

Would you own a house fit to live in only in the Summer? Would you keep a horse that went lame every Winter? Would you retain an employee who annually insisted on a several months' vacation? Why, then, be satisfied with roads that every year go off duty for months at a stretch? That is exactly what the old-stylish road does. The first big Winter storm turns it from a comparatively useful, smiling road into a sulen, rebellious one. It remains "on strike" until the sun is strong enough to dry up its muddy quagmires. How different with

**Permanent Highways of Concrete**  
365 days they are at your service, not a day's holiday do they ask. How we need such roads! What a country this will be when at last we have a complete network of them joining town with town and linking all our farms with their respective community-centres! Each one of us can do something toward bringing it to pass. Every citizen of Canada can "do his bit"—by talking Concrete whenever roads are mentioned. But to talk Concrete, we must know Concrete. We have collected and "boiled down" for easy reading a large amount of information on the subject—free to you if you write

## INCREASE YOUR YIELD INSTEAD OF ACREAGE, WARNING TO FARMERS

Prof. Harper's Address at Big Essex Corn Show.

### URGES TILE DRAINAGE

Experts Tell How to Obtain Maximum Production and Efficiency.

KINGSTOWN, Feb. 15.—Increase your yield per acre rather than your acreage, was the advice given visitors to the Ontario Corn Growers' Association this afternoon by Professor J. D. Harper, of Purdue University, Lafayette, Indiana.

"It pays better," he continued, "to grow eight bushels of corn on fifty cents a bushel at a cost of production of \$1.48 an acre, than to grow forty bushels per acre on three acres at the same cost of production."

His advice for improving the quality and increasing the quantity per acre of corn was as follows: "As far as possible grow your own seed corn, employing methods of selection, planting, cultivation, husbandry and storing, which will give seed of the highest quality and strongest vitality."

"Plant each year a seed batch, and make a thorough germination test before planting. Avoid crossing with other varieties as far as possible. Select for field corn planting ears representing the ideal corn. Be sure by testing it is going to grow and cultivate the right amount of depth. Select ears maturing first for the seed batch, choosing ears growing neither too high nor too low, and note that the stalk is neither diseased, smutty nor too slender."

**Tile Drainage.**  
"The importance of proper tile drainage, illustrated by an experiment tried in Indiana. Properly drained land yielded the test by the next speaker, Prof. D. E. Lay of the O. A. C. Guelph. He declared corn is the best and the worst used for stock."

"It all depends on the man feeding it," he said. "He drew attention to a peculiarity of corn as compared with other cereals. Corn is poor in the protein necessary for building up some muscles and fibres and producing milk, but is rich in the constituents forming heat, energy and fat."

"The fact that corn is so rich in fat-forming constituents," said the speaker, "has led to the mistake of depending upon it for feed for fattening stock. It is not the most satisfactory feeding when used alone. Young pigs fed largely on corn fatten, but lack the muscular development which goes with properly balanced feeding. Corn may satisfactorily take the place of oats for feeding horses, only it is necessary to take into consideration the difference in weight for the same measure. Clover, hay, and alfalfa fed with corn make up the deficiency in bone and tissue building constituents of corn."

Referring to the care of the silo in this province, the speaker drew attention to the overcoming of early prejudices against ensilage. The fact that silos are being built more and more, and that some of the most conservative farmers are using ensilage for feeding pure bred beef cattle, for silo filling, he recommended the intermediate silo method. He stated that his experiment it has been proven an acre of corn put in silo, ears and all, for silage, gives as good results as an acre and a quarter of corn stalks put in a silo and grains ground up and fed for grain.

"Diet where you have stock to feed," was the moral drawn. "It doesn't pay to have the corn and feed separate." In answer to a question, Prof. Day stated the silo may be refilled up to almost Christmas time with corn from stalks, provided plenty of water is added.

**Raise Standard.**  
A determination to maintain and raise the standard of corn-growing in the province was manifested on the part of the members of the Ontario Grain Growers' Association at the annual meeting held here last night. Changes in agreement between the growers of seed corn and the minister of agriculture of Canada were presented to the effect that the standard and quality for the grades shall be as follows:

No. 1 seed corn in cob, sound, well developed, ears reasonably uniform, typical specimens of variety named, carefully selected and cured, with 99 per cent germination.  
No. 2, similar to No. 1, germination basis, ear tests, not less than 85 per cent.

A. R. Everett, Chatham, favored raising the standard so high as to include only grade 1. Darius Wight strongly advocated steps towards legislation to prohibit selling of seed corn, and to make it compulsory that every parcel of seed corn sold should bear the name variety, and be subject to inspection.

Chief Seed Inspector C. B. Eddie, Ottawa, stated it would not be possible to make it compulsory for buyers to produce corn on the cob for seed at present, and that the whole question of buying high-grade seed to grow for seed purposes is a matter of education, and that the whole question of raising the standard of seed corn is a purely voluntary one on the part of the seed growers.

In his valedictory address, Acting President R. W. Knister of Comber declared if there was ever a time the growers should save every grain fit for seed, it is now. He believed the Corn Growers' Association could do more than in the past in the way of helping itself. He also expressed conviction that reorganization would be necessary in the near future for the best interests of the association and corn growing.

Later in the evening he moved a resolution to be forwarded to Dr. G. G. Essex, minister of agriculture, expressing appreciation of the proposed appointment of a corn specialist to superintend seed growing, and asking that the association be consulted regarding the appointment. Carried.

The election of a new executive resulted as follows: Honorary president, R. W. Knister, Comber; president, Les Gregory, Chatham; first vice-president, L. D. Hankinson, Aylmer; second vice-president, Walter Anderson, Amherstburg; secretary, J. W. Noble, Essex; assistant secretary, Miss Annie Hicks, Essex; treasurer, J. W. Coatsworth, Kingsville; superintendent, Harrison Smith, Ruthven.

## MUNICIPALITIES ASK POWER TO GO INTO FUEL SUPPLY TRADE

Electric Association Delegates Want Added Privilege.

### BOOSTS HYDRO RADIALS

Sir Adam Beck Declares They Would Have Kept 20,000 Mechanics in Country.

TORONTO, Feb. 15.—At the meeting of the Ontario Municipal Electric Association, held today in the city hall, by an overwhelming vote a resolution was carried, calling upon the Government to give power to the municipalities to go into the fuel business. It was also decided to apply for legislation permitting the hydro-electric commission to submit their money bylaws to the people when the municipal councils refuse to do so and that the provincial commission pay the expenses, providing they are not submitted at the same time as municipal elections.

The association also unanimously decided to oppose the application of the Continental Light and Heat Company for a Dominion charter. The Provincial Government will also be asked to place entirely in the hands of the provincial commission the management and operation of the hydro-electric power and radial scheme, and that one representative of the municipalities be placed on the commission.

Sir Adam Beck, president of the association, declared that the municipal electricians would not have been allowed to leave the country in the past six months, transportation throughout the country would be carried on a much more economic basis, and the people of the province would have some relief from the miserable service given by the existing companies.

## MOTORMAN MAY DIE, PASSENGERS HURT

Another Bad Street Car Crash in Detroit.

DETROIT, Feb. 15.—Two heavily loaded street cars, moving at a fair rate of speed, collided head-on, came together head-on near the plant of the Great Lakes Engineering Company at River Rouge today, injuring more or less all of the 130 passengers on board. The vestibules of the cars telescoped, the roofs were torn off, windows smashed and both cars left the tracks.

The crash was followed by a wild scene at the imprisoned passengers fought desperately to reach the open air. Some climbed through the tops of the cars where roofs had been, others forced their bodies through windows, and many too dazed to move, waited for the rescue party to take them out. Floyd Lucas, motorman of the west-bound car, sustained several broken ribs and is hurt internally. He is not expected to recover. Half a dozen others were seriously hurt and removed to hospital. Tying glass slightly injured a majority of passengers.

## PROHIBITION IN STATES ADVANCES ANOTHER STEP

WASHINGTON, Feb. 15.—Prohibition took a step forward today in both branches of Congress. The Senate's drastic amendments to the national prohibition bill were recommended by a vote of 75 to 15, which would exclude liquor advertisements from the mails in states which legislate against such advertising.

On the House side the national prohibition constitutional amendment was favorably reported from the judiciary committee, with a prediction by Chairman Webb that it would be passed within a week. Champions of prohibition greeted this announcement with enthusiasm, in spite of their realization that passage in the House will end action on the amendment in so far as this session of Congress is concerned. There is no thought of action by the Senate until next year, when the sixty-fourth congress dies.

## HEAVY GERMAN LOSSES IN EASTERN THEATRE

Italians Succeed in Recapturing Last of Lost Defences.

PARIS, Feb. 15.—The official communication, issued by the war office this evening, on the eastern theatre, says: "The Italian counter-attack against Hill 1050, east of Pavarolo, permitted the recapture of all the lost defences (mentioned in yesterday's official communication)."

"An enemy counter-attack delivered in the afternoon of February 13, was repulsed. The German losses on February 12 and 13 were large."

"There was artillery activity on the rest of the front."

## FARMER 74 YEARS OLD

Tells How Vinol Made Him Strong.

The following letter from Farmer Lester adds another link to the great chain of evidence which proves that there is nothing equal to Vinol to create strength for feeble, weak, rundown conditions and after sickness.

Vestal Centre, N. Y.—"I am a farmer, 74 years of age, and not into a weak, rundown condition as a result of my grippe. Our druggist suggested Vinol to build me up, and I noticed an improvement soon after taking it, and it has restored my strength so I can now do a good day's work. My wife has also taken Vinol for a rundown condition with splendid results."—H. W. Lester.

The reason Vinol is so efficient in building up strength for weakened, feeble, old people is because it contains beef and cod liver peptones, iron and manganese peptones and glycerophosphates, the most successful tonics known.

We wish every person in London who is suffering from a weakened, rundown, debilitated condition would try Vinol on our guarantee to return their money if it fails to benefit.

Taylor Drug Company, London; also at the best druggists in all Ontario towns.

## WILL INVESTIGATE STORY OF CONFESSED WITNESS

Philadelphia Police Sending Officer to Examine Man Who Saw Model Killed.

PHILADELPHIA, Feb. 15.—After receiving a detailed statement said to have been made by Frederick J. Farrell, who surrendered himself to the Montreal authorities with the declaration that he was present when Mazie Colbert, the advertising art model, was killed in her apartment here last December, Captain of Detectives Tate today decided to send one of his men to Canada to personally examine Farrell.

Tate said that while Farrell's statement agrees in a measure with the description of the apartment of the slain girl, he has no opinion to express as to Farrell's connection with the case.

## AGAINST CONFISCATION

German Opposed To It, Says Zimmermann, in Interview.

BERLIN, Feb. 14.—via London, Feb. 15.—Foreign Secretary Zimmermann, in an informal discussion today with the correspondent of the Associated Press, explained the amended version of the American-Prussian treaty of 1905, which Germany is now submitting through the Swiss Government for the approval of the United States. Herr Zimmermann declared that the internment of civilians and the confiscation of private property were preposterous steps to which his Government was unalterably opposed.

## IT'S CRIME NOW

WASHINGTON, Feb. 15.—The Senate today adopted a drastic amendment to the postal bill, making it a

## MISSING AMERICANS SLAIN BY MEXICANS

Taken 'Cross Border and Shot—Bodies Are Discovered.

HACHITA, New Mexico, Feb. 15.—Three bodies identified as those of Andrew P. Peterson, Hugh Accord and Burton Jensen, were found late today by Lem Spillbury, former scout with General Pershing, one mile west of the Mexican border.

From what he could learn the Mormon scout said he was convinced that the three murdered men had been taken into Mexico from American soil by Mexican raiders and then killed.

## SLAYS OWN BROTHER IN DRUNKEN FIGHT

CORNWALL, Ont., Feb. 15.—Levi Luck, of Moore's Creek, was shot and instantly killed with a shotgun in the hands of his brother Henry last night during a quarrel. Henry Luck, who is being held by the authorities, said both he and Levi were drunk at the time. Levi was attempting to kill his brother when the gun was accidentally discharged and the top of Levi's head was blown off. Becoming frightened after the tragedy, Henry dragged his brother's body downstairs in the cellar, where he covered it with drapery boxes. Later he confessed to an officer what had happened.

Levi Luck was mentally deranged for some years, and spent considerable time in an insane asylum.

# Kept Fit Through Two Wars

Ontario Sapper Praises Dr. Cassell's Tablets.

That a soldier should use and praise them, Dr. Cassell's Tablets is clear proof of the wonderful sustaining power of this great strength-giving medicine. And thousands of service men on and sea are trusting to Dr. Cassell's Tablets to sustain them through all the hardships of relentless war.

**SAPPER, A. HARTLEY**
