As you read the following, remember : All enormous American fortunes have been made through the rise and fall of the stock market ; after each fall of billions, the market goes up billions ; to make millions in every rise and every fall all that is necessary is the training to know when to buy and when to sell, and possession of the machinery to buy and sell. Remember this as you read and—that some of us have the training. AT L'AST.

To the American People :

If ever in the past I have earned consideration for truths told and warnings flown, I now demand for the statements that follow your best thought and closest heed. This is the first of three advertisements displayed to-day in like space in the great newspapers of the world, and to be repeated to-morrow and the day after in like space in the same publications. I have never written, shall never write, anything of graver import to you and to morel to myself.

written, shall never write, anything of graver import to you and to myself. I purpose to set down your actual financial condition : The underlying moves by which you have been cornered, what your position means to you, and the inevitable consequences ahead. My facts are too stern for breakfast-food smoothness. You must take straight, strong, man-fashion talk if you would get good from what I have got to offer. These three advertisements are preliminary to a fourth, in which I shall put before you a proposition radical as an air-ship, though sound as a diver's bell ; but to grip its tremendous potency you must follow and digest the A B C's of my argument. The situation : First—The reign of Roosevelt is over. His eat-em-alive teeth have been drawn by the system's expert, pain-less dentistry. His papier mache battering ram, which made echo for his war whoops, has crumpled up against the hard, yellow metal bulwarks of the dollar hordes. The muckrakers, having laid down their tools, are busy enamelling the glossy surfaces which they scratched. The daily papers bulge with accounts of the charities dispensed by Morgan and Rockefeller, with the people's money ; the weeklies print the photographs of these financial guardian angels, and throughout the land resounds the trusts' new slogan : "Let us alone."

trusts' new slogan : "Let us alone." True, certain of the System's petty officers are in jail, a few score intermediaries have committed suicide, and the System has been deprived of the services of some of those "higher ups" who prefer the European climate ; but the System, banks and trust companies have been fumigated, the Standard Oils, Steel trusts and Union Pacifics have been revarnished, the System having furbished up its old tools sees its opportunity again at hand, and is ready to set have its old business.

up its old tools sees its opportunity again at hand, and is ready to get back to its old business. I know the workings of the System. I have complete knowi-edge of the methods by which during the past 50 years the Sys-tem masters have appropriated to themselves the billions that belong to the people, the same methods by which they now purpose to annex the people's earnings in 1908. I know how, by the use of this stolen wealth, they have acquired authority to such a de-

First—That panics which wreck System-opposed banks, trust companies, railroads and industries, wiping out in a day the peo-ple's savings of years, can be and are produced at the will of a

Second—That Presidents can be, and are, forced upon the people at the bidding of the System. Third—That Senate, Congress and courts can be and are tricked and corrupted into legally compelling the people to bend their necks for each additional burden.

their necks for each additional burden. Fourth—That the price of the necessities and luxuries of the people can be, and are, made and controlled by direct and in-direct System-made taxation, amounting to billions of dollars an-nually, which billions go to swell the fortunes of those few whose only right to this wealth is their ability, by the use of these for-tunes, to compel the people to do the System's bidding.

My opportunity: Realizing the power of the System, the means through which it had been attained, and how it is even now being employed, I know it would be frivolous for me to come before the people and

request them, in any ordinary way, to help me destroy the System. Years ago I began to marshal my plans, and, single-handed, I have hewn to the lines of them. Now inside the System's camp, now outside, in the courts and Legislatures, then shoulder to shoulder with the head of the Government, in the press, in maga-times and in books sometimes anorarchity losing ground I have made constant headway, until at last I have reached my objective I have waited until men could see for themselves that these financial potentates upon whom they looked as the great person-ages of the land were the meanest of thieves; that they daily committed crimes worse than those I laid at their doors years ago, when the world exclaimed upon reading them, "He must be crazy," and that the mighty power they possessed was superior to the will of the people, and overrode the law, institututions and government of our country. For years I have manoeuvred for the position which is mine fo-day. In that time the System has by all the ingenious, unscru-pulous tricks of which it is the master, and through all the devi-ous, powerful agencies which are at its call, to discredit and crush me. At the cost of millions to itself it has faished my predictictions (as in Yukon), causing enormous temporary losses to my friends and bringing down bitter criticism upon myself. I am now ready with the instrument, by the direction of which, first, American people will come into the billions of savings, out of

which they have been plundered during the past half century by that adroit, monkey-conscienced, all-powerful few whom I have lantern-slided to the world as the System. Second—Such robberies will be rendered impossible for the

future. Third—There will be wrested from Wall Street and the System vast sums annually during the coming years. Fourth—These millions will go to the people from whom they have been stolen by Wall Street and the System. Fifth—Every man and woman possessed of a single dollar can turn it first into \$2, then into \$10, and every man and woman with \$100 can turn it first into \$200 and then into \$1,000. This will be made as plain that all will are and understand will be made so plain that all will see and understand.

In the accomplishment of these things this instrument will become the most powerful financial engine in the world. It will make and unmake at will the prices of 70 billions of stocks and bonds, which to-day represent the practical owner-

ship of the nation.

It will become a power in politics until scheming l'residents, mercenary Senates, venal Congresses, grasping Rockefellers, un-scrupulous Harrimans, and arrogant Morgans will be made by it

abject servants of the people. All this sounds like a tale from the Arabian Nights, but those who read must bear in mind that it is put out by a sane man who respects the opinion of his friends, and acid-tests those

man who respects the opinion of his friends, and acid-tests those of his critics; by a business man who knows the value of the the \$150,000 which it costs to print these advertisements—by a man who is not a dreamer, but a doer. My own equipment : In demanding the attention of the American people to this series of advertisements, it is necessary for me to justify my own. capacity as the right agent for the work. I desire, therefore, to point to the fulfillment of scores of startling, and, at the time they were published, apparently absurd predictions, and to the accomplishment of many seeming impossibilities in finance. First—I am the only man who has publicly and world-widely advised and predicted in finance, who has lived and remained

First—I am the only man who has publicly and world-widely advised and predicted in finance, who has lived and remained solvent long enough to point to the fulfillment of his predictions. In my time three generations have come to Wall Street, and two have gone from it, and yet in the last year, my 39th in finance, I paid to the press more money for advertising than any financial advertiser ever paid in his lifetime. The amount of money paid to the press by an established and continuous advertiser is the best, evidence of the soundness of his published advice. Second—I have made mistakes, but I have piloted the public into hundreds of millions of dollars of profits. Third—For almost forty years I have been active in the financial game, during the last twenty of which, while playing for position with an eye to the day for launching my remedy, I have played hob with Wall Street, the System and the financial powers, producing bull panics, and during that time, although op-posed by the greatest power in finance, I have succeeded in selling to the public more dollars' worth of stock than any other man or group of men.

group of men.

Fourth-In that long time I have never once been cornered by Fourth—In that long time I have never once been cornered by Wall Street, the System or anyone. On the contrary, I have made for myself accres of millions of dollars, and attached to myself a personal stock market following of hundreds of thous-ands of responsible and intelligent people located in all parts of the world. Fifth—My last advertising campaign (Yukon gold), only four days long, although opposed by the powers of Wall Street and the System, culminated in a whirl which monopolized the entire machinery of Wall Street, State Street and other financial centres, and resulted in a volume of stock dealings which broke all financial records.

all financial records.

Sixth—At the end of forty years' bitter warfare in Wall and State Streets, I am now more closely associated with the direc-tors of finance, business and industry than ever before, not because they want me, but because they need my help. Seventh—In all my forty years' work I have told the public

on myself, my associates or the System. There is enough here to justify me in demanding that every American who wishes to better his condition and make life more

American who wisnes to better his condition and make life more attractive to himself and those depending on him, should follow with the closest attention the argument set forth in these ad-vertisements. Then, I ask only that he study my instrument, and, if satisfied, that he then take boldly into his own hands the means

which will give him his just share of the vast wealth, out of which he has long been defrauded, of the richest and most pro-ductive land the world has ever known.

Mind you, my fourth-last-advertisement will contain the most astounding proposition ever made by a sane and responsible

THOMAS W. LAWSON

What I believed was for their interest, regardless of its effect.

Boston, August 10, 1908. This advertisement will be continued here to-morrow. After you have read the above, and while waiting for the next chapter, remember : The most terrific bull market the world has ever seen is now on the ways ; when it is ready to culminate all good stocks will have doubled their present values ; one particular stock will have multiplied its value twenty times.
