17.11 That the Penny Bank scheme is gaining ground in the schools of Canada is apparent by a statement issued covering the month of Nov-There is no profit in selling the pro-duct of an acre of potatoes for \$82.81. When one deducts price of ember and December 1922, showing total deposits during November of \$48,904.76 and December \$31,372.seed, planting, cultivating, spraying, 17, a gain of approximately \$3,000 over the total for the ocrresponding months of 1921. The average nonthly deposits made by each pupi

in attendance at schools in some western Ontario cities follows: Blen heim 6c; Forest 23c; Galt 33c; Goderich 22c; Kitchener 13c; London 30c; Niagara Falls 27c; Strat-ford 30c; Woodstock 16c. The average monthly deposit of each pupil for all Canada was 32c.

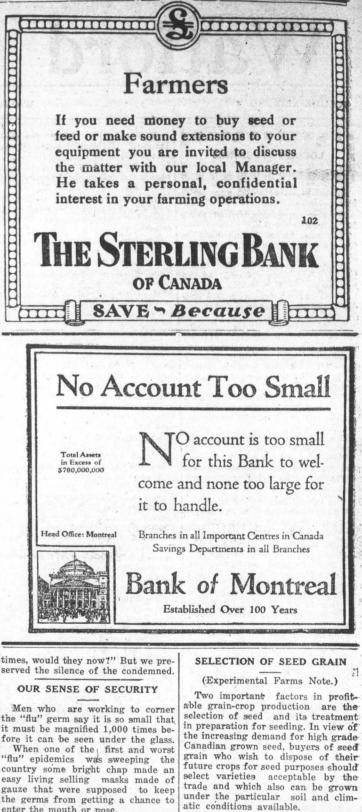

Rev. Canon H. J. Cody, rector of St. Paul's, Toronto, recently visited New York city. The scene was Fifth avenue. "As hard as you can,' pleaded Dr. Cody, as he jumped into one of those battered yellow taxis thinking only of the appointment for which he was late. There was a roar, wind whistling by as from an areoplane propeller, eerie tilting at perilous angles, then a confused hub-

bub, shrill whistle, and a loud Irish voice—"Hi, there, you're pinched for speeding." Out of the window ap-peared Canon Cody's clean shaven face, suffused with one of his blandest smiles. The thunderstorm cleared from the big Irish face of the traffic cop. Graciousness appeared as if by miracle. "I beg pardon, father. Go ahead," he whispered, "but be careful; there's a Protestant cop at the next corner."

\* This is the age of advertising. He who bloweth not his own horn, the same it shall not be blown. It pays, too. You have often wondered what some of the big ads. cost in the magazines. Here's a secret. It costs exact

ly \$15,000 for a full page ad in color on the back page of the Ladies' Home Journal. No, not for a year; for one issue. You think it madness to pay that amount of money. People used to think so. Fifty years ago there was not a hard headed business enter

their attitude towards their school work and their future life. There certainly are exceptions to this rule, but taken generally children are allowed to develope a lack of applica-tion for the more solid things of life,

a tendency to slip over work and studies or avoid them altogether. And in this connection a well known Kent county educator who was in Blenheim a short time ago pointed this out as a characteristic of the pupils of today, and said that in classes he had taught for the past year or two he has not found a single brilliant pupil. The principal reason for this he believed to be lack of appilcation and improper influence in the home, that permits all sorts of excuses and amusements to interfere with full devotion of one's faculties towards the acquiring of all the im-

portant training for life.

tended the fair last fall. He was crossing over the race track when a speeding or racing event was on. He and hamper a teacher whom they stopped, then a sulky driven by Arnott came along and there was a collision The sheriff is being sued for \$120 because of alleged damages to the sulky, harness, etc. The defence, we understand, will take the une. ground that it was not speeding in ring at all, but horse racing, which is not allowed on a 'fair ground. The

case will be decidedly interesting. X

It used to be said that a winter with a heavy snowfall would be followed by a good harvest. This winter we have more snow than for several years, but it will have to be a wonderful harvest to beat last year's, which followed an open winter. A Goderich township farmer who has seen half-a-century of winters and harvests says there is nothing in the saying; his observation is that the harvest bears no relation to the amount of snow in the preceding winter. But it is pretty hard to kill these old traditions.

×

The department of justice ruled Monday that interest paid on bonds by Canadian companies was liable for income tax. In the past the money paid out by Canadian com-panies in this way has not been taxed except as income by the persons re-ceiving it. Under the new ruling the company paying out will be forced to pay taxes on the amount which is now to be regarded as company pro-fits even though it is borrowed money. This is a very important rul-ing and a serious ruling to a large number of companies througout the

A NEW DEGREE FROM TORONTO UNIVERSITY

The Legislatrue of the Province of Ontario received on Monday of last week a very lengthy and very costly report. Last session a group of gentlemen were appointed gentlemen were appointed by the Legislature to find out what is wrong with the hotel business and how to make it better. They spent a delight ful summer at the task, (with all expenses paid) and perambulated through the country and part of the United States.

The report of 150 pages contains their recommendations, twenty-six recommendations, to be exact. The most interesting of these is the proposal that a course for hotelmen be inaugurated at Toronto University. Hotelkeepers will surely jump at

that. To sit at the feet of Sir Robert Falconer while he discourses on "The Roller Towel and the Chained Comb" would be both interesting Comb" and inspiring. Other topics suggest themselves: "What Gives the Hote Clerk that Weary Look?" "The Waiter: How to Keep his Thumb out of the Soup." "The French of the Menu card." "Why is the Hotel Pillow?" etc., etc. Today a course in hotelkeepin

is a comparatively simple thing. Ter years ago a degree of D.H.K. (Doc tor of Hotelkeeping) would mean much more.

him, and look around, but couldn't vance the right for positions at these prices. Business men have learned that it pays to spend money in adbecause that, in the long run, is the most effective and least We build quite a few of our houses expensive way to sell goods .--- Vanon sand foundations.

In the state of Iowa an education

critic has been making an extensive investigation into the daily needs of 15,000 persons, of varying trades and professions, and has found how

few of the painful arithmetical processes in public schools are utilized in adult life. He discovers that the arithmetic fetishes in publc school curriculums and set by enlightened departments of education are not often employed even by book-keepers and business men. In fact, the bug bear of the young student at school is quickly forgotten by the time he reaches manhood. There is very little use for these atrocious figure studies

for the average scholar when he has nightmares of an obsolete school sys-tem, except to those few students are destined to be teachers and who will have to inflict them on another

possibly break through the gauze. But from what we are told now he germs could walk 40 abreast right through the finest gauze made.

STORMY WEATHER

HARD ON BABY

The stormy blustery weather which we have during February and weather March is extremely hard on children. Conditions make it necessary for the mother to keep them in the house. They are often confined to overheated hadly badly ventilated rooms and catch colds which rack their whole system. To guard against this a box of Baby's Own Tablets should be kept in the nouse and an occasional dose given the baby to keep its stomach and working regularly. This will bowels not fail to break up colds and keep the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Corns are painful growths. Holloway's Corn Remover will remove them

ar vigour as productiveness, but it is a method requiring both time and care. It is from mass-selected seed grain-i, e, selected from grain seed threshing that most farmers fill their requirements. Good seed should be made up only

ina

of the larger and plumper kernels. It is necessary to remove all impuri-ties such as chaff, straw, dirt and other inert matter, weed seeds, seeds of foreign varieties and shrunken, immature or otherwise inferior kernels. Many of these impurities may be removed in the fanning mill, after which it will be necessary to go over the grain to remove what the fanning mill has missed. The vital parts of the fanning mill

are the air blast and the upper and lower sieves. The first should remove the chaff, straw and lighter impurities, as well as the lighter grains. It is often advisable first to run the grain through rapidly, to take out what the air blast will remove, and then to clean it more slowly, with the sieves properly adjusted. (The top sieves should be large enough to let the seed through while holding back the larger impurities; its slant, amount of shake and size of open-ing being regulated so that the grain will travel slowly. The lower sieve should be small enough to hold the pump seed while allowing small kernels to be taken out along with

the weed seeds. Finally the grain may be run over a narrow sluice when whatever impurities have been missed can be removed by hand.

R. D. L. Bligh, Assistant, Experimental Farm, Nappan, N.S.

The Oil of the People .--- Many oils have come and gone, but Dr. Thomas' Eclectric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.
