

# HIGH GRADE POWDER

An Expert Tells About Cannon Powder and Gun Cotton.

## CARRIES SOME WITH HIM

Powder Is of the Variety That Dewey Won With at Manila and the Gun Cotton Similar to That Fired by the Cruiser Vesuvius at Santiago.

There is one man in town who carries around a pocketful of high grade explosives with no more thought of danger than if they were so much sawdust. He is Oscar White, representing the Giant Powder company, of San Francisco, and the explosives are cannon powder and gun cotton, the fearful compounds used in the war now under way between the United States and Spain.

To tell the truth, Mr. White only carries a single grain each of the two articles, but should either of them go off while in his pocket, he would doubtless be blown into atoms.

To the man who is acquainted with cannon powder, and most men are, the "grain" of cocoa powder that Mr. White carelessly hands out for inspection might be anything from the door knob of a Burmese temple to a teething ring for elephants.

In color it looks like a chunk of chocolate or a piece of black walnut, and in shape it is a six-sided prism, about an inch long and equally thick, while the circumference of a lead pencil. To the ordinary mind there is nothing at all about it to indicate its explosive quality, but nevertheless it was this innocent-looking stuff that Dewey used in demolishing the Spanish fleet at Manila. The gun cotton, or, as it is otherwise called, smokeless powder, looks most like a short stick of lemon candy. It is nearly the thickness and the color of that delectable confection, and comes in lengths of about three inches. Down the center of each stick are half a dozen holes of the circumference of a good sized straw. Next to lemon candy, the stuff looks most like yellow amber with a few white flakes in it, or a bit of yellow celluloid.

The process of making gun cotton is generally known, and it is the product of ordinary cotton and nitric and sulphuric acids. It is one of the most powerful explosives known, and has the added merit of being nearly smokeless. The dynamite cruiser Vesuvius uses the stuff with effect, as was noted in the dispatches in THE MINER of late.

"Every shot from the big 13-inch guns costs Uncle Sam \$1,160," said Mr. White yesterday. "Each charge is loaded with 550 pounds of powder, while the steel projectile weighs just twice that, or 1,100 pounds. The grains of powder are closely packed together in the shell, and near their rear end common black powder is sprinkled. When the shell is discharged in its explosion the powder itself is set off. The holes through the grains aid in firing the whole mass together, and it is figured that all the gas contained in the charge will have been generated by the time the projectile reaches the mouth of the cannon, a distance of some 40 feet. With the cocoa powder, the initial velocity is 2,700 feet per second, while with the gun cotton, which is somewhat stronger, the projectile leaves the cannon at a speed of 2,900 feet per second."

"The ordinary life of the big 13-inch guns is only about 100 or 110 shots. By that time the powder will have swollen the calibre of the cannon until it is necessary to re-rifle it and to put in a new steel core."

### THE WHITE BEAR.

It is Very Probable That Work on This Property Will Be Resumed.

Work on the White Bear property is soon to be resumed, as the following, copied from the Toronto Globe will show:

Mr. Starr, the secretary of the White Bear, reports that a prominent shareholder who has recently visited the property, writes to one of the directors as follows:

"I spent several days in Rossland—from 13th to 16th of May—and visited from all the mines which were idle as well as those that are working. I found everything around the White Bear well cared for, the engine taken apart and oiled to prevent rusting, and from the appearance of the openings which have been made in two places in the direction of the Le Roi property leads me to think that the property is a good one, and if developed may prove as good as those which are now paying handsome dividends. I met Mr. Cole at Rossland. He is very anxious to get started again, and is firm in his opinion of securing pay ore at the 200-foot level by drifting in the direction of the Le Roi. Mr. Cole deserves credit for the handsome share he has taken of the property, in striking contrast to other properties, where the machinery is left without care to be eaten up with rust. I believe that a new start would put confidence in the shareholders and be the means of making a move in the stock, whereby money would be obtained for further development."

To this Robert Dixon, a broker of Toronto adds: "This gentleman has anticipated the very course we have been taken. Some 30,000 shares have been sold the last few days, and only 20,000 now remain of the 50,000 offered at the present time, and our manager, Mr. Cole, will soon have the satisfaction of starting work again on this stock at 10 cents with a bonus of 100 shares for every 200 bought to the 15th should be sent in at once."

### ROBSON TO PENTICTON.

It is Almost a Continuous Scene of Activity in Mining.

D. A. Good of Cascade City was in Rossland a few days ago. He stated that the country from Robson to Pentiction is now the scene of great activity. The people of Boundary and its vicinity have on several occasions been deceived in regard to promises of transportation, so that much stock in stories to the effect that a railroad is to be constructed into that section. Now, however, that work has been practically begun on the Columbia and Western from Robson into

their country they feel confident that they will soon have what they have so long wanted. The result is there is intense activity all along the line and the amount of prospecting and development work that is in progress is astonishing. There are a large number of men at work in the country to the east of Christina lake and in the Burnt basin section. There are some excellent properties there. In the Burnt basin section there are some promising prospects as are to be found in any section of the Kootenays. With a very little development some of the properties are showing up what appear to be pay chutes. Many of these claims are located close to the railway and will need but little development work to make them paying properties.

# AN ORE BODY FOUND

A Good Showing in the Shaft of the Gertrude.

## SHEEP CREEK SECTION

Extraordinary Activity Is Being Manifested on Sophie and Santa Clara Mountains—High Assays Obtained From Toroda Creek Ore.

In the Gertrude shaft, which is down somewhat more than 20 feet, the ore is assuming regularly defined form, and the ore body, although pitching in and out, is in places as wide as six feet. Some good mineral is being raised, and during the past two or three days the shaft has improved considerably, showing high assayed material. The ore is giving very satisfactory assays both in gold and in silver. As yet no great amount of copper has been disclosed.

The shaft, which is of the two-compartment variety, is being sunk along the present angle of the vein, about 70 per cent. This angle will probably be followed consistently unless any changes in the dip of the ledge.

No attempt at horizontal exploration will be made until the 200-foot level is reached, when crosscuts will be run both north and south. These crosscuts, besides opening the ledge in which the shaft is sunk, will, it is expected, develop one of the other parallel ledges on the property.

On the Coxey, adjoining the Gertrude, and owned by the same company (the Montford Goldfields, limited), the prospect tunnel is proceeding steadily under contract, but there is no change in the character of the rock, nor is it expected that the ledge will be met at once.

### Activity on Sheep Creek.

In the Velvet, the work of timbering the shaft to its lower levels has been completed, and it is expected that sinking will be resumed immediately. There is extraordinary activity in the district along Sheep creek in the neighborhood of Sophie and Santa Clara mountains, and there are probably 75 men at work on their prospects in that vicinity. The showings have been very favorable, and as the formation generally is much harder than right around Rossland, it is possible for two or three men to make rapid progress in surface development of their property. Good copper values have generally been obtained very near the surface.

### Rich Rock From Toroda Creek.

A lot of ore has been received from Toroda creek from a mineral claim owned by local parties. It was taken from a depth of 15 feet and gave returns of 3,000 ounces in silver and 150 in gold. These are the best values yet obtained, though assays of from 300 to 1,500 ounces in silver and from \$20 to \$105 in gold have been obtained on many occasions. The owners of this property are Colonel E. S. Topping, of the Dr. Edward Bowers, Dr. H. E. Keller, Grogan, Toroda creek is within 10 miles of the Eureka camp.

### GIVES PROMPT SERVICE.

C. P. R. Now Gets Freight Train Through in a Short Space. The Canadian Pacific railway since the winter season has been over has greatly improved its freight service. Freight from Hamilton, Toronto, Chicago and common points is now arriving in from 12 to 14 days, the same time it starts from those places. The speed of the trains has been improved and betterments have been made to the track and roadbed, so that better time may be made. The speed for freight trains has also been increased so that freight now comes through in five days. The intention of the C. P. R. is to keep up this prompt service, both through the summer and winter months. When the Crow's Nest railway is completed, the service will be even more speedy than it is at present.

### CONNAUGHT WILL NOT SUCCEED ABERDEEN.

Toronto, Ont., June 18.—A special cable to the Evening Standard dated London, June 18, says there is not the slightest truth in the report that H. R. H. the Duke of Connaught is to succeed the Earl of Aberdeen as governor-general of Canada. A Scotch member of parliament is authority for the statement that the governor-generalship of Canada is a position much too expensive for a Scotch nobleman of small means to accept.

### A RELIABLE OFFER.

Honest Help Free to Men. The Rossland Miner is authorized to state by D. Graham, box 133, Hagersville, Ont., that any man who is nervous and debilitated or who is suffering from any of the various troubles resulting from overwork, excess or abuse, such as nervous debility, exhausted vitality, loss of vigor, unnatural drains and losses, lack of development, etc., can write to him in strict confidence and receive free of charge full instructions how to be thoroughly cured.

Mr. Graham himself was for a long time a sufferer from the above troubles and after trying in vain many advertised remedies, electric belts, etc., became almost entirely discouraged and hopeless. Finally he confided in an old clergyman, whose kind and honest advice enabled him to speedily obtain a perfect and permanent cure. Knowing that there was no so many poor sufferers being imposed upon by unscrupulous quacks, Mr. Graham considers it his duty as an honest man and a firm believer in Christian sympathy and kindness, to give his fellowmen the benefit of his experience and assist them to a cure. Having nothing to sell, he writes to Mr. Graham you can rely upon being cured and upon absolute secrecy.

Address as above, enclosing a stamp, and refer to the Rossland Miner. No attention, however, will be given to writing out of mere curiosity, therefore state that you really need a cure.

# ROSSLAND CRICKETERS.

They Go Forth Tonight to Subdue the Proud Nelsonians.

## ROSSLAND CRICKETERS.

In response to a challenge from the Nelson cricket team, the newly formed Rossland club, under the captaincy of Arthur Marshall, left on the 6 o'clock train for Nelson Friday, to vanquish the hospitality host of the town on the lake. At least, the Rossland team is going with the intention of humbling the proud Nelsonians, but in view of the fact that all the members of the home team are sadly out of practice, it is doubtful whether they will be disappointed if their rivals get in a run or two. The team from Rossland will comprise of Arthur Marshall, Olive Pringle, A. Lorne Beecher, R. N. Grogan, C. O'Brien Reddin, Edwin Durant, Charles Hamilton, Le B. De Vebre, Donald Sword, W. De Kaller, who will act as substitute. The game is to be called tomorrow morning at 11 o'clock.

### The Rossland Team Defeated.

There was an air of dejection among the members of the Rossland cricket team, who returned Saturday night from Nelson, which told plain than words that they had been defeated by the cricketers of the north country city. Messrs. Grogan, Beecher, Sword, Parker and Bogle of the team returned in Nelson. They had that tired feeling following defeat and did not care to risk the journey home until they had rested. Following is the result of the game: Rossland—First innings 66, second innings 109; Nelson—First innings 110.

De Vebre, Sword, Hamilton and Grogan bowled for Rossland, and Brown, Wilson, McKenzie and Elliott for Nelson. The members say that there was a large throng of the residents of Nelson at the match and the assembling was greatly aided over the fact that the home team won the game. The Rossland contingent was most hospitably treated and given the freedom of the city and say that the Nelson people seemed to think that nothing was too good for them.

### THEY NEED POWER.

It Takes Heavy Engines to Navigate the Stikkeen. VICTORIA, June 18.—J. R. Roy, resident engineer for the Dominion government, returned this evening from Glenora, where he had been with Chief Engineer Coste, for the public works department, examining the all-Canadian route to the Yukon. Mr. Roy reports the Stikkeen river to be a fine body of water, which steamers drawing not more than from 30 to 40 inches of water, and having powerful engines may navigate for six months in the year. The trouble this season has been, says, that several steamers with engines not powerful enough have attempted to beat the river. The government snag boat Samson set to remove obstructions could only ascend 75 miles, but beyond that the work will be carried on from large Indian canoes.

### FROM THE GAZETTE.

Latest Incorporation, Meetings, Applications for Certificates, Etc. The current issue of the British Columbia Gazette contains the following announcements: Applications for certificates of improvements for the following mineral claims have been made: Columbia, Snow Water, Climeron, Elvira, Fourth of July, Hazel, Midas, Midget, Phlox, Quantrell, Stonewall, Utopia No. 2 and Victoria No. 6.

The following extra-provincial companies have registered: The United Colonial Exploration, limited, with a capital stock of \$50,000, divided into 50,000 shares of \$1 each. The head office of the company is situated at Winchester house in the city of London, and the office in the province is in the Ogle block, Vancouver. A. St. G. Hamerley is the attorney. The objects are to carry on the business of general merchants and commission agents in all its branches.

The Bright Prospects Gold Mining & Development company has been re-incorporated with a capital stock of \$50,000. The head office of the company is located in Vancouver, and Walter A. Anderson is the attorney. The objects are to carry on the business of general merchants and commission agents in all its branches.

# A PECULIAR CASE.

H. McOutecheon Charged With Carrying on a Business Without License.

There was an unusual case in police court Thursday, when Hugh McOutecheon appeared to answer the charge of carrying on business without a traders' license. The specific act complained of was that Mr. McOutecheon had sold to the school trustees the seats used in the new school house. The complainant was Charles Lockhart, of the firm of Lockhart & Jordan, furniture dealers, who tendered for the contract of furnishing the seats. As Mr. McOutecheon is not a regular dealer in furniture, and as it was a special order that he filled, the case is one of unusual interest. The penalty for carrying on the business of trader without a license is a fine not greater than \$100. An adjournment was taken for a week.

### ROSSLAND CRICKETERS.

In response to a challenge from the Nelson cricket team, the newly formed Rossland club, under the captaincy of Arthur Marshall, left on the 6 o'clock train for Nelson Friday, to vanquish the hospitality host of the town on the lake. # Have you any Interests

In Mining Property in the Trail Creek or Surrounding Districts on which you want work done?

I have reliable men in the field, and will guarantee that the work will be as carefully done as you could do it yourself.

It will be done under my personal supervision, by experienced miners, and full value given for money expended.

We will endeavor to "develop" your property, not merely do work.

All records will be carefully made in order to preserve clear title.

Communicate with me before letting any contracts.

First-class Mining Property for Sale on easy bonding, stocking and cash terms.

Our object is to secure for patrons, profitable investments in stocks or properties.

## D. D. BIRKS,
