you will find an expression that indicates character. In pure-bred animals they conform to breed more, males must be appearance and the heifers

described all the points of beef calves, neither reasons why the ones be observed. These and out from breeders parents, but anyone of calves to the extent of, or studying them, the following points in ion, quality, fleshing, constitution, character, and

article we shall tell you a judging dairy calves.

The Corn Borer!

of Ontario, particularly Welland Counties, the Corn Borer has become a very serious pest and are alarmed, and the Entomological Branch, at Ottawa, are going through the to find out how wide-break is. Scouts are in corn fields for the it has only yet been eastern Ontario, it may be or a very bad pest if it is not suppressed. In corn growing districts, write to the Entomological Department of Agriculture, Ottawa, showing what the Corn Borer is like and how they and the school are on the watch for it to get it before farmers were presence in their crops.

of the corn borer cuts through the husks of the cob and into the centre of the does not confine itself, but, for it lives and works wherever it is working in fine borings or dustlike it is working in the corn frequently hangs does when it is nearing other description of the last week's issue.

Corn Borer works while it shocks, just as it does. If any teachers or the European corn borer hood, it would be well to get it to the Agricultural Department or to the Department of Ottawa.

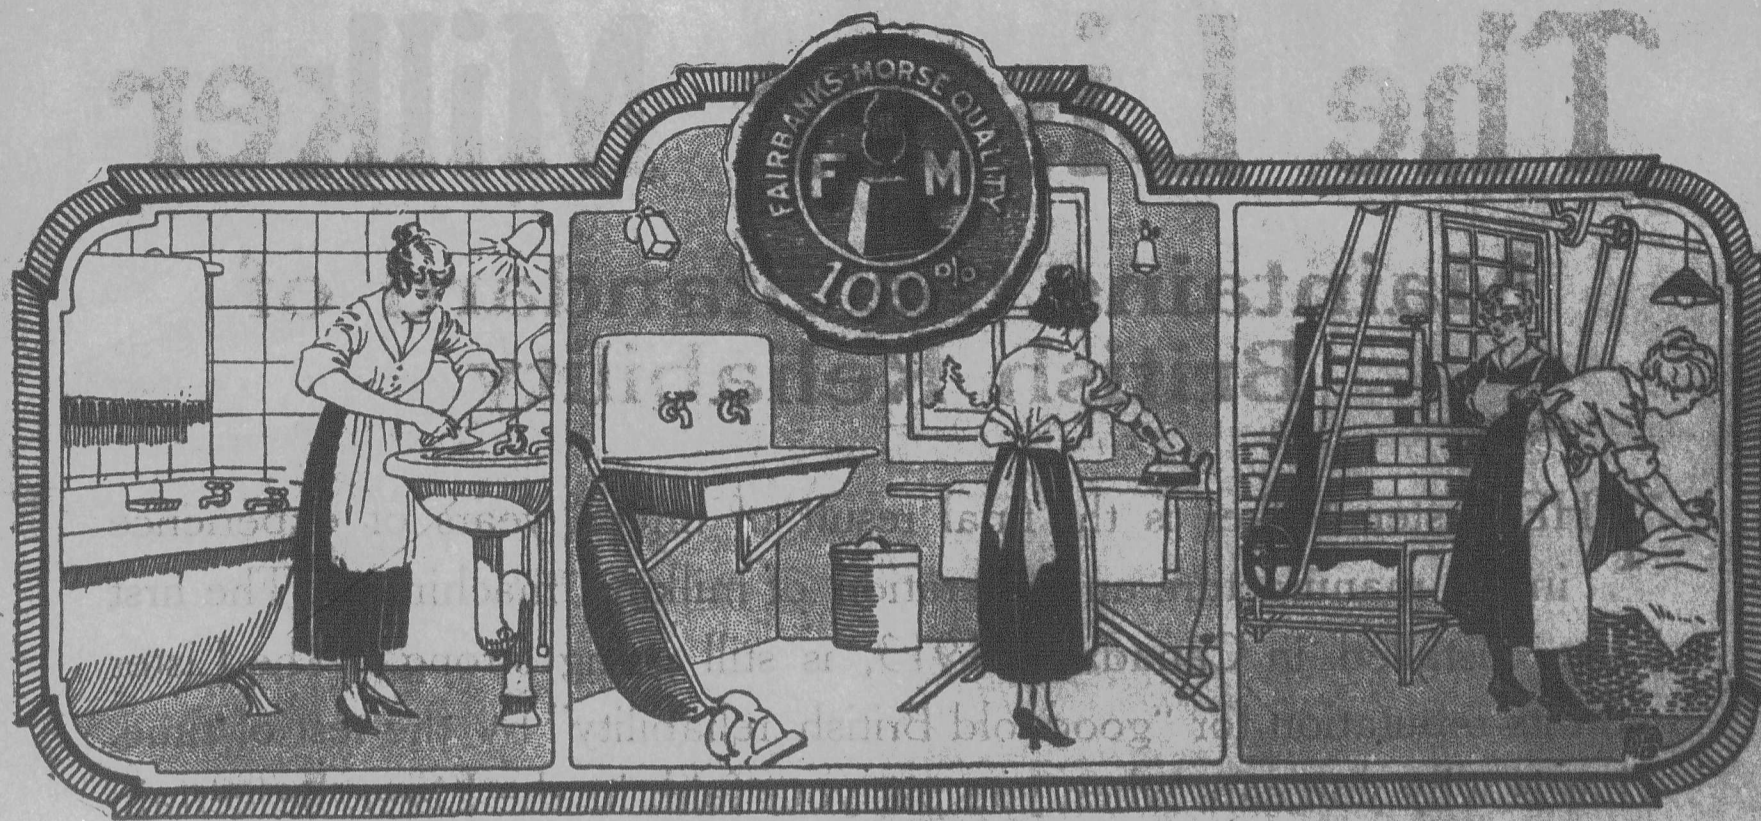

and useful arithmetical constructed from measuring grounds, computing the school from the pupils' how many miles a going to school for a c. These local problems than the stereotyped books, and there is no in any community.

ing contest would be and instructive. Many the varieties growing in their own homes, but of apples growing just that they do not know names of varieties would spelling lesson and quite y now in the curriculum.

did time of year to make seed seeds.

You can have these comforts in your home

THOUSANDS of farmers' families live in homes where lamps and lanterns are unknown—where brilliant, clean, electric light floods every room in the house, cellar, stables, or other buildings, at the touch of a button.

They have water the instant they turn the tap, in kitchen, bathroom, laundry, stables, barnyard, field, or wherever they wish.

They never waste time turning the separator, grindstone, fanning mill, or churn, because the "F" Plant does all these jobs just as faithfully as it runs the pump.

The womenfolk no longer slave over wash tubs, carry water, or have oil lamps to look after. The "F" Plant ends such

drudgery. They find the electric iron and vacuum cleaner labor-savers, as well as time-savers.

The farm help likes the place, accomplishes more, and is contented.

These families live happily, are better off, and find their farms increasing in value.

Have you ever thought how easily you can enjoy these same advantages? Call on the "F" Power and Light Agent in your town and see the plant demonstrated. It runs for a few cents daily—six hours to the gallon of kerosene.

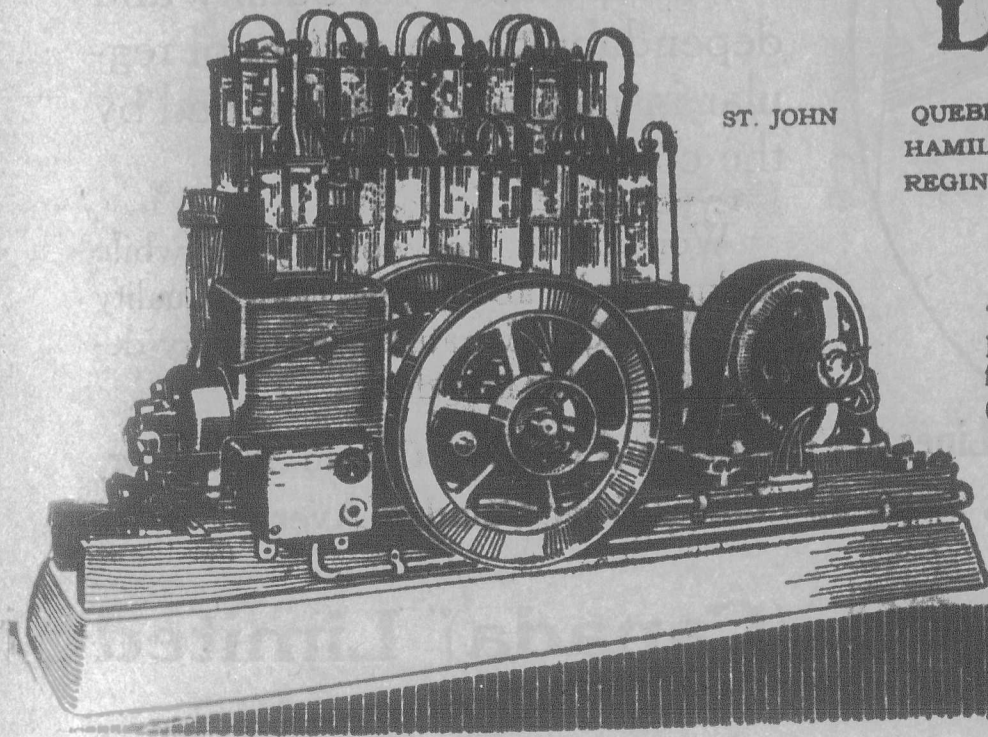

If there is no "F" Agent in your town, send coupon to our nearest office, and a catalogue will be sent you immediately.
