The suggestion that sittings should be held outside the capital came from G. L. Geary, corporation counsel for Toronto. "I am of the opinion," remarked Chief Commissioner Carvell, "that sittings held outside the capital are only wasted time; but I know what the feeling is, and we shall bow to it."

The chairman had previously remarked that the case was very similar to the recent rates inquiry, inasmuch as the chief question involved was one of principle and the board had refused to leave Ottawa in connection with that hearing.

DRUGLESS HEALERS TO DISCUSS ORDER

May Urge Legislature to Pass Bill Recognizing Them.

Discussion of the recent board of health order quarantining all drugless healers who attend cases of contagious disease will be one of the principal features of the Drugless Physicians' Association convention at Hyman Hall on Thursday.

The order was strongly denounced when it was first issued. Locally no case arose to which it applied, and the discussion regarding it died down. The convention, however, will revive it, and may discuss ways and means of combating it, if occasion arises.

The possibility of introducing a bill in the Provincial Legislature to recognize drugless healers and to license them will be discussed.

Only members of the association will be admitted to the first part of the meeting, from 1 p.m. to 2:30. After that hour it will be open to all drugless practitioners. There will be a general discussion on matters pertaining to the profession W. C. Schulze, M.D.

NOT IN FAVOR OF

Requiring hucksters to have a cer-tificate showing that they are free from contagious diseases before being al-lowed to sell goods on the local marlowed to sell goods on the local market, is not a necessary measure in the opinion of Dr. W. S. Downham, M.O.H.. Measures of this kind are being considered by some American cities.

"There is absolutely no need for such a measure in view of the information gained on contagious diseases in recent years," he said. "It is recognized by the medical profession now that contagion is communicated by direct contact with an affected person and not by contact with something the infected person has touched. Even supposing there were germs on the vegetables and fruits bought at the market there would be little chance of harm resulting from them. Most of the articles purchased are cooked before they are consumed, and that would destroy all the germs."
