

Constructa

Hannover, F.R.G. — February 1-7, 1990

Building Trades

This major event is held every four years and features structural work, secondary building finishes and final fixings, technical installations, prefabrication system building, protection of buildings, external works and special equipment, consulting, planning, financing and computing.

Batibouw

Brussels, Belgium — March 1-11, 1990

Building, Renovation and Decoration

This annual event for the Belgian construction industry features furniture, heating, chimneys, fireplaces, plaster, doors, frames, windows, insulation, glass products, and kitchens. Over the years, Batibouw has become an important vehicle for Canadian exporters of forest products. With 350 000 visitors, this fair provides the opportunity for market education on the timberframe construction techniques, and for the display of new products and energy-efficient concepts used in Canada.
