholm conference, although "after the disclosure of the Swedish telegram scandal a conference was impossible at Stockholm. The place was too open to German intrigues. In my opinion Christiania is the right place for the conference. Norway proved sufficiently plucky to overhaul German intrigues closely." The professor states that the greatest task before the Russian Social Democracy is to weld the nation and army to unity of purpose, excluding furarmy to unity of purpose, excluding fur-ther risings of the Korniloff fashion.

LABOR FOR PERMANENT ROAD WORK SCARCE

Burton M. Hill, Engineer in Charge, Speaks of Past, Present and

Not more than \$100,000 of the halfnillion dollars available for the construction of permanent roads in the province has been spent for that purpose this year. Burton M. Hill, engineer in charge of the road work for the province, said yesterday. In addition, the province has paid about \$100,000 for machinery and equipment contracted for by the former administration.

The reason that more money has not been spent, Mr. Hill said, was the lack of labor and teams. Until this last month he found it almost impossible to secure horses, but when the farm work neared an end this difficulty was re-moved and considerable valuable work was accomplished. The lack of men was almost as great as ever and this had placed a limit on the amount of which could be done. In spite of these conditions, the de

partment has some excellent road work to show for the season's activities and Mr. Hill already has begun to plan his campaign for next year. The work will not be so extensive as the demand unless labor conditions improve and these in the season's activities and the season's activities and the season's conditions.

SAYS PAN-GERMANS HATE CHRISTIANITY

Adam Roder Accuses Heartless Bullies of Trying to Set up "Made-in-Germany" Religion

New York, Oct. 2.—Writing in the Suddeutsche Konservativ Korespondenz of Karlsruhe, of which he is publisher and editor-in-chief, Adam Roder, a well-known German publisher, voices the opinion that the ultimate object of the propaganda carried on by the pan-Germans is the wiping out of Christianity in Germany and the establishing of a peculiar, "made-in-Germany" religion. After accusing the pan-German annexationists of bitter hatred of "semitic Christianity," and quoting liberally from their writings to prove his contention, Herr Roder arrives at the following conclusion:

lowing conclusion:
"The pan-German view of the world "The pan-German view of the world is conscientiously aimed at the rotting out of the Christian religion and the system of ethics derived from it. A German religion is to arise, linked to the belief in Wodan of our ancestors, which in turn is to be 'refined' by the results of the modern theory of races and the teachings of the Darwinian theory of evolution that what remains will be Athemis framed in high sounding phrases. The German people, as the noblest and most favored of all races, as the highest manifestation of humanity, will have become its own God.
