SOMETHING FOR NOTHING!

Presents before Christmas.

Now by spending your cash with us, you will be rewarded by receiving handsome and useful presents, according to the amount of your purchases.

That is to say when you have purchased and paid cash for any of the sums given below, you will receive the present set opposite that sum.

- \$ 5 00, A Handsome Napkin Ring, 10 00, Handsome Pickle Stand, 15 00, Handsome Picture, 21 25, 3 in. Gilt Frame, 25 00, Baby Glass Water Set, 30 00, Silver Plated & Latticed Caster, 40 00, Handsome Platform Locker, 50 00, China Tea Set, 41 pieces, Gold Finish, 75 00, Polished Quarter Oak Centre Table, 100 00, Handsome Plain Easy Chair, 125 00, Handsome Antique Chamber Suite, 7 pieces, 200 00, Silver Tiling for Picture and Stair, 300 00 Silver Service, 45 00.

Please notice carefully that there is no chance of work or deception about this offer. It is a genuine bid for your cash trade, which you will find it profitable to consider.

J. G. McNally.

150 QUEEN STREET ESTABLISHED, 1850, 150 QUEEN STREET

JAMES R. HOWIE, PRACTICAL TAILOR, Has a Splendid Stock of Impored and Native Cloths.

A SPECIAL NOVELTY, In Trouserings of French Make, and a splendidly finished Silk Mixture, soft and fine, and smooth as satin.

BOYS' CLOTHING, In a model for the day, but seriously, every suit is stylish, durable, and cheap.

MY OLD STAND, 150 QUEEN STREET.

300 Qtls. CODFISH, 200 Half bbls. HERRING, 500 Packages MOLASSES,

Hhds., Tierces and Barrels FOR SALE LOW.

A. F. RANDOLPH & SONS.

"IMPERIAL HALL," JUST RECEIVED!

A Fine Line of English, Scotch, Irish and German Suitings, which will be made up at the lowest prices.

THOMAS STANGER, 280 QUEEN STREET.

Feathers, Flowers, Laces Trimmings, etc

All the Latest Spring BONNETS MADE TO ORDER

228 QUEEN STREET.

CAUTION. EACH PLUG OF THE MYRTLE NAVY! IS MARKED

T. & B. IN BRONZE LETTERS. NONE OTHER GENUINE.

AGRICULTURE

Notes and Suggestions of Practical Utility FOR THE FARM, FIELD, GARDEN AND DAIRY.

Cleanings of Interest for Our Country Reader.

Do not trust the picking and storing of the winter apples to those who have had no experience in such work.

A good schoolhouse helps the children, helps the teacher, helps the community, improves the value of property around it, raises the reputation of the people and does good in many ways.

Lots of good, dry stove wood makes good natured housewives. They will show their appreciation in well prepared meals and by having them always on time.

Farms, Stock and Home-says. There should be more cotton sheets, shirts, jackets, jumpers, dresses, drawers, blankets, bags, hose and handkerchiefs in the world, and less cry about "over-production" of cotton.

It is said that molasses will remove the grass stains so often found on the summer clothing of children. Rub the molasses as if it were soap on the stained places, and then wash the garment in the ordinary way.

Manual labor is the inevitable lot of a large majority of our people; hence general and permanent national prosperity is assured only when those people are enabled to make a fair self profit on the products of their labor.

It is stated that the main railway station, within the World's Fair grounds, where all excursion trains will discharge their passengers, will be a handsome structure costing \$225,000, and will accommodate 25,000 persons at one time.

Water is the great solvent of plant food and medium of conveyance to the feeding roots of the plant. It is also the great solvent of the sap which circulates through the plant, carrying its nutrients to the parts where needed.

It is stated that by spraying the vines and trees with London purple, not only is the codling moth larva destroyed, but also the canker worm, spiny worm and three species of leaf rollers, a single spraying having its effect upon all of them.

It is a general impression among those not familiar with botanical gardening that the trunks of trees lengthen, but this is not the case, the trunk of a tree, being once formed, does not lengthen a fraction, no matter if it is a hundred years old.

Spreads growing up from the roots of trees take nourishment that should go to the tree. The sprouts are really weeds, and should be removed to give even an inch of space between them not only injures the tree but renders them unmanageable.

Rev. Joseph Cook, in a recent speech at Tremont Temple, Boston, attracted much attention by saying that "2,000 capitalists own more than all the other 65,000,000 of their population, and that 250,000 rich men control 75 per cent of the national wealth."

In the general scarcity of fruits this year we find now and then an orchardist who is reaping a rich harvest by having a good crop to sell at the prevailing high prices.

The general scarcity of fruits this year we find now and then an orchardist who is reaping a rich harvest by having a good crop to sell at the prevailing high prices.

As one remembers, it is a common practice among the farmers to carry back from the cheese factory why in the cans that they had carried the milk in, and unless the farmer uses every effort to thoroughly clean his cans, the effects upon the milk will be equally noticed in the cheese product.

Nights and morning's should not be mixed in the same can, unless the morning's milk is thoroughly cooled by aeration before mixing with the night's milk. Consequently it would be necessary for those who do the milking to get up an hour earlier in the morning, which every farmer knows is no easy matter.

We are reminded every now and then about the unusual milkman or milkmaid, who draws extra lactated fluid from the cows, if he does not draw some from that eyes. One man is not to set the best milk he ever had was a very musical fellow. He used to sing, but he had a different tune for every cow. Now, we are told, if he should have changed his tune and sung Old Hundred to Yankee Doodle cow, you see the motion of his hands would have been slower; the milking would have been different, the cow would not have given so much milk, and it would not have been as good. And this is in accord with the most modern teaching: When will the time come that every dairyman will employ a band of music as well as a Babcock tester?

We must have healthy cows if we have wholesome milk. If the cow is diseased it affects the character of her milk and every mother who nurses her child knows that her health is reflected in the milk. The important factor which should be studied by all dairymen is the health of the cow. If the cow is not free from disease, care of the utensils will not prevent the germs of disease from entering the body through the milk which we use. Eighty-seven per cent of the milk is water, which shows the necessity of providing an abundance for the cows, and it should always be pure and wholesome. Water from a stagnant pool, or well which gets the seepage from decay and filth, may be lurking within it a position that, conveyed to the milk, finds its victim in the human family. It is through this source that typhoid fever has been known to have its origin.

The Sheep Fold. On many a farm where money is scarce, more stock could be kept, and why should it not be sheep? If the owner is too busy, let

him start his son and daughter or both together with a high-bred nucleus of a flock. It may be the measure turning their attention to the brighter probabilities of farming and keeping them on the farm. I say girls as well as boys, for the care of sheep is admirably adapted to women and girls—much more so than the feeding and management of poultry. The work is not more heavy, it requires more activity, like pasture walks in the sunshine and air, and contact with sheep is in itself healthful. The sympathy and tenderness natural to the feminine heart are precisely what tend to the prosperity of sheep, and especially of young lambs. The shearing and stable cleaning, necessary but twice a year, are jobs which can easily be done by hired help. There is no reason why the care of sheep should not prove a highly remunerative and pleasant field for the enterprise of ambitious young women of the period who see the ranks of workers in the trades and professions full and underpaid, and yet desire to be independent. Try it girls; try it boys. Learn how to make sheep trouble the capital invested in one year.

As to the profit in sheep, a correspondent of the Rural New Yorker says: Money at compound interest will double itself monthly more quickly than at simple interest. A note drawing interest semi-annually, quarterly or monthly is more productive than one on which interest is paid annually, because the interest itself can be deposited to the holder's credit and begin to bear interest itself. The same rule applies to a flock of sheep. Ewes that give a lamb or two every year or twice per year, and give a heavy stable fleece are annually paying three dividends that help a farmer up the financial scale amazingly, to say nothing of the mechanical and manual advantage sheep are to any farm. It is surprising that kind of stock and live in the savings banks at 3 1/2 to 5 per cent. Compound interest at eight per cent is not to be compared with sheep well managed. But the profits are meager and the possibilities limited because it is impracticable to herd large numbers of fowls together and have them in the winter, because the maintenance and multiplicity of detail make it impossible to care for many without hind help and this usually destroys the chances of success, because of the expense and the failure of hired hands to take up an owner's interest in them. With sheep the owner is usually different and the profit is usually one man with proper facilities should not be able to care fully for at least 500 of these interesting, interest-bearing and woolly-headed creatures.

Winter Evenings. There are two very strong phases in the farmer's life—the summer and the winter, linked together by the two intermediate periods of spring and autumn, both of quite uncertain length. But need-time and harvest come with unusual certainty, varying but little as to date. The active outdoor season is followed by a comparatively inactive indoor season, which permits of considerable leisure and social intercourse—especially during the long evenings. Beside from the common farm duties, how can this season of comparative leisure and social enjoyment be better spent than in a family circle, or shall it be devoted to a series of neighborly meetings and entertainments? In either case, how can the time be most profitably spent? Mere entertainment ends in a social advancement in knowledge, though there may be a goodly development of social and neighborly feeling, almost as valuable as the acquisition of useful knowledge; but if amusement and social entertainment can be combined with the acquisition of knowledge and intellectual advancement, there is a double gain that will prove of great value in coming years. It is not necessary that the gatherings should be large, but that they should be frequent and active. There are many ways of spending the time. In the family circle, may be readings, recitations, competitions on topics of interest, and various things which should have improvement as well as entertainment for their object. The same are available for larger meetings, at the district school, house or village church, the delivery of speeches, reading of papers, discussions of topics of interest, and various things which may suggest themselves, are available as exercises. If musical talent is possessed, this source of entertainment should not be neglected in any case. Thus, by a little reflection and arranging of forces, country people need not suffer from, in comparison with the city, for any of the best elements of social and intellectual development.

Walking Catechism.—Now, tell me children, if there were ten little birds on a tree, and a naughty boy should fire at them with a gun and kill five, how many would there be left? Ah, you hesitate. There would be five, wouldn't there. Chorus—No, sir, there wouldn't be any; the other five would fly away.

Wife.—Oh, George, the water pipe is leaking and the water is spilling the new hall carpet. Go and get a plumber quick! Husband.—That's all right, my dear, let go, it's cheaper to get a new carpet.

The play last night wasn't realistic enough for me. What was the trouble. You know that chap that was killed in the third act? Yes. Well, I saw him on the street this morning!

The man who believes most sincerely in the efficacy of prayer is the man who never prays for what he has never worked for.

ANECDOTES, HAPPENINGS AND GENERAL COMMENTS

Clipped and Condensed for the Readers of The Globe.

Then Outspoke a Bachelor. They were very pretty and there was apparently about five or six years' difference in their ages. As the train pulled up at Remy, the younger girl blushed, flattened her nose prettily against the window, and drew back in joyous smiles as a young man came dashing into the car, shook hands tenderly and cordially, insisted on carrying her valise, magazines, paper bundle, and would probably have carried her had she let him.

The passengers smiled as she left, and the bachelors went ripling through the coach. "They're engaged."

The other girl sat looking nervously out of the window, and once or twice gathered her parcels together, as though she would leave the car, yet seemed to be expiring some one. At last he came. He heaved into the door a lesson on fire, looked along the seats until his manly gaze fell upon the upturned, expectant face, roared: "Come on! I've been waiting for you on the platform for fifteen minutes," grabbed her basket and strode out of the car, while she followed with a little valise, a handbag, a paper bag full of preserves, a bird cage, a glass jar of jelly preserves and an extra.

And a crusty-looking old bachelor in the further end of the car croaked out, in union with the indignant looks of the passengers. "They're married."

TERRIBLE DISASTER

MAINE PULP MILL DIGESTER EXPLODES, FATALITIES REPORTED.

A digester in the pulp mill at Orono blew up on the 20th inst. The building was completely shattered and ten bodies buried in the ruins.

The digester in the pulp mill at Orono, here, without any apparent cause, the other day, having been inspected two weeks ago, and found to be in good condition, exploded on the 20th inst. SENSATION EXPLODED

DETECTIVE STORY ON BORDEN CASE PICKED TO PIECES.

Declared a Tissue of Falsehoods

Interviews Which Clear Lizzie's Name From a Base Scandal.

The Boston Post the other morning characterizes the article in the Boston Globe concerning the new developments in the Borden case as a "colossal fake." It says that when the facts of the case are made public, there will be the biggest kind of a laugh on the Globe and its reporter. The following is a special to The Post from Fall River:

The defense is perfectly calm in the face of the startling story published in a Boston paper in relation to the Borden murder mystery, and with regard to its bearing upon the guilt of their client, but very indignant when discussing the motive for its publication, and searching for grains of truth through the fourteen columns of alleged affidavits.

The story with its terrible array of minute details carried conviction with it. After a full day's winnowing of these affidavits, it is looked upon as the most remarkable fabrication that has ever built for a newspaper.

THERE IS ONLY ONE THEORY

under which it may yet appeal for credence, and that is that the very details which gave it weight, the names and residences of the witnesses, are all fictitious, all save Mr. and Mrs. McHenry.

It is well authenticated that the story was given out by Detective McHenry. There are those who say, and are also ready to make affidavits, that this story was offered to the Boston Herald some weeks ago for the sum of just \$150 by McHenry, and the offer was not accepted. It was again offered to the Fall River Globe, but the price was too high.

The argument offered everywhere against it being a fake out of the whole cloth is that it is beyond credence that such a story could be concocted, and especially that it could be given publicity by a newspaper of to-day unless it was at least based on truth. Certain it is, however, that no one of the really important witnesses can be found, and the others deny or refuse to affirm of it. Many whose residences were given here can be found to have no existence in Fall River.

More than that, of the facts and circumstances cited, nearly all can be

clearly shown to be false.

In the first place, Emma Borden says she does not know any such people as the Chace, who were such close friends of the family that they were admitted by the back door, and standing in the stairs overhead old man Borden charge his daughter with her shame and the daughter's reply. She does not know such a person as George Sison, who was so close a friend that he attended the funeral and heard Lizzie Borden say "Bridge" who she did not name her place for silence.

Furthermore she says Lizzie is not sick; is not in a condition to bring shame upon herself and her parents. The proofs of this, she says were found in the cellar by the officers themselves during their search, and she has further proofs secured since Lizzie has been confined to the Taunton jail.

Dr. Bowen, the family physician, who was a witness for the defense, and Dr. Dolan, the medical examiner, who was a witness for the prosecution, both corroborated this statement that Lizzie Borden

IS NOT IN THE DELICATE HEALTH

that it is alleged offered the motive of the terrible crime. This would seem to answer the very core of the whole matter.

Fictitious names and residences, say some, have been given by the authors of this story or stories for the purpose of making them inaccessible to the defense, in order that they may not exert their influence upon them to the overthrow of justice. In such case it seems strange that any names or residences should be given at all, for certainly the fact that they are specified as directly as a part of a calm statement of fact, and that upon investigation none of the really important ones can be found, casts a cloud upon the whole. The facts stated also need considerable engineering to twist them into a semblance of consistency.

A THOROUGHLY ANGRY MAN

was Mr. Jennings last night. He awoke yesterday morning and was astonished at the flood of accusation involving the personal honor of his client. He began to investigate. He spent as much of the day as he could spare in this research, and last evening he issued an authoritative bulletin upon his signature, branding the story in the Boston Globe as false, and an infamous attempt to injure the public mind against Miss Bowles, and bolster up the government theory of her guilt.

OTHER NEWS-PAPERS SPEAK

The Herald says that the Bowles sensation is riddled with holes and shoves to be based on falsehoods. Editorial sallies are treated by John V. Morse. Public sympathy has been aroused for the accused and the story is considered as an act of persecution.

The Journal denounces the story as a fake, pure and simple.

The Globe admits that Detective McHenry furnished the story, and that it has been proven wrong in many particulars, especially as to Lizzie's alleged physical condition. It declares, however, that the weight of evidence favors the main facts as true.

ADVERTISE IN THIS PAPER
