Mine clearance Mine awareness Victim assistance (\$50 million)

1 All dollar figures shown are five year totals.

2 \$7 million from DFAIT; \$.5 million from DND.

3.\$13 million from DND; \$4 million from Industry Canada.

mine ban convention.

limb may allow a survivor in Laos to earn an income. The incremental nature of our fight against landmines underscores the importance of developing the means to measure our progress in mine action at all levels from the local to the global. Measuring success will be critical to our efforts to learn from past activities and to improve the efficiency and effectiveness of our mine action programs.

Canada has developed its own "measures of progress in mine action" which recognize the integrated and mutually reinforcing nature of various aspects of the fight against landmines.

convention to ban landmines

no later than December 1997.

These measures of progress in mine action include:

- Banning the production, stockpiling, trade and use of anti-personnel mines;
- · Reducing mine casualties;
- · Clearing mined land;
- Providing assistance to mine victims and their communities;
- · Developing mine awareness; and
- Improving mine action information and planning.

Co-recipient of the 1997
Nobel Peace Prize, Tun
Channereth, distributes
pro-ban literature. The
tireless efforts of ICBL
activists such as
Channereth were critical
to the momentum of
the ban movement.
