When you send us a job you can rest assured that it will be executed by printers, not a collection of various other tradesmen who are just learning the fine art of printing. Our staff are all old at the game and therefore can do the work of printers. Think this over before you place orders in shops where they are only printers by "name" and not by "experience."

"Our home is large, main house 30x40, and all almost as large, and it was impossible to heat it all without a number of stoves and piles of fuel, which meant hard work—since installing your pipeless furnace a year ago—we are enjoying even the farthest corners that we never thought of trying to heat before; and my flowers bloom not only in one room but in every room in the house, all and all, and it is like summer in a flower garden all the time."—Mrs. James Chase, St. George, N. ## SODA FOUNTAIN REPLACES BAR ON AMERICAN SHIPS

One of the most significant signs of the passing of the days on the sea when the old chow drink and the devil had done for the rest, often fitted the situation far too closely, is afforded by the statement that largest high-powered passenger steamship to be built in the United States will be equipped with a soda fountain in place of the bar which has been banished from ships flying the American flag.

## CONCERNING THE MODERATION LEAGUE

An effort is being made by the Moderation League, recently organized in Halifax, to have the Temperance Act amended to permit the sale of beer and wine for beverage purposes.

It is well to bear in mind these scientific truths: "Alcohol is a narcotic poison, and whether in beer, wine, or spirits, the poisonous action of Alcohol in the human system is the same. The evils that come from the use of Alcohol cannot be remedied by substituting one kind of alcoholic drink for another. A beer drinker becomes alcoholic without knowing it. Beer alcoholism is the most frequent, and most dangerous, because the most insidious. The man who drinks his half pint of wine daily, or his two glasses of beer, is just as surely submitting his body and mind to the deleterious effects of alcohol as the man who drinks whiskey. Injurious hereditary effects can be traced to the moderate use of alcohol by parents."

The sale of beer and wine was tried in the United States, before the enactment of prohibition, as a means of promoting temperance, and abundant evidence can be produced to show that the experiment failed. Wine drinking in France, and beer drinking in Germany, promoted the use of stronger liquors, and the increase of alcoholism.

The experience of Canadian provinces goes to show that the sale of beer and wine opens the door for the sale of spirits. Traffic in beer and wine is a part of the liquor business which has always been a social, moral and economic burden.

In view of these facts, it is incumbent upon men and women who desire the complete suppression of the liquor traffic to call upon our legislators not only to refuse to grant the petition of the Moderation League, but also to request the Government to provide for more effective enforcement of the Temperance Act.

Guard the Baby  
Against Colds

BY KEEPING BABY'S OWN TABLETS IN THE HOUSE AT ALL TIMES

To guard the baby against colds, nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one be good and that he will thrive and be happy. Thousands of mothers have become convinced through the actual use of the Tablets that there is nothing to equal them in banishing constipation and indigestion; breaking up colds and simple fevers; expelling worms and making teething time easy. Among the thousands who praise Baby's Own Tablets is Mrs. Alex J. Perry, Atlantic, N. S., who says:—"I always keep Baby's Own Tablets in the house as I know of no other medicine for little ones to equal them."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Veterans!

Letters on file, and orders for parts of Fawcett stoves and furnaces, manufactured decades ago, show that some are still in use after forty years of service.

The ruggedness of Fawcett products is not based however on excess weight which leads to excess cost and excess upkeep. It is due to a scientific study of the relation between one part and another and of all parts in relation to the service they have to stand.

When you buy a Fawcett you buy the accumulation of three quarters of a century of experience.
