Essence of Pepsine—*Fairchild*

is, by intention and in fact, physiologically different from the preparations made with dry pepsin. It is obtained from the secreting glands of the fresh gastric mucous membrane by a process which extracts the principles and properties of the gastric juice and presents them in association with all the soluble gastric cell constituents.

Essence of Pepsine—*Fairchild*

is practically an artificial gastric juice, standardized to a definite activity with respect to each of the two well-known gastric enzymes, promptly active in promoting gastric normality, upon which depends the further normal transformation of food into the absorbable form in which it becomes directly contributory to life and energy.
