the Empress, the Empress Oil & Gas Company.

"The oil and gas field," said Mr. O'Keefe, "gives fuily as great promise of profitable financial return as the big mines of the Cobalt region."

Some of the wells have paid for themselves in an amazingly short time. One shallow well which opened with a tremendous flow of 1,500 to 1,600 barrels a day is reputed to have paid for itself in five hours. The big deep pay well on the Noisson farm paid for the property, the driling, piping and all machinery by its product within a week, and all the yield from now on is absolute profit.

The interst of the practical oil me The interst of the practical oil men now centres largely in the property yet to be exploited. The tract sold last week to Toronto and Ottawa interests by Mr. M. Egan is attracting much attention. Part of it lies directly between paying properties and is supposed to have equally big possibilities. Drilling operations will be begun at once.

Other new interests are now crowding in and the development promises.

A FEW WORDS ABOUT

THE basis of this Roofing is a selected long fibre wool felt saturated with a carefully prepared non-combustible compound rolled under a pressure of 30,000 pounds. There is not a particle of paper or tar used in its manufacture. We guarantee it to be absolutely water and wind proof and practically fire proof. It is light, warm, and will last a lifetime if painted once in six years. Rex Flintkote has been on the market for upwards of 30 years, and is, therefore, no experiment.

We recommend it for all kinds of buildings.
