## MOORE AND BECKER SKATE DEAD HEAT

Finish Even from Scratch in Exciting Two-mile Race at Iceland Rink.

New York, March 6—One of the most exciting skating races of the winter at Iceland Rink ended in a dead heat between Joe Moore of the 181st Street Ice Palace, the national indoor champion, and Wesley Becker of Iceland. Both men were in the lead at the low pace in the early laps of a two-mile handicap race, both starting from scratch. As the next from the last lap started Becker sprinted into the lead and it was only a phenomenal last-minute dash by Moore that enabled him to work his way into a tie at the finish. Raymond Schwartz was a contender all the way, but was disqualified for cutting in front of George Pickering in the next to the last lap. Pickering landed second place. Mike McLoughlin and Louis Morris, the early pace-setters, were left behind at the finish.

The race for girl skaters was won by Miss Elsie Muller, who started at scratch. Miss Hattie Dose, the Metropolitan champion, who also started at scratch, was at Miss Muller's heels all the way, but lost her chances for victory when she fell at the start of the last lap.

The summaries:  
Two-Mile Class A Race—Tie for first place between Joe Moore, 181st Street Ice Palace (45 yards), second; P. Pedal, unattached (68 yards), third. Time—1:31.3-5.

One-Half Mile Ladies' Race—Won by Miss Elsie Muller, 181st Street Ice Palace (scratch); Miss Edna Carroll, Women's Skating Club (45 yards), second; Miss Peggy Condy, 181st Street Ice Palace (45 yards), third. Time 1:45.1-5.

One-Half Mile Novice Race—Won by William A. Cederstrand, unattached; A. Struthers, unattached, second; N. Curie, unattached, third. Time—1:50.

**MISS GLENNA COLLET DRIVES GOLF BALL**  
Belleair Heights, Fla., March 6—Miss Glenna Collet, the national women's golf champion, played a unique trick when she drove over a moving railroad train, which afforded her a new kind of a hazard. Miss Collet was at the tee just as the train came along. One of the players in the Konx foursome asked her if she minded the train crossing her path. She replied almost instantly by hitting the ball straight and far down the fairway, clearing the train by a wide margin.

**1,400 'MOVIES' IN JAPAN**  
Japanese the "Greatest Fans" in the World, Says W. B. Hall.  
"The Japanese are the greatest 'movie' fans in the world," said W. B. Hall, a merchant in Tokyo, who is at the Hotel Astor, New York, on a business trip. "There are 1,400 moving picture theatres in Japan, and they are building more every day. They charge the same prices as in this country, but they only have two shows a day, each of which runs five hours, with three feature pictures. Low Chaney is the favorite star in Japan. The Japanese are a very emotional people and love either to laugh or cry so both the comedies and the pictures with thunder pictures go well there. They use the entire output of the world each year in the first-run houses there in the period of nine months, so the gap is filled by native-made pictures, which are interspersed with the others to complete the year's programme. In Tokyo alone there are 140 picture houses."

"Living is very high in Japan, and food costs about 20 per cent. more than in this country. Clothing is much cheaper, however, but rents are high. Salaries have increased there five to ten fold in the last five or six years. The country is making good strides in the direction of progress, and is more sanitary than it has ever been. Business is good there now, and they have the biggest silk crop in twenty years."

"The Japanese are trying their best to combat the war talk in this country. They don't know who starts it or how it gets started, but they don't want war with anybody, and they have lived up to every agreement made in the Washington conference. They need help very much. The country is tremendously overpopulated, and they need more territory badly. They are kind-hearted as nice people as you can find in the world when you get to know them."

Those to whom the motion picture most appeals, he said, belong to the class of people whose amusements are few. They are people who are excluded from many recreations because they cannot afford them, and the extent of their sophistication and their moral standards are different from those of the class which is attempting to "reform" the motion pictures.

The well defined slump in the motion picture industry can be traced to the time when agitation for the betterment of the pictures was begun, he said. And that agitation is fostered by persons whose interest is not primarily in the motion pictures, but who have other interests of more importance to themselves.

Picturing the unsophistication and unsatisfactoriness of the average American, he said that evil could be imbibed from the pictures only by those unable to understand fully the meanings implied, and those capable of such understanding were not of the type which fills the moving picture theatres.

Touching on the relation of juvenile crime to the motion picture, he said that statistics show that such crime has decreased rather than increased with the advent of the pictures.

**KING OPPOSES  
FILM CENSORING**  
Canadian Novelist Feels Patrons Not in Much Danger of Imbibing Evil.

(Boston Herald).  
Basil King, speaking on "The Significance of the Motion Picture," at a meeting of the Fabian Society held last evening at the Old Grey Street, Anderson and Myrtle streets, Beacon Hill, stated that, regarding the censoring of motion pictures, he would rather see a thing go wrong than to have it right by censorship. "Every thing will develop to a higher plane, left alone than if tampered with, he said."

Those to whom the motion picture most appeals, he said, belong to the class of people whose amusements are few. They are people who are excluded from many recreations because they cannot afford them, and the extent of their sophistication and their moral standards are different from those of the class which is attempting to "reform" the motion pictures.

## Stomach Trouble "Indigestion"

Relieved By  
Burdock Blood Bitters

The sufferer from dyspepsia, indigestion or other stomach troubles who has to pick and choose his food is the most miserable of all mankind.  
Even the little that is eaten causes much torture, and is digested so imperfectly it does but little good.  
Before you can eat heartily and enjoy your food, you must put your stomach right so that it will manufacture its own digestive ferments.  
Mr. Wm. Kruschel, Morden, Man., writes:—"Some time ago I had quite a serious case of indigestion, and I could scarcely eat anything, outside of some light food, and even then I generally had pains after each meal. I tried many different medicines, but without any improvement, and had almost given up hope of ever being relieved. I can honestly say that B. B. B. has done wonders for me after all other medicines failed."  
B. B. B. is put up only by The T. Milburn Co., Limited, Toronto, Ont.

## HER HEART SKIPPED EVERY THIRD BEAT

Mrs. James Burleigh, 348 King St. E., Chatham, Ont., writes—"I think it is my duty to let you know what Milburn's Heart and Nerve Pills have done for me.  
I suffered for years with palpitation of the heart, my nerves were very bad, and I could not be left alone at any time. I doctored for over a year, and the doctor said my heart was very bad, as it skipped every third beat.  
I gave up, just at this time, and then my mother advised me to try Milburn's Heart and Nerve Pills, saying that her brother had been relieved by using them when he was very bad with his heart and nerves. I got a box and started to take the pills, and when I had used it I felt a lot better, could sleep a little and felt stronger. I continued taking them for about three months, and felt better than I had for years.  
When I think of the misery and suffering I went through before I started Milburn's Heart and Nerve Pills, I feel like letting everyone know what they did for me."  
Price 50c. a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## ANNIVERSARY OF LANDING OF THE FIRST SCOTS IN N.S.

"During the week of July 15th next, the people of Pictou County, Nova Scotia, will celebrate the one hundred and fiftieth anniversary of the arrival of the ship "Hector" with the first of the Scottish immigrants to settle in that county.

The late Dr. Patterson in his history of Pictou county describes with a graphic pen the early trials and struggles of those sturdy Scots, who, after a long and trying voyage in a small and ill-found vessel, landed on the shores of what was then a wilderness.

Their hardships in the biting cold of their first winter, in hastily constructed log houses, without sufficient food or clothing, have been the subject of many a tale handed down by the older people to their children, and their children's children to the present day.

Their experiences were perhaps no different from those of other earlier settlers in other parts of Canada, but their achievements are worthy of commemoration by their descendants, and all who boast of Scottish blood in their veins.

The interest in religion and education, which is a tradition among Scotsmen, was a strong factor and has tended to bring out the qualities which distinguish them wherever they are found. It has been said that no county in Canada can show so many men, prominent in the religious and intellectual life of the Dominion, as Pictou County.

The St. Andrews Society, New Glasgow, has taken in hand the erection of a bronze statue in the town of Pictou to commemorate the arrival of the "Hector" in 1773.

It is expected that His Excellency, the Governor General, will unveil this memorial during the week of the celebration and the society has asked the members of sister societies in Canada and United States to join them in doing honor to the memory of those brave men and women who helped to lay the foundations of our Canadian civilization.

The St. Andrews Society of St. John has asked A. R. Melrose to receive and forward to the committee in charge any contributions to the fund, which Scotsmen or their descendants in St. John wish to give to this memorial, and those whose ancestors were among the first winter, in hastily constructed log houses, without sufficient food or clothing, have been the subject of many a tale handed down by the older people to their children, and their children's children to the present day.
