The present critical state of Europeum affairs will render these publications unusually interesting during the forthcoming year. They will occupy a middle ground between the hasaily written news-item, crude speculations, and flying rumors of the future historian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals read, rs must look for the only really intelligible and reliable history of current events, and as such, in addition to their well-established literary, scientific, and theolygical character, we urge them upon the consideration of the reading public.
