The failures in the United Kingdom for the week ending January 3, reported to *Kemp's Mercantile Gazette*, numbered 64, as compared with 284 and 200 in the corresponding weeks respectively of 1884 and 1883. England and Wales had 50 failures, as compared with 265 and 185 in the weeks specified; Scotland had 13, as against 17 and 12, and Ireland had 1, as against 2 in 1883 and 3 in 1882.

The trade of New Orleans is, they say, a barometer of Southern industry and commerce. The value of domestic produce in the city in 1881-82 was about \$149,000,000. In 1882-3 it was over \$200,000,000. Judge Terill, (owner of one of the largest cotton compress establishments in New Orleans,) is authority for the statement that in 1883-4 the value was not less than \$235,000,000. In these times of depressed trade, with manufactories and mines at the north suspending operations, such news comes with peculiar gratification. The value of exports of domestic produce to foreign countries—from New Orleans—has increased about sixteen per cent. during the past thirty-six months.—*Manufacturer's Record*.
