

TORONTO MECHANICS' INSTITUTE.

NEW HALL.

THE Members of the Toronto Mechanics' Institute have, for some time, been painfully conscious that the energies of the Institution were cramped, and its usefulness much impaired, from the very limited accommodation afforded by the Building they now occupy in rear of the Court House.

Convinced that an Institution like this, contemplating the intellectual improvement, and in some degree the education of our Mechanics, should occupy a prominent position in the City, the Committee have made several attempts to dispose of their present, and erect larger and more commodious premises in a less retired locality, so that by enlarging the operations and increasing the usefulness of the Institute, it might become in every respect such as to command the support and co-operation of a large portion of our citizens, besides those for whose immediate benefit it is intended. Hitherto these efforts have not been successful. Lately, however, they have purchased a very valuable Building Lot, at the corner of Adelaide and Church Streets, upon very favourable terms of payment; and on this they contemplate erecting a New Hall, to cost about £3000, which is intended shall be built in such a style as to be an ornament to the city. Besides furnishing all the accommodation required by the Institute itself for Lecture-theatre, Library, Reading-room, &c. it will contain a Music Hall, 76 feet long by 56 feet in width, with five ante-rooms attached, admirably adapted for Concerts and other public purposes—approached by a spacious stone staircase.

The Committee propose to raise, by subscriptions and donations in the city, among the friends and supporters of the Institute, the sum the new building is to cost, estimating that the revenue they may reasonably hope to derive from it, together with the price they expect to get for the premises they now occupy, will be more than sufficient to pay off entirely the price of the ground.

If the past is any guarantee for the future, the Committee of the Institute point with confidence to its history as affording strong ground to hope that it will continue to advance, so as fully to supply the increasing demand for useful information and learning, and keep pace with the growing importance of our flourishing city. That with this extension of their borders, the Institute will obtain great additions to its members, sustain a larger and better Library, a much superior Reading Room, and will scatter more widely those benefits which such Institutions are intended to confer.

With a view to stimulate to exertion in its behalf, and to publish their plans and expectations, do the Committee circulate this address in the hope that when they call upon the friends of the Institute for aid in the enterprise they have thus undertaken, their appeal may meet with a hearty and liberal response.

MR. CHARLES RAHN. SURGEON DENTIST,

BEGS to acquaint his numerous friends, and the public generally, that he has just returned from New York, where he has been spending some time with Professor John Allen, of the College of Dental Surgeons, Cincinnati, from whom he has been acquiring a knowledge of the late great improvement in Dentistry, viz: that of uniting single teeth to each other and to the plate upon which they are set, by means of a fusible silicious cement, which is flowed in and around the base of the teeth upon the plate in such a manner, as to form a continuous artificial gum. By this method the cavities between the teeth, which are unavoidable in the old style, are completely filled up leaving no chance for secretions of any kind, and giving a perfectly natural and life-like appearance to the gum and teeth. Specimens may be seen at his Office, on the corner of Bay and Melinda Streets. Office Hours from 9 a. m. to 6 p. m.

Terms—Cash—without exception.

This important improvement has been patented by Dr. Allen, in the United States, and steps have been taken to procure Patents in England and France. Dr. A. has authorized Mr. Rahn to give instructions in this beautiful art to educated gentlemen in the profession, on moderate terms.

N.B.—Mr. R. offers a friendly challenge to all the Dentists of British North America to compete with him at the approaching Provincial Exhibition, for a Gold Medal, value £12 10s. to be left to the judgment of the Professors of Toronto University, and of Trinity College.
