The Annie Strike Was the Feature of the Past Week.

SHIPMENTS, 1,833

The No. 1 Ledge Met at the 200-Foot Level in the Shaft-Coxey Ore Body Continues to Hold Its Own-The White Bear's Mysterious Vein.

The British America corporation has been the lucky mining company during the past week. In the Annie, which is being developed through the Josie workings, two ledges have been met which carry values as high as \$20 in gold. One of them is an extension of the Josie vein, while the other seems to be the Annie's peculiar property. The two ledges are holding their own bravely, and promise to be of much value.

The ore shipments for the past week show a slight decrease, due to the development in the Le Roi and to the inability to get cars at the War Eagle. The Le Roi's output was 1,050 tons, while the War Eagle produced 765 tons and the Iron Mask 18. In tabular form the shipments for the past year are as

The ore shipments for the seven days from Dec. 10 to Dec. 17, inclusive, were as follows:

Shipments for same week last year were 1,720 Northport 1,050.

The total shipments from the camp since Jan. 1, 1897, aggregate 196,104 tons.

shaft has been completed to the 250-foot some time this week. level, and the skip-and the man-ways are completed. Operations have been commenced in the workings at the 250-foot level, and some exploratory work will be conducted there in order to prove the nature of the ledge. A vein has been met at that point vertically under the the mouth of the shaft. In the natural order of things the main White Bear lead should be considerably north of the line of the shaft, and it is suspected that continues. a new ledge has been met, the existence of which had been hitherto unknown. Arrangements are now being made for the treatment of the ore which will be shipped soon after the first of the year. BROKEN The White Bear rock is well suited to the process in use at the British Columbia Bullion Extracting company's works London Regards the Liberals in at Silica, and the ore may be treated there. From the nearness of the property to the Red Mountain tracks, which reach both Silica and Northport, the reduction works at either of those places are easily available to the White Bear. John Y. Cole, the manager of the company, has not yet definitely decided where the ore will be treated.

WAR EAGLE.—The concrete and stone foundation for the new electrical hoist and work is being vigorously pushed on in running order about the first of Feb | rank and file are seriously displeased hand is the adjustment of the timbers in desertion. but they must be adjusted to the eighth and internal division has existed of an inch, and the work, which must inner liberal circles for the past year. be done carefully, is taking some time. About 14 machines are at work, above the 500-foot level.

MASCOT.—The upper tunnel is in a little more than 430 feet. The showing throughout has been very satisfactory. the property, announces that one chute Speaker, as the mouthpiece of the party, lost all, lost all our last Armada, that chased the stove given by Martin Bros., invariably favored him. The Berlin of ore, nearly 100 feet long and from 8 to 10 feet wide, assaying around \$20, has just been passed through. The tunnel will be continued indefinitely, so long as the showing continues as favorable as it as shining examples, and we are sorry question of the Maine. We said Ameris at present. The new lower tunnel is they have now fallen short of their own ica should appoint an American, an meeting some mineralized rock, but the ledge is not yet met. The lower tunnel will be continued to connect with the winze which is being sunk from the up- an embarassing conflict of conferences ists, and that the commission or the per workings.

Coxey.-In the west drift from the upper tunnel, where the strike was recently made, the showing still continnes good. The drift is in 29 feet. and fine bunches of ore have been met for the whole distance. It is expected that the drift will be continued for some time farther, in order to demonstrate the course of the vein, when a winze will be sunk to the lead. Work continues in the lower tunnel. Ten men

are employed on the property.

IBON MASK.—The working force on the Iron Mask now numbers 36 men. which is the largest that has been employed for a long time. In the raise the showing continues little changed and there is about two feet of ore at that point. In the winze, which is down 65 fee, all the bottom of the working is in ore, and the foot wall has not yet been postponement of Heme Rule, but they blowing up of the Maine as a surpicious The booth netted \$100. met.
