Distribution in London of a little folder issued by the temperance referendum committee entitled "The Beer of the Ballot," which explains reasons for voting "No" to the second question on the ballot paper, will commence early next week.

The pamphlet explains the part of the ballot which contains a question regarding the sale of beer described as follows:

"Light beer containing not the second with the district court-martial heid session at Wolseley Barracks this morning for the purpose of Tries of Type of the purpose of Tries of Tries of Tries of No. 1 District Court-martial heid session at Wolseley Barracks this morning for the purpose of Tries of Tries of No. 1 District Depot on the charge of desertion. The prisoner pleaded guilty, and sentence will be promulgated in the course of a few days. It was revealed that Fitchett had deserted three times since his enlistment in the 136th Battalion, but he was tried for the latest offence only this morning.

ot beer' as can be derived from two drinks of straight whiskey, containing 11-3 ounces, only the beer leaves a worse kind of drunk," the pamphlet states.

'This campaign for stronger beer freally poorer beer), is conducted largery by the brewers," the pamphlet reads, "who seek to profit by the increased consumption, which will result from supplying beer that will intoxicate. The alcohol of beer and the alcohol of whiskey are identical. Whiskey drinking is dangerous because of the alcohol poison which whiskey contains. Beer drinking is dangerous for the same reason."

Another paragraph in the folder declares that the alcohol appetite is caused by alcohol, and will be developed whether a small quantity of liquor be drunk containings much alcohol, as in spirits, or a large quantity of liquor be drunk containing less alcohol, as in beer.

The four questions on the ballot are tubbreviated and appear as foliows on an imitation ballot placed at the bottom of the folder:

In consequence of continued drought the condition of grain crops in Sask-atchewan and Alberta at the end of July was worse by 8 to 19 points than at the end of June. Thus the condition of wheat in Saskatchewan on July 31 was 73 per cent of the decennial average as against 91 per cent on June 30. In Alberta the July percentage for wheat was 70 as compared with 80 in June. In Manitoba wheat, owing to a general outbreak of rust has deteriorated by 8 points, so that the condition is expressed by 92 per cent or 8 below average as compared with 100 or the promise of an average yield a month ago.

BRITISH RAILWAYMEN DEMAND IMMEDIATE SETTLEMENT OF ISSUE

Entire System of Country Liable To Be Disorganized Unless Dispute Is Adjusted.

London, Aug. 15.—The demand made by locomotive engineers and firemen upon Sir Auckland Geddes, British minby locomotive engineers and firemen upon Sir Auckland Geddes, British minister of reconstruction, that their wage dispute be settled at once, is the result of a long-standing disagreement, and threatens, unless a settlement, is reached, to disorganize the railway system of the whole country. After conferences with the board of trade yesterday, Sir Auckland discussed the matter with the cabinet. The meetings will be resumed today.

The resumption of work by the striking miners in the Yorkshire district is still hanging fire, the West Yorkshire section refusing to fall into line and haggling over minor claims.

At a meeting of the labor leaders of all the port trade unions at Liverpool last night, it was unanimously decided there should be a general stoppage of all work for three days, commencing next Wednesday to secure the reinstatement of policemen who were dismissed prior to and during the recent policemen's strike in that city.

STRIKE IS AVERTED.

London, Aug. 15.—The threatened strike of locomotive engineers and firemen, which would have disorganized the railway system of the whole country, has been averted for the week-end. The executive committee of the engineers and firemen today received from Sir Auckland Geddes, minister of reconstruction, a communication regretting it was impossible to arrange a meeting today to consider the wage questions Sir Auckland promised to communicate to the men on Monday a new offer which the Government is preparing.

THE VALUE OF CHARCOAL Few People Know How Useful It Is in

Preserving Health and Beauty.

Nearly everybody knows that char-coal is the safest and most efficient dis-infectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, and after eating onlons and other odorous vegetables. Charcoal effectually clears and

proves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic. It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarth.
