PREE PRESS CORRESPONDENCE.

Another Veteran of '37-'38. To the Editor of the Free Press.

Kirkton, Ont., Sept. 13, 1892. DEAR SIR,-Having seen in the FREE Press of Sept. 1st the above notice, I take the liberty of writing you for information as to whom I may apply for pension. I served under Colonel Hill and Captain Young, of No. 6, Queen's Light Infantry, for six months. Put in six months until we were discharged. Served at the front. I think I am entitled to a pension if there is any to be given. Waiting your reply, I am, yours respectfully,

WILLIAM WEBB, Kirkton P. O., Ont. Note.—Send in your name to Mr. John Bonser, city, or Geo. Merrill, Belleville.

When we consider how easily this machinery may be set in motion, what thousands of evergreens are procurable in many parts of the country and with how little trouble long lines of them may be the matter should be taken in hand at once. Once planted, improvements go on without additional labor, and the whole farm will speedily become beautiful and

more profitable. However, my principal object in sending on this letter was not to write an article ing on this letter was not to write an article on forestry. What I chiefly wished to mention was that this year's Forestry Report is now being distributed, and will be sent to anyone who will send me his address. Yours truly, R. W. A Gambler's Suicide. The Berlin Fremdenblatt has a despatch rom Monaco, giving an account of a sensational tragedy at that place. Prince Albert of Monaco, and his wife, the Princess Alice, on returning from their recent tour were received with great enthusiasm by the people of the principality, the attaches of the Casino turning out especially in strong force to greet him. The little army of members was drawn up at the landing as a guard of honor, and the Governor and BEST HOURS—Our city patrons will kindly reserve their most convenient hours before the Fair.—W. C. BARRON, Principal.

Council were present to deliver addresses. The cannon thundered a greeting and the scene was of a most joyous and festal char scene was of a most joyous and festal char acter, when suddenly a young man burst through the throng and rushed towards Prince Albert and the Princess. He was well dressed, but his wild and disordered appearance st once caused dismay among the group which surrounded the Sovereigr. In his hand he grasped a weapon, and before anybody could interfere, he raised the pistol, for such it was, and putting it close to his head, fired and fell dead at the feet of the Princess Alice. The Princess, who had a moment before been smiling, nearly fainted. She gave a cry of alarm, and sank back in the arms of her husband. A dozen officers sprang forward and seized the prostrated body

only to find that life was extinct. The life-blood which oozed from the wound almost stained the garments of the Princess. On searching the body not even a centime was found, but there was a tick-et to the Casino which told the story of his fate. He had evidently been overcome by despair after losing all he had at the establishment which supplies the Prince of Monaco with luxuries, and had determined o end his life at the feet of the Prince. Prince Albert and the Princess were so shocked that the reception ceremonies He's been expecting this would come for came to an almost abrupt conclusion, and the last two years. they both hurried once more aboard their magnificent yacht and sailed toward the south. The body of the suicide was borne to an unmarked grave in the cemetery which contains so many victims of the gambling tables.

But much remains to be done; many farms have been improved, but there are many thousands yet untouched. It should always be remembered that in retaining on each farm its proper proportion of timber we supply a constant stock of moisture for the remaining land. We also supply a reservoir where the falling rain may lodge, which will then gradually, by under-

the colored man charged with the murder ground channels, be ted out to the rest of the land. Another and most important point is the amount of shelter obtained from wind-breaks, which would otherwise too rapidly dry up the land.
