

nature, one forcing the earth and planets in a right line, corresponding with the projectile force, and the other operating upon the planets in a sidelong direction, ninety degrees to the northward of the right line current, both which currents, operating upon the surrounding gaseous medium, would, I humbly conceive, produce ample force to carry the planets in their present orbits round the sun.

While we agree, then, that electricity is a very powerful agent of nature in carrying the earth and planets in their orbits round the sun, we have, in conclusion, to observe, on the "New Philosophy of Matter," that although the author of that work derives *his* electricity from the sun, his theory does not show how that electricity is formed there, whereas, our theory shows it to be produced from the combustion of the gases that are supplied by the comets to restore the sun's waste.

ERRATA.

In Supplement, eighth line from commencement, for "of Good's Book of Nature," read *from Good's Book of Nature.*

In page xliii, ninth line from top, for "tastes on," read *tastes on the.*
