

STREET WILL BE
PAVED THIS YEARDundas Sewer To Be Recon-
structed Soon as Possible—
Pavement to Follow.

Chairman Matthews, of the board of works, had a talk with City Engineer Graydon today, and arrangements were made whereby work will be begun on the reconstruction of the Dundas street sewer, between Wellington and Adelaide streets, as soon as possible. The chairman realizes that a pavement will be put down on the street this year, and he wants to be ready for it. It is understood a meeting of the ratepayers interested has been called for this week, and the matter of a new pavement is to be discussed. It is said that a majority of the people are in favor of asphalt, but they absolutely refuse to cut, shuffle or deal with any agent of any paving company. Chairman Matthews also ordered the engineer's department to take stock of all the tools, and to have the property of the board of works. All lying around loose is also to be sold at once.

SOCIETIES HAD
SUCCESSFUL YEARThose Connected With the First
Presbyterian Church Accom-
plished Much in 1906.

The members and adherents of the First Presbyterian Church turned out in large numbers last evening to the first of two meetings to be held for the purpose of reviewing the work of the past year. The pastor, Rev. W. J. Clark, occupied the chair, and Mr. Arch Macpherson acted as secretary. The evening was given over to the reports of various societies connected with the church. They were: The mission committee, home department of the Sabbath school work, Women's Foreign Mission, Victoria Mission Band, Proudford Mission Band, Ladies' Aid Society, Young Women's Home Mission Club, Young Men's Club. The elders also submitted a statement of the reports of a most satisfactory character, every organization having accomplished more than was anticipated during the year. The societies were commended by the pastor and several members for their success. The mission committee, home department of the Sabbath school work, Women's Foreign Mission, Victoria Mission Band, Proudford Mission Band, Ladies' Aid Society, Young Women's Home Mission Club, Young Men's Club. The elders also submitted a statement of the reports of a most satisfactory character, every organization having accomplished more than was anticipated during the year. The societies were commended by the pastor and several members for their success.

THE NEW PRIMATE
IS DR. SWEATMAN

(Continued from Page One.)

teacher in Christ Church Sunday school at Marylebone in 1889. While at Islington he founded the Islington Young Men's Institute. He came to Canada in 1895 to fulfill the duties of head master at Hellmuth Boys' College in London, but in 1897 the authorities of the Upper Canada College, having learned of his gifts as a teacher, offered him the mathematical teachership. He accepted this offer but after a short time resigned to become rector of Grace Church, Brantford, where he ministered for two years. In 1874 he returned to Hellmuth College, where success and welfare he always enjoyed. He was appointed a canon of the London Cathedral in 1875, and later was named Archdeacon of Brant. He was appointed in 1876 as assistant minister and rector of Woodstock. In 1872 the Bishop of Huron made him his examining chaplain, and in the same year he was elected vicar of the parish of the diocese and secretary to the Bishop. During the absence of the bishop he served as administrator. On the death of Bishop Bethune he was elected to succeed him as third Bishop of Toronto, his consecration taking place in Toronto on May 1, 1877.

His lordship received the degree of D. D. from the University of Cambridge University in the same year, and that of D. C. L. from Trinity University, Toronto, in 1882. He was one of the founders of the Church of England Literature and Publishing Company, and is president of the council of St. Hilda's College, Toronto, president of the Toronto Church School, president of the Toronto Church of Girls, president of the Toronto Church of England Sunday School Association, and a member of the corporation of Trinity University, Toronto.

He married Susanna, daughter of Robert and Margaret Garland, Islington, England.

AN INGENIOUS ADVERTISER

Manager Alois of Bennett's Vaudeville, is an ingenious advertiser. This week he is running many different forms of ads in the daily papers to boom the show of next week. Daisy Harcourt, the coster character singer, is coming, and one of Mr. Alois's ads took the form of an advertisement in "Wanted—Twenty men to wait at the church for Daisy Harcourt." Last evening a man walked into "The Advertiser" office and seriously asked who to apply for the job. The man apparently had never heard Daisy sing "Waiting at the Church."

GRATUITIES MADE
TO LONDONERSMatron of Asylum and Daughters
of the Late Dr. Sippi Receive
Sums From Government.

[Special to The Advertiser.] Toronto, Jan. 17.—Gratuities to the amount of \$17,410 were announced by the government this morning. Among the fortunate ones are Miss Pope, matron of the London asylum, \$250; Mrs. Miller, wife of the late deputy minister of education, \$2,700; Miss Cummings, teacher Ottawa Normal School, \$150; for many years bursar at the London insane asylum, \$1,000.

CAR WAS DEMOLISHED.

One of the big construction cars used by the Grand Trunk Railway in balancing the elevated tracks just east of the clover, jumped the track last night and rolled about 60 or 70 feet to the bottom. The car was smashed to splinters. The trucks were torn from the timbers, and the iron rods and braces were twisted into every conceivable shape. The officials say that no one was hurt, and no damage was done, save to the car.

ANNUAL MEETING
ST. JAMES' CHURCHAffairs of North End Presbyterian
C Congregation in a Very
Prosperous Condition.

The annual meeting of New St. James' Presbyterian Church was held last night, when a number of very satisfactory reports for the past year were received. The church's financial affairs were shown to be in a flourishing condition. The expenditures for the year amounted to \$4,532.12, and the receipts totaled \$4,929.95. The pastor, Rev. Thomas Mitchell, occupied the chair. The financial report was declared entirely satisfactory, and on motion of Treasurer John Campbell, seconded by Mr. Neil McNeill, it was adopted. The subscription clerk's report showed that there had been an appreciable increase in subscriptions during the year, and it, too, was accepted. The adoption of the report was moved by Mr. W. T. Brown, the subscription clerk, and it was seconded by Mr. John Puthorough.

Five new members were elected to the board of managers. Four are elected for three years and one for one year, to wit: Mr. W. T. Brown, Mr. John Puthorough, Mr. John Stephenson, whose death occurred some time ago. Mr. W. T. Brown moved, seconded by Rev. T. Ballantyne, that the nomination be made openly. Carried. Mr. W. T. Brown, Mr. John Puthorough, Mr. Neil McNeill were then named scrutineers, and the following were elected: For three years—Prof. Patterson, J. A. Campbell, W. A. Tanner and Wm. M. Gray. For one year—Mr. John McDougall. The report of the Young Men's Association was read by the secretary, Mr. Anderson, and on motion of the secretary, seconded by Mr. Brown, it was adopted. The report of the board of managers brought in two recommendations. The first was that the congregation permit the board to have the balance of the gallery seated when required, and on the second of Mr. James Gray, seconded by Mr. P. J. Thompson, the recommendation was carried. The other recommendation was that after 1907 retiring managers be not eligible for re-election for a period of one year after the expiration of their term. Mr. Thompson moved in amendment, seconded by Rev. Mr. Stewart, that the clause be struck out, but the motion was defeated. The recommendation of the board then carried. An adjournment was made until next Wednesday night, when all unfinished business will be taken up and plans for the new year will be discussed.

CONDENSED LOCAL NEWS

For the week ended today, the London Clearing House returns amounted to \$1,188,176, as compared with \$1,078,647 for the corresponding period of 1906, showing an increase of \$109,529.

Monday is the last day upon which the reduction in water rates may be secured. Pay up before that date and you will save the office staff at the city hall much trouble and worry.

The inaugural meeting of the board of works will be held tonight in the committee-room of the city hall. The board is composed of Ald. Matthews (chairman), Ald. Cooper, Ald. Rose and Ald. Saunders.

Mr. and Mrs. James Arthur and family, of Elias street, wish to thank their many friends for the sympathy shown them on the occasion of the death of their son, Walter; to the clergymen who so kindly called from time to time, and to the members of Prospect Lodge, No. 10, K. of P., for their never-tiring attention and the many beautiful flowers sent during all the weary months of the deceased's illness.

TIGHE-FLYNN.

A quiet wedding was celebrated in St. Mary's church, Tuesday morning, when Miss Alice Flynn, eldest daughter of Mr. John Flynn, London Junction, became the wife of Mr. Wm. J. Tighe, of Brampton. The ceremony was performed by Rev. Father McKee. The bride, who is a graduate of St. Joseph's Training School, was assisted by her sister Sophia, while Mr. Nicholas Tighe, of Toronto, cousin of the groom, acted as best man. The happy couple left on a trip to Toronto, Buffalo and other eastern points. On their return they will reside in London.

DEATH TOLL
OF EARTHQUAKE

(Continued from Page One.)

anxiety are felt at the colonial office at the absence of any further news from the governor of Jamaica. A dispatch calling on him to report latest details was still unanswered this morning. The only message from the governor is the one forwarded apparently on Monday, after which there was complete silence, indicating an interruption of the official channels, and increasing the apprehension regarding the destructive effect of the disaster.

The colonial office today was again besieged by anxious relatives, including those of Sir James Ferguson, who are still without word. Official confirmation of the death of the former cabinet minister, although the official advice leave no doubt that he is among the victims.

Famine Imminent.

During the early hours of the morning the West Indian and Panama Cable Company received a dispatch from its superintendant announcing that the scene at Kingston was terrible, and famine was imminent. He added that the company's steamer Henry Holmes has left St. Thomas for Kingston with provisions and doctors to render the sufferers every assistance possible. A company says that relief funds have been started in the unaffected portions of the island of Jamaica. The West Indian commission today received a dispatch reporting the safety of Alfred Austin, of the Colonial Bank at Kingston, whose fate had been in doubt. The authorities of the commission show the increasing extent of the damage done by the earthquake in Jamaica, and at the request of the commissioners, the colonial office has taken the initiative in inaugurating a Man-of-war fund for the relief of the sufferers. As the fund is under the direction of the Government, it promises to bring out a response from the whole nation.

Reports from Austria and Switzerland show that seismic disturbances are secured here on Monday afternoon at about the same corresponding time as in Jamaica, indicating widespread unrest of the earth's crust.

One Thousand Killed.

London, Jan. 17.—The reports received here from St. Thomas direct estimate the casualties at Kingston at about 1,000 killed, and say that some 8,000 persons are injured, and the place damaged to the extent of \$10,000,000. Concerning the latter, while the fire insurance companies are called yesterday to repudiate all liability, under the earthquake clause in their policy, the marine insurance societies are likely to be pretty hard sufferers, the risk of fire to merchandise, wharves and warehouses having been largely carried by these companies in recent years. Their policies do not appear to include an earthquake clause.

Kingston Alone Damaged. Holland Bay, Jan. 17.—Advices received from various parts of the island

cheese or butter any milk or cream that is tainted, grassy, over ripe or delivered in rusty or unclean cans or utensils, or in which a preservative of any description has been used, or which has been drawn from cows suffering from lumpy jaw or other infectious disease, shall be liable to a fine.

The Work of Instruction.

Mr. George H. Barr presented the report of instruction in 1906. At no time during the season did the makers get off the track, he said. Notwithstanding the dry, hot spells, which were frequent, scarcely any acid cheese was made. Without a doubt the cheesemakers are handling over-ripe milk better than they ever did before. They are also selecting the milk more carefully at the weighing stand, returning that which is tainted and over-ripe. The buyers have been taking the cheese out of the curing rooms earlier than formerly, and this had had something to do with the improvement in the quality. No doubt much cheese is shipped out too green, providing a detriment to the trade. The main point to be noted is that the cheese must not become heated in any way. A summary of details shows that the inspectors were visited regularly by the instructors, one less than in 1905. Eight hundred and seventy-three visits were made, and 298 calls, making in all 1,271 visits to factories. This is 366 more than in 1905. Card tests made numbered 2,648, twenty more than in 1905. There were lactical tests, 43,473, 6,420 more than last year; 2,594 Babcock tests, 1,524 more than last year; 655 patrons visited, 85 less than in 1905. It will be noticed that the inspectors have been doing more milk testing than last year, and this is not their fault, as they were anxious to visit patrons, but they could not always make arrangements with the makers or factory men. The instructor felt much disquiet with the results of the visits made in 1906. There were few improvements made in regard to moving milk stands or in the method of taking care of milk, and tainted and over-ripe milk was still being sent from these farms. During the year Mr. Barr attended 41 annual and special meetings. Twenty-one annual meetings were attended by the instructors, making a total of 62 meetings, with an attendance of over 5,000. The total expenditure for visiting new factories was \$28,750, being \$8,293 less than last year. He reported recommended that there be only one tank in the ground, and it made shallow; not more than 4 feet deep, so that a drain could be run from under it. There has probably been a greater improvement made in the milks cans than in any other part of the dairy season. In the cleanliness of factories there is still room for improvement. A few complaints about boxing the cheese have been entered. During the months of December and November district meetings were held in each instruction group. The following were the instructors during 1906: Jointly, Scott, Ingersoll; Frank Hens, Woodstock; George Travis, Simcoe; R. H. Green, Brantford; Ald. McKay, Stratford; J. R. Burgess, Listowel; W. Wadell, London; E. M. Hart, Kincardine, and George H. Barr, outside factories.

The Harbor Sinking.

New York, Jan. 17.—The shores of the harbor of Kingston are sinking, and there is terror lest the city slip into the sea, according to a private dispatch received by a large mercantile house here today from Port-au-Prince, Hayti. The harbor was said to be sinking, and the water in many places is now 100 feet deep. Every wharf is said to have sunk into the sea or to have been rendered worthless.

United States Warships Aid.

Washington, Jan. 17.—A wireless message to the navy department from Rear-Admiral Evans at Guantanamo states that the battleships Missouri and Indiana will arrive at Jamaica early today. The Whipple, having aboard a Divisional Commander Admiral Davis with a corps of surgeons and medical supplies, already has arrived at Kingston.

ONE SHOCK DID IT.

First Quake Brought Down Hundreds
of Buildings in Ruins.

London, Jan. 17.—A dispatch from Holland Bay, dated Jan. 15, says that the first earthquake at Kingston, which occurred at 3:35 p.m. Jan. 14, did all the damage. The subsequent lesser shocks having little effect. Fires spread in three directions fanned by a strong wind, and the firemen were handicapped owing to the absence of water.

The Holland Bay dispatch, after continuing the reports that hundreds were killed, burned to death or injured, says that at least from 30 to 40 persons were killed by the collapse of the Myrtle Bank Hotel. The devastated region, the dispatch continues, stretches from the wharves in the southern part of the city to the race course in the north, and from the customhouse in the west to Fleet street, east, containing all the principal stores, banks and Government offices, all of which were wrecked, most of them being leveled to the ground.

The sender of the above dispatch does not mention any looting or violence, except in the case of a few rum shops, which were invaded by negroes.

Weird and Terrible Scenes.

London, Jan. 16.—The prompt steps taken by the American Government to the necessary succor to the unfortunate victims of the earthquake of St. Thomas, and the sympathy of the English residents of the island had been few. A message from Sir Alfred Jones confirmed the worst fears. It is as follows: "All the houses within a radius of ten miles have been damaged and almost every house in the city is destroyed. Fire broke out after the earthquake and completed the work of destruction. The business quarter of Kingston is now a heap of smoldering ashes."

ANALYSIS OF
Strong's
Baking Powder

by the Analytical Chemist for the Dominion of Canada: Strong's Baking Powder is found to have very high aerating power. It is a cream of tartar powder, containing no alum or phosphate, and it is not adulterated. Alum baking powders are sold to consumers at from 10 to 15 to 20 cents a pound. So detrimental to health are alum baking powders considered, that in many countries their sale is prohibited. Strong's Baking Powder.
