

July 19 1901

## ST. THOMAS Business COLLEGE

The growth of this institution during the last two years has been wonderful. The attendance has been doubled on account of the thorough course of training which we give. One of our young men is now drawing a salary of \$1,800 a year; another \$900; others from \$400 to \$800. Within the last month two of our students have gone direct from the College to positions paying \$500 a year. WE QUALIFY OUR STUDENTS TO FILL THE BEST POSITIONS.

Young people are foolish to spend the best part of their lives learning Latin, French and the dead languages, when a few months spent in our Commercial or Shorthand Department will fit them to earn salaries like the above.

Eighty-seven per cent. of all our students who have written on the examinations of the Business Education Association of Canada this year have been successful.

Send for Catalogue.

Auction Sale of Valuable City Property.

Will be sold by public auction on Wednesday, the 24th day of July, 1901, at the hour of ten o'clock a.m., at the Garner House, in the City of Chatham, in the County of Kent, the following valuable property:

All and singular that certain parcel or tract of land and premises situated, lying and being in the City of Chatham, in the County of Kent and Province of Ontario, being composed of part of lot number forty-seven (47) of Northwood's sub-division of lot number two (2), formerly in the first concession of the Township of Chatham, according to a plan thereof made by W. G. McGeorge, P. L. S., and registered in the Registry Office for said County of Kent on April 19th 1882, described as commencing on the line between lots numbers forty-seven and forty-eight at a distance of one hundred and fifty feet from Delaware avenue; thence running easterly along said line one hundred and seventy-three feet to the proposed Bedford street; thence along Bedford street northerly parallel with Delaware avenue, fifty-four feet ten inches; thence southerly parallel with the line between lots forty-seven and forty-eight, to within one hundred and fifty feet of Delaware avenue; thence southerly easterly to the place of beginning.

TERMS.

Ten per cent on the day of sale, sufficient to deposit to make one-third of the purchase price in ten days from the day of sale, balance in thirty days.

For further particulars apply to MURPHY, SALE & O'CONNOR, Vendor's Solicitors.

Wdo. J. B. 3-10-17.

Minard's Liniment—Lumberman's Friend.

## HOUSEKEEPER'S CHAPTER

Interesting Things That the Good Housewife Will Read and Profit By.

WINDOWS are open now all day, and notwithstanding great heat, dust is bound to settle on everything. The piano is the one piece of furniture that should be specially cared for. Many piano owners have never learned how to protect their instruments properly. Keep a space of ten or twelve inches between the piano and the wall. That will improve the tone, and the instrument will be safer from dampness and changes of temperature. Never put books, music or bric-a-brac on a piano. That deadens the tone and often causes unpleasant rattling.

When the keys grow yellow they may be cleaned by being carefully rubbed with a very fine sandpaper. Another way is to dilute nitric acid in soft water, half an ounce of acid to five ounces of water. Apply to the keys by rubbing well with a brush. Then wipe every key carefully with a flannel dipped in clean water. According to a wholesale furniture dealer, the best furniture polish is made of one-third alcohol and two-thirds sweet oil. Apply the polish with a soft cloth and then rub dry with another one.

BATHTUBS NEED ATTENTION.

If a bathtub has part of its enamel worn off it is hard to keep clean. It is very easy, however, to re-enamel an old tub at slight expense. Scrub it first with a strong solution of soda in water. When perfectly dry apply the first coat of enamel. Allow this two days in which to dry, and then put on the second coat. After drying for twenty-four hours fill the tub with cold water and let this stand six hours. Empty, dry thoroughly and add the third coat of paint.

There are several ways to clean an enameled tub. One that is easy and quick is to pour some benzine on a cloth, scour the bathtub well with this, and then wash with water and soap. Another method is to take a heaping tablespoonful of kitchen salt, wet it with turpentine and scour the bathtub with this. Then rub carefully with a clean cloth. Caution! It is needed in trying this plan to see that the tub is perfectly dry before the salt and turpentine mixture is used.

FOR A QUICK BREAKFAST.

First serve any good fruit that may be in the market. At many seasons of the year an orange, cut in halves, is appetizing. Just now small fruits, melons, etc., are in favor. Follow with oatmeal porridge and cream. Bacon, sliced very thin, is quickly cooked through, and may be served with egg on toast. A bit of marmalade and a cup of milk, tea or coffee completes a breakfast that a physician of merit declares is fit to set before anybody.

TO WASH BLACK SATIN.

Do not discard a black satin gown simply because it grows limp and rusty. It can be made quite as good as new by sponging the material on the right side with equal quantities of spirits of wine and water. Rub hard and wet the cloth well. While still damp, iron it on the wrong side. A good wash for satin is also made of soap and water and a few drops of ammonia. Wash well on the right side and iron on the wrong side.

PASTE THIS IN THE KITCHEN.

A pinch of bicarbonate of soda will prevent a quart of milk from turning in hot weather, unless left too long without use.

Give your bread plenty of time both for rising and baking. The secret of good bread making is never to be in a hurry.

When macaroni or barley or vermicelli is used as a garnish in soup it should first be partially boiled in salt water to get rid of any outside impurities. This is too often neglected.

In using arrowroot for the thickening of gravies, etc., it should always be mixed smooth with cold water in a cup and stirred well. This is to prevent it from caking in the bottom of the cup.

The House Beautiful.

A bay window affords the opportunity for decorative notions. The recessed window suggests a low seat running round it, upholstered in artistic tapestry and framed with curtains of harmonious colorings. It is easy, the cost of little thought, to produce something picturesque if we have the chief material ready to our hand.

In a large room an ordinary window was so cleverly treated by a young housekeeper that in effect it was "recessed." This effect was gained by an archway which stood out at a distance of about two feet from the window, the sides being shut in with screens and with palms in tall stands and a seat being arranged beneath the window.

Another way of "recessing" is by means of two brass arms jutting out from the wall, one on either side, these connected in front by a brass pole, hung with curtains draped at each side. Curtains should also hang from the side arms and shut in the window. Finish with a window seat.

The Helpful Girl.

The helpful girl is a great factor in any home. It is rather better to be the helpful daughter than the amazingly accomplished one. Everybody loves the helpful girl. When your head aches it is the helpful girl who runs to get the smelling salts and coolest pillow for you. When there is to be company for dinner the helpful girl comes forward like a little captain and puts her shoulder to the wheel. As she busily flits about the dining room a sense of rest comes to you, for you feel certain that she will make things appear to their very best advantage. She brings out from hiding bits of china and glass you had entirely forgotten about and puts the odd dishes to some novel and handy use.

## CURES CREATE CONFIDENCE

That is Why Dr. Chase's Kidney Liver Pills Have Won the Confidence of the People of this Continent—Read These Letters.

Dr. Chase's Kidney-Liver Pills have the largest sale in Canada of any treatment recommended for diseases of the kidneys. They have won the confidence of the people by actually curing the ailments for which they are intended, and are known in nearly every home in the land. Scores of hundreds of people could write just such letters as these that follow:

Mr. James Clark, Consecon, Prince Edward County, states: "Eleven years ago I was taken with pains in my back, settling in my hips and extending up my spine. The pain was very severe and at times almost unbearable, and many days I was not able to do an hour's work. I was treated by several physicians and tried several advertised medicines, I could get no relief.

"At the time my father-in-law told me to try Dr. Chase's Kidney-Liver Pills and said he knew they would cure me. I secured one box, and great was my surprise when I began to feel better after using only one box. I continued their use until I had taken about four boxes, which made me a sound man, and I also regained my usual weight, 150 pounds. I cannot say too much in favor of Dr. Chase's Kidney-Liver Pills, which have done so much for me. I have recommended them to a number of my friends and have never met with one case where they did not meet with good success. My daughter, Mrs. Charles Phillips, has also been cured of a severe stomach trouble by the use of these pills."

Mr. Geo. Cummings, Barrie, Ont., one of the best-known engineers on the G. T. R., and who has been a worthy and reliable citizen, writes: "For years I suffered from kidney disease brought on by railroad life. The doctors called it 'railroad neuritis,' but could give me no permanent relief. A friend recommended Dr. Chase's Kidney-Liver Pills, saying they had cured him. A few boxes of this grand medicine completely cured me, putting an end to the dreadful pains in the back and greatly strengthening the kidneys. I am a well man to-day, thanks to Dr. Chase."

There is no uncertainty, no experiment, about taking Dr. Chase's Kidney-Liver Pills. They have cured such a variety of cases, and have been thoroughly tested during the past quarter of a century that you can be absolutely sure of being benefited by their use. If you have been disappointed with other remedies you will all the more appreciate the genuineness of this sterling relief.

Dr. Chase. One pill a dose, 25 cents a box, at all dealers, Dr. Edmanson, Bates & Co., Toronto.

It is not generally known that clippers from masculine heads of hair are used for making strainers through which syrups are clarified.

Beauty is born in the blood. Beauty is more than "skin deep"; it is blood deep. When the blood is tainted by disease the flesh will feel it. Sallow or much eruptions, pimples, blotches, and eruptions are only the surface signs of impure blood. Face washes, lotions, complexion powders, may palliate the evils but they cannot cure the disease. The only cure is to cleanse the blood of the poisonous matter which is the cause of the outbreak in the flesh and skin. Impure blood can be absolutely purified by the use of Dr. Pierce's Golden Medical Discovery. Its effect on flesh and skin is marked. Sores heal and disappear. The skin becomes smooth, and regains its natural color. The eyes brighten and sparkle, the whole body is radiant with the brightness and beauty of health. "Golden Medical Discovery" contains no alcohol, whiskey or other intoxicant, and is absolutely free from opium, cocaine and other narcotics. The use of Dr. Pierce's Pleasant Pellets, assists the action of the "Discovery," by cleansing the system of clogging matter.

The depth of water affects the speed of steamers very considerably, the vessels moving more slowly in shallow than in deep water.

A SPRAINED ANKLE is not an uncommon accident. Painful as it is, the greatest household remedy. Avoid substitutes, there is but one Pain-Killer, Perry Davis'. 25c. and 50c.

Good company and good discourse are the very sinews of virtue.—Waltton.

She's as White as a Ghost.

As pale as a lily. A matter of pride! Certainly not. Strength! Color! Endurance! That's what every woman wants. Good digestion, perfect assimilation. Bonyanay and vim is the right of every woman. She need not lack these if she will only use Ferrozine. It makes blood, gives appetite, gives strength to the nerves, color to the cheeks, and brightness to the eyes. A box of Ferrozine tablets is at once transmittable into health, beauty and strength. There is power in Ferrozine. Try it, and see if it is not so. Sold only by McCall & Co.

Stern Pater—Johnny, what must you do first of all to have your sins forgiven?

Johnny—Commit the sins.

The Probabilities

Are, that your temper will improve, and you will enjoy walking and skating in real earnest once that sore corn is removed. Putnam's Painless Corn Extractor never fails, gives no pain and will relieve you in twenty-four hours. Give Putnam's Corn Extractor a trial and be happy.

## INCREASING CORN YIELDS.

The Success is Due to the Planting of Two Varieties.

An Illinois farmer who succeeded in growing an unusually large crop of corn credits part of his success to planting two varieties, one mixed and the other a pure-bred corn.

He regards this plan better than omitting an occasional row and planting a few days later with the same variety of corn. By planting two varieties they go into the soil under identical conditions. The foundation for this claim is that corn is not completely self-fertile. By selecting an early and late variety the season of pollination is prolonged and there is more likelihood of each stalk having a well filled ear. There would be fewer incomplete ears and fewer stalks without ears. By growing early and late varieties of the same color and general appearance the crop produced would be as marketable as a pure-bred corn and would feed just as well. The seed from this cross-bred corn should not be used the next season for planting. Greater loss from such seed would occur than the gains made from cross-breeding with pure seed.

A couple of small areas, say a half acre each, could be produced of pure seed each season with which to plant the field. By planting these small areas some distance from the other corn there would be little liability of mixing. Then, too, the farmer might by a little extra effort improve the pure seed and increase the yield each year in the field planting.

Planting the two varieties at the same time is done by putting the late variety in one seed box of the planter and the early in the other box. This of course would put two rows of each variety together. Our Illinois friend changed the seed at the end of the row so as to avoid having two rows of the same variety together. This, however, was on a trial or prize plot and he was endeavoring to produce a big yield without regard to cost of extra work. He was rewarded with a yield of 160 bushels per acre. Surprisingly an amount worthy of close study. This is about five times Indiana's average yield. By planting pure seed each season and the ears are similar in general appearance, the difference being time of maturing, there is a good deal of promise and probably no loss in thus mixing corn for a general crop.

Clover in Renovating Soil.

A number of years ago I bought some so-called worn-out land. It had originally been very productive, but had been cropped with grain for thirty-five years in succession, without ever having had any clover on it, and with very little if any manure. The humus was all used up, the soil was very compact, and in dry time was as hard as a well traveled road. The pressure of the plow downward and the successive tread of the forrow animal during all these years, had made, at the usual depth of the furrow, a most impervious strata through which water seeped slowly or not at all, and, as the land was nearly level, water would stand on the level for days and even weeks after a heavy rain. When the ground was new water did not so stand. The first year I seeded this land with oats and clover. The oats grew no more than a foot high, and were so thin they were scarcely worth cutting. But fortunately it was a good year for clover seeding and there was a good crop of clover. The third year I planted it to corn, and no water stood long enough in the hollows to do any harm. The clover roots had improved the drainage. That was twelve years ago, and the land has produced every year since, being seeded by the clover every third year.—C. P. Goodrich, at a Wisconsin Farmers' Institute.

Dairy Cattle Need Sunshine.

It is not the change of food that is the cause of butter being more yellow when the cows get to pasture, though that has much to do with it, but the sunshine which they receive when out in the pasture. Says the "American Cultivator," It has been proven that the cow standing in the barn and fed on winter rations gives a higher color to her butter in the summer than in the winter, and more when her stall is on the south side of a stable where the sun can shine in most of the day than when she is kept in a dark stable. It has also been found that a general rule, or we will say, an invariable rule, other conditions being the same, that her milk will be richer in butter fat during a succession of pleasant, bright days than at the end of two or three cloudy days, even though they are not cold or wet. No young animals grow strong and thrifty when confined where they do not get the sunshine. If any farmer or dairyman has his stables so that the sun cannot shine into them most of the day, it will pay him well to alter them around to the sunny side, cut away and put in more windows, and if he is where cold weather prevails in winter, provide for double windows with an air space between them to give sunlight, and still keep out the cold weather, and while making alterations he should not fail to provide for a system of perfect ventilation to insure the health of the animals and the freedom from unpleasant or injurious bacteria in the room where the milking is done.

Here on the Farm.

Every careful bee-keeper well knows that one bee in early spring is of more value to him than half a hundred later on. In order to prevent spring swarming we take one of the Mason half-gallon fruit jars, remove the screw top, take a seven-eighths board four inches square, and with a small gouge on knife cut a groove nearly from one corner to the other, taking care not to cut quite to the corner, says the "Farmers Review." We fill the jar with water, place the board over the mouth, invert it quickly, and place in convenient places in the apiary,

## CARNEGIE'S CURSE

Highest Man on Earth Cannot Digest as Food.

How many people have envied Andrew Carnegie retiring from the strife of business with a fortune so colossal that he may scatter millions in charity and feel it no more than the average man feels the bestowal of as many copper! And yet the multi-millionaire himself declares he is not to be envied. He is unhappy. "I am sixty years old and cannot digest my food," he says.

The German poet tells us the story of Faust the old man who sold his immortal soul to the devil for the gift of youth and health, envied, states he would make Faust's bargain if he could. He cannot digest his food.

Dyspepsia, more than any other disease disgusts a man with life. It betters him, destroys his joy in living, makes him see the world through smoked glasses. What good is life to Andrew Carnegie, what is the use of all his millions, He cannot digest his food.

Dodd's Dyspepsia Tablets would help Andrew Carnegie. They would beyond question insure the digestion of his food. Thousands and thousands of people in this country have found the blessing of regained health through Dodd's Dyspepsia Tablets. Hundreds of thousands in the United States have done the same. In Great Britain, though Dodd's Dyspepsia Tablets have only been introduced a couple of years, they have already broken through the prejudice of the Englishman against new things as far as the masses of people are concerned. It is a strange paradox that Andrew Carnegie, with all his wealth fails to find what so many poorer countrymen have discovered—the value of Dodd's Dyspepsia Tablets.

You Prevent May Fever, or Cure It

In a prompt, pleasant and effective way by inhaling the germ-killing, throat and lung healing Catarrhizer. Delightful to use, simple in its operation, free from stomach nauseating and destroying substances. It is a marvel of scientific efficacy. Catarrhizer kills the germs that excite the disease, heals the inflamed surfaces and prevents a recurrence of the malady. Catarrhizer cannot fail to cure May Fever because it destroys the cause. Druggists, 25c., 50c., or mail to your address if price is forwarded to Poison & Co., Kingston, Ont.

"I can't get on with that young woman at all."

"What's the trouble?"

"Oh, she gets mad when I say she's mature; and she gets mad when I say she's immature."

Baddeck, June 11, 1897.

C. C. RICHARDS & CO.

Dear Sirs,—MINARD'S LINIMENT is my remedy for NEURALGIA.

It relieves at once.

A. S. McDONALD.

"Stop joking!" said Venus.

"I'm serious," replied the Dog Star.

WABASH—WEST SHORE TO NEW YORK.

The only line running through sleeping cars Chatham to New York, and passing along the great Hudson River. The West Shore lands its passengers' foot of West Chas. and Franklin streets, convenient to the business part of New York, or steamship docks. See Mr. Rispin, agent Wabash R. R., for particulars.

315 to 31

The things that would go without saying are not, unfortunately, allowed to go that way.

How a Sprain Does Hurt

But it isn't the pain alone that is dreaded, just think of the loss of time and wages. Sprains without number have been cured by rubbing Polson's Nerviline well into the pores of the skin surrounding the joint. No matter whether it is a sprained wrist, ankle, knee or back, just try Nerviline on it, and see how quickly it will cure. There is only one liniment that can be depended upon to cure sprains, strains and swellings, and that is Polson's Nerviline. Large bottle 25c.

A Russian does not become of age until he is 26.

CASTORIA

For Infants and Children.

The man who is looking for a fat office should visit the counting room of a land factory.

Children Cry for CASTORIA.

Paradoxical though it may seem, a new watch is a second-hand article.

Children Cry for CASTORIA.

Happy is he who lets himself owe no man and lets no man owe him.

It is nice to be handsome, but it is handsomer to be nice.
