THE POPE'S DOCTOR

AN INTERESTING SKETCH

OF A FAMOUS CHAR-

ACTER.

How He Differs From His Canadian Colleagues—An Example Wor-thy or Being Follower.

Tr. Lapponi, the famous physician to the Vatican, whose mmb has recently come so greatly to the front on account of his unremitting attention to His Holiness the late Pope Leo XIII., and the high esteem with which he is regarded by the present Pope, His Holiness Pius X., is a man of commanding genius. But he is something more than that. He is more than a mere man of science.

is something more than that. He is more than a mere man of science. He is a man of original and independent mind. He stands out among medical men of all nations, themselves the flower of the world's intellect, by reason of his fine independent personality. He has had differences with his fellow scientists. But no one has ever disputed for an instant the remarkable nature of his professional attairments or the unflinching integrity of his personal character. He is afraid of no man. Bu the has a higher courage still. He is not afraid of the bugbear of professional etiquette which frightens even som: of the greatest doctors.

As an example of this may be men

wide. There can be no doubt of their accuracy. The n mes and addresses of the man and women cured are freely published. Their statem at have been investigated by some of the most important newspapers in this country and abroad. No one has ever att mpted to dispute the facts. But Candian doctors have

facts. But Canadian doctors have never cared to admit publicly that they have availed themselves of

that they have availed themselves of this discovery. Dr. Lapponi, however, has availed himself of Dr. Williams discovery, and has, in his own fearless way, had no hesitation in making the fact publicly known. The following letter, with his signature, freely avows the facts and endorses the value of Dr. Williams' Pink Pills with an authority no ore

HIGH LIGHTS OF FASHION. Phe New Tailor Made Gown of Paris,

Grays are extremely attractive this year, ranging from "oyster" to iron gray and elephant gray and affording such a variety of shades that among them almost any woman may find one wear with comfort and satisfaction to herself. While usually associated with the elder folk, some smart gowns for young women adopt this useful hue at present. A taking instance is the gray dress of the cut, which is relieved rich soft hued oriental embroidery. A circular straw hat of pale chest-nut brown, looped up with satin ribbon and rhinestone studs, completes a cos-tume as striking as it is practical.

tume as striking as it is practical.

Biscuit and tan shades are to be smart, but how few complexions are really clear enough for them. A trap for the unwary they prove if there is the least sallow tinge in the skin.

As an item of comfort to those who are not exceedingly slim it should be noted that amid the many fluffy examples of the latest chic there appear cer-tain models of the tailor made order. This type of garment is always becoming to the plump woman and is her exclusive property.

Supple cloth and taffeta radium, a tissue in indescribable shades resem-bling shot mirror silk, together with infinitesimal checks, compose exquisite It is evident that soft tiny checked

canvas and silks made with very fully plaited or tucked skirts will be decid-edly popular for elaborate toilet, while edly popular for elaborate tollet, while cloths in light pastel colors and the new delft blue compose many of the smart tallor made costumes which are particularly noticeable for their perfect simplicity. One especially effective was in light gray tiny checked fine cloth made with a short basked single breasted coat having a black leather belt at the waist. A narrow black taffeta collar opened at the neck to dis-play a white guipure chemisette and velvet cravat.

As an example of this may be mentioned one very interesting respect in which he has differed from the medical men of this country. The latter are trammelled by medical etiquette. No one disputes their scientific skill or their unselfish devotion to their work. But they are limited in their labors by one remarkable scruple. They will prescribe and experiment with drugs of all kinds sanctioned by the Pharmacopoeia or newly introduced; but where a madical discovery, even when it is the life-work of a regular practising physician, is recommended to the general public by a manufacturer, professional etiquette steps in and frightens them. No matter how overwhelming the evidence of what such a discovery, when sold as experiences. If troubled with rheumatism, give Chamberlain's Pain Balm a trial. It will not cost you a cent if it does no good. One application will relieve the pain. It also cures sprains and bruises in one-third the time required by any other treatment. Cuts, burns, frostbites, quinsy, pains in the side and chest, glandular and other swellings are quickly cured by applying it. Every bottle warranted. Price 25 and 50 cents. For sale by All Druggists, The multiplicity of trimmings now cessary if a gown is to be "in it" the slightest degree it is impossible to describe. Passementerie, braid, fringes, drop ornaments, all are in demand. Buttons and "bobs" play an important part. The latter occur in immense va-riety—beads, jet, sequins and silk or

SMART PRACTICAL COSTUME IN GRAY. chenille embroidery. Pearl garniture are dreams of loveliness whether in the daintiest of passementerie or elaborate pendent ornaments.

the bride's gown this season pearls are the coveted trim ornament. Pearl passementeries for more general use combine pearls, rhinestones and spangles and are things of beauty, but basin and along the fluvial systems of long they will remain a joy is a

Newest in trimmings are the quilled ribbons used as a skirt trimming and ribbons used as a sair transcription complemented with a broad quilled ribbon flounce on the corsage. Silk and velvet striped ribbon is used to form bretelles and revers. An inlet of Scotch plaid taffeta ribbon on waist and skirt forms another unique bit of decoration.

J. VERNON-WALDER.

ment" referred to by Dr. Lappont is of course that tired, languid condition of young girls whose development to womanhood is tardy, and whose health, at the period of that development; is so often imperilled. His opinion of the value of Dr. Williams' Pink Pills at that time is of the highest scientific authority, and it confirms the many published cases in which anaemia and other diseases of the blood as well as the nervous diseases referred to by Dr. Lapponi, have been cured by these pills, which, it need hardly be mentioned, owe their efficacy to their power of making new blood, and thus acting directly on the digestive and nervous system. In all cases of anaemia, threatened consumption, deeline, indigestion, kidney disease and all affections if the nerves, as St. Vitus' dance, paralysis and locomotor ataxia, they are commended to the confidence of the public, and now that they have received the emphatic endorsement of so high a professional authority as Dr. Lapponi, the trusted physician of the Vatican, they will be accepted by the medical and scientifis world at their true value. A black hat with a picturesque long ostrich plume in azure blue, hyacinth blue, orchid mauve, salad green or other softly beautiful hue completes he fashionable black taffeta costume

A long, narrow, looped bow of white tuile, spangled with silver and holding two short white ostrich tips, is one of the ornaments used to fasten a bride's

Nun's veiling, albatross and gauze are fabrics other than silk or satin that may be used for a wedding gown. Checks and stripes in nun's veiling are up to date for the short, summe

valking dress.
Silk finished alpaca makes a useful and stylish hard wearing gown.

The charms of silk and linen are combined in linen de sole, a soft, rather coarse material for morning dresses.

Three-quarter length unfined coats of louisine, taffeta or crape in the lightest tints are dressy summer affairs.

Sieeveless taffeta capes and mantles, lace trimmed, are one of the Paris fan-

MONKEY AND PARROT.

What Did the Man Do With th Switch From the Tree! "If you will slip into the pantry and get me some cake I will give you this fine gold watch to wear," said the parrot to the monkey, holding up a beautiful watch for the monkey to admire. So the monkey ran into the house and into the pantry and got cake cov-ered with sugar and gave it to the par-

GAVE THE CARE TO THE PARROT rot, for he felt that it would be a very grand thing indeed to have a watch to

He placed the chain about his neck and walked up and down the garden, feeling very proud of his new posses-sion. He liked to hear it tick, he liked to see the little hand go bobbing around, and he liked to wind the stem of the watch when it ran down.

While he was thus enjoying himself.

who should come along but his master, "Oh, ho!" sang out the man. "So you are the young rascal who stole my fine watch that my wife gave me for a Christmas present!"

He grabbed poor monkey by the back

neck and took the watch from him. Then the man broke a little switch from a tree, and what do you suppose he did with it? All the bad little boys and girls know, and I shall not tell the good ones.—Exchange A PED

A BEAR HUNT.

You Think the Man With Knife Got the Big Grizzly?

When papa puts his pipe away an' takes me on his knee I know he's got a takes me on his knee I know he's got a story that he wants to tell to me. I put my arms eroun' his neck an' hug him tight an' good. Fer that's his pay. He wants it first. That's always understood. It's always 'bout a little by jest 'zactly big ez me who's got a pony, got a dog, a gun an' things, you see; jest 'zactly big ez me who's got a pony, got a dog, a gun an' things, you see; who kills some injuns on the plains an' goes an' traps an' hunts, who shoots big bears an' bufferless an' never misses once. He goes out in the woods alone an' travels through the woods alone an travels through the day an' builds a fire up ev'ry night to keep the wolves away, then in the mornin' takes his gun an' finds a grizzly's den an' chases bears fer miles an' miles, a-shootin' now an' then. At last he gits one up a tree an' walks eroun' an' 'roun' an' shoots his powder all away, an' then the bear comes down. So next the fellow takes his knife without a bit o' fear—an' then I "I certify that I have tried Dr. Williams Pink Pills in four cases of the simple anaemia of development. After a few weeks of treatment, the knife without a bit o' fear—an' then I git so sleepy that's 'bout all I ever hear. Then in the mornin' when I wake an' find myself in bed I git to wond'rin' if the bear is 'live er if he's 'dead. I look eroun' fer daddy, but can't see him anywhere. An' so I holler mighty loud, "Pop, did he git the bear!"—Exchange. After a few weeks of treatment, the result came fully up to my expectations. For that reason I shall not fail in the future to extend the use of this laudable preparation, not only in the treatment of other morbid forms of the category of anaemia or chlorosis, but also in cases of neurasthenia and the like.

(Signed) Dr. Giuseppe Lapponi, Via dei Gracchi 332. Rome. bear?"-Exchange.

Walled Up Alive.

A very interesting bird is one which follows the trade of a plasteer—the hornbill.

It makes its home in faroff Africa, and this home is in the trunk of a hollow tree. You see, monkeys run wild in this country, and there is nothing they like better than hornbill eggs for breakfast, so in order to save the lives of her young the mother hornbill coasents to—what du you think? To be wailed up alive!

She and her mate select a suitable tree and work together, plastering up with mud any opening there may be in the trunk. Having made it small enough to only just admit the passage of her body, the mother hornbill goes in, and her mate continues plastering until there is only a little round hole left, enough for him to put in the tip of his beak. Through this he passes in food to the mother while she is in his more do to the mother while she is in the trunk. Having made it is in the trunk that the man who does in, and her mate continues plastering until there is only a little round hole left, enough for him to put in the tip of his beak. Through this he passes in food to the mother while she is hatching her eggs and rearing her bables; nor do the latter get out into the light and air until they have donned their first sult of feathers. Then the door of the nursery is broken down, and the family begins to enjoy free life again.

About Marmosets.

Marmosets are too expensive and too delicate to make very good pets for children, but they are the cunningest little things in the world. Probably you have seen them in the animal stores. They are very, very small monkeys, you know, and come from South America. As to disposition, they are both gentle, tame and intelligent. As you know, they are only the size of squirrels, but their faces are owlish—so old and wise, old and wise,

That Was Different.

When naughty Jim pulled Jenny's braid Wee Susie laughed (the jolly maid):

"On what a funny thing to see!

Tec-hee, tec-hee, tec-hee!

But when Jim (witched at Sue's own curl She cried (the inconsistent girl):

SCOURGE OF THE AGE IS KIDNEY DISEA

Terrible Increase in the Number of Deaths from This Ailment

It is Common to Ail Classes and Conditions of People

It Creeps Stealthily Into The Sys-tem And Develops into Many Dis-cases.

Bright's Disease, Heart Disease, Dia-betes, Dropsy and Rheumatism, are Among The Forms It Takes.

Dodd's Kidney Pilis The One Remedy That Never Fails To Cure It, No Matter How or Where It Is Found.

Of all the diseases the human body has to combat in its struggle for health, the one that is steadily growing in strength and terror is Kidney Disease. Quietly, steathily as a serpent, it creeps on its victim fill the fatter is enveloped in its folds, and the greatest physician the world has ever known stand helpless before it. As the last fold goeseround the struggling victim and the dostor shakes his head and whispers "Bright's Disease" hope fades to nothing, and the sorrowing friends feel that death has marked their loved one for its own.

The blarming increase this terrible disease is making is evidenced by the columns of almost every newspaper. For not among the lowly of the earth aione does it look ffor its victims. Statesmen, judges, eminent lawyers, and honored divines are numbered among those who in recent months have gone down to their graves with the fell marks of this dread disease upon their bodies. In fact, so prevalent has the disease become that a celebrated New York specialist stated recently that not one person in a bundred was free from some taint of Kidney Disease.

WORKS IN EECRET.

Bright's Disease has invariable, yielded to a treatment of Dodd's Clabon may bicled to a treatment of Dodd's Clabon may bicled to a treatment of Dodd's Chabon may bicled to a treatment of Dodd's Chabon may bicled to a treatment of Dodd's Chabon may bicled to a treatment of Dodd's Chab may bicled to a treatment of Dodd's Chabon may bicled to a treatment of Dodd's C WORKS IN SECRET.

WORKS IN EECRET.

It is the eccreey of Kidney Disease that makes it the more dreaded. You can fight an enemy in the open with some chance of success, but if he is lying in wait to take you at an unwary moment your chances of successfully fighting him are terribly diminished. So it is with Kidney Disease. Its Erst warnings are so faint as to be hardly noticeable, a slight pain in the back that is charged up to over exertion, a slight discoloration of the urine or a fourning sensation while urinating that hardly attracts attention. That is all. But that means that Kidney Disease is at work gradually eating its way into your system. The pain in the back grows more severe, the urinary trouble more complicated, swellings under the eyes and of the limbs denote the coming of Dropsy, sharp shooting pains in the joints and muscles tell that Rheumatism has you in its grasp, or perhaps a day or two's illness leads to the calling of the doctor, and suddenly the terrible truth is forced upon you—Bright's Disease has you in its grasp.

WAY OF ESCAPE.

With this allent, retentlesse enemy, slowly but surely eating its way into prominence and making that prominence by a yearly increase in the length of its death list, the demand of the day, of the hour, is "Show as the way of escape." Nature never put mankind in a critical condition without providing a way of escape—providing mankind were wise enough to take the way provided. In this case the way of escape is a simple vegetable remedy. It has been before the people of Canada for thirteen years, and like all the great relievers of nature, has been first reseived and first appreciated by the lowly fin life, those known as ithe common people of Canada. WAY OF ESCAPE.

ON WITH HIS WORK.

And so it is; the man wno does manual labor must heal his slightest aches or they hinder him in his work. When he has backache he cures it with Dodd's Kidney Pills, and goes on with his work; when he feels a twinge of Rheumatism he drives it out of his body with Dodd's Kidney Pills—and goes on with his work. Necessity has taught him that he must cure his Kidneys to get rid of his pains, for he must work to live. He has not been educated to that standpoint where a persoription to cure must be written by a specialist at a cost of dollars to every letter. He may not even know that there never was a disease that took in all classes of the community but what nature provided a cure within the means of all classes of the community. What he does know is more to the point than all this. He knows that Dodd's Kidney Pills will cure all aches which experience has taught him come from the Kidneys. He takes Dodd's Kidney Pills, and goes on with his work.

SOME EXCEPTIONS.

Of course, there ware exceptions to every role.

Of course, there ware exceptions to every rule. Even among common people there are those who neglect the early warnings of Kidney Disease. It takes exceptions to prove the rule—but many of these exceptions prove more—they prove that no case of Kidney Disease is too far gons for Dodd's Kidney Pills to cure. Bright's Disease, Disbetes, Dropsy, Heart Disease—all the varied farms of Kidney

Disease in its advanced stages—been met by Dodd's Kidney Pills, a never once has Canada's great Kiney Remedy had to admit defea from the Atlantie to the Pacific, and from the Great Lakes to Hudson Bay. Dodd's Kidney Pills are used, and wherever used they have triumphed over Kidney Disease in its every form. Thousands of Candans are shouting their praises of the consequeror.

shouting their praises of the com-queror.

Just a few of those who have man-gleed the early symtoms, reached the more advanced stages of Kidney Diseases, and found a cure in Dodd's Kidney Pills are given below. These are thousands of others. Ask im your own immediate neighborhood, You will not have to go far to meet men, women and children who have either warded off or cured the terror of the present age by using the old Canadian stand-by — Dodd's Kidney Pills. Pills.

BRIGHT-S DISEASE CURED

Dabetes is another of the most fearful and fatal forms of Kidney Disease that has been cured by Dada's Kidney Pills, and by no other medi-Kidney Pills, and by no other medicine. (among those cured of this testible aiment is Mr. Charles Gilchrist, for fifteen years Chief of Police of Port Hope and afterwards for twenty-two years Fishery Overseer under the Dominion Government. He makes the following attract.)

Dominion Government. He makes aufoliowing statement;
I was a sufferer for ten years withDiabetes and Kidney Disorder. Attimes my urime was of a dark brickycolor, and I would suffer something,
awful while passing. I tried doctoms
and medicines, but could get no helptill I tried Dodd's Kidney Pills. They,
here made me a new man. The cittill I tried Dodd's Kidney Pills. They, have made me a new man. The citizens of Port Hope all know me, assican vouch for the above.
