1905—Howard Morrow knocked out Bert Fagan in 7th round at Los Angeles.

1906—Young Brown knocked out Jimmy Allen in 4th round at New York.

WORLD'S CHAMPION
WOMAN WRESTLER

A great many women, like members of the sterner sex, take greatly to athletic exercises, and in the States and Western Canada the women go in for athletics a great deal more than in the east. In Eastern Canada skating, and snowshoeing in the winter, and in the summer months, tennis, swimming or canoeing appear to be about the only part of athletics that the fair sex enjoy. It is different in the larger cities, for there they enter a fencing school, play basketball and a fad that is becoming very popular throughout the United States is wrestling. It is claimed that in wrestling there is no better exercise, and many women who have taken up the work on the mat are becoming very strong and scientific, their muscles develop and they improve in health.

The above picture shows Miss Cora Livingston, the world's champion woman wrestler, who is posing for her picture with her wrestling partner, Nellie Lewis, a sister of Harry Lewis, a professional wrestler. Miss Livingston captured the world's championship in Kansas City some time ago, when she defeated Miss Laura Bennett. She has toured the United States and Upper Canada, meeting all comers, and thousands of people who have seen the champion wrestle state that she is indeed very clever. When Miss Livingston is not traveling and giving exhibitions, she is teaching a large class of young women in wrestling.

Sam Anderson, the middleweight champion wrestler of the world, was in the city yesterday morning and stated that Miss Livingston, with Miss Lewis and a company of wrestlers intended touring the east and is now booked to appear in Montreal and a number of towns in Nova Scotia; and would, perhaps, go to Prince Edward Island and Cape Breton. The company has been touring the States extensively during the past winter, and greeted with crowded houses, as the fact of having women wrestling is quite a novelty.

Mr. Anderson left for Montreal yesterday morning to complete arrangements for the company which will open their eastern tour in the railway town. He said that if possible he would come to St. John on Monday to be present at the wrestling exhibition to be held in the Queen's Ring.

Anderson is the wrestling instructor in Harvard College, Cambridge Mass., and has a large class of students. Wrestling is taught in many of the clubs throughout the States, including the Y. M. C. A., where it is part of the regular gymnasium instruction.

When told that Dan McDonald, the champion amateur wrestler, was thinking of starting a class in St. John Champion Anderson spoke highly of McDonald as a wrestler, and said that no doubt a large number of young men would join the class.

Experts to Decide What is an Amateur? — Stahl 33 Years Old Tomorrow.

Experts in athletic matters from all over the globe will soon assemble at Lausanne, Switzerland, for the conference of the International Olympic committee, and one of the questions they will discuss is, "What is an amateur?"

It is a subject offering a lot of room for discussion, and about which there is more than a little difference of opinion, and much poppycock. To the mere layman, some of the present fine distinctions and demarcations between the amateur and the professional seem overdrawn and visionary. Packey McFarland shouldn't be permitted to enter boxing tournaments, but if he wants to pay checkers or tennis, or run a foot race as an amateur, why shouldn't he? By the same token, one J. Thorpe, winner of the pentathlon and decathlon in the Olympics, should not be disqualified just because he had played baseball for money. According to present definitions, Christy Mathewson, by reason of earning a living in the way for which he is best qualified, couldn't play tiddie-twinkles or "athletics" as an amateur. To the lay mind, the distinction between persons is but an evidence that those who control amateur athletics are still wedded to the snobbish theory that amateur and gentleman and anonymous, and that a gentleman is a person who doesn't work for a living, but lives on an income, or "spongers" on "dad." Of course, this theory is not now carried out to its logical conclusion. A policeman or a person may be an amateur, and the fact that they spend a host or preach of a living does not affect their standing. Why, then, the discrimination against those engaged in professional sports? Why can't a professional baseball player be an amateur boxer, or vice versa? Do the athletic authorities consider professionals as low-browed and vulgar persons who might contaminate the refined and delicately nurtured young men from the colleges and athletic clubs? Or what? The present definition of an amateur is filled with contradictions and outworn prejudices. Moreover, it is a matter of general knowledge that the amateur code is not lived up to in any country. The United States is the worst offender, because it has the most amateur athletes, but proportionately, it is probably no worse than any other country, England probably excludes amateur

World's Champions Leader.

Gariand Jacob Stahl, who piloted the Boston Red Sox to the goal of a world's championship, will pass his 33rd milestone this Sunday. "Jake" is a native Hoosier, born in Elkhart, Ind., April 13, 1880. He was educated at the University of Illinois, where he was famed as a football player. He first came into prominence in 1904 when as manager of the Washington team, he succeeded in arousing the Senators from their lethargy for a brief period, during which they made a phenomenal sport pennantward. For this feat, certainly a remarkable one, Stahl was nicknamed "the born leader." In 1908 Stahl played with the New York Americans, covering left garden for a team that finished in the cellar, going back to Boston, where he had started his big league career, Stahl rapidly came to the front, and landed his team a winner last year. Stahl had little part in building up the Red Sox machine. When he became manager he found a good aggregation of raw material

rules better than any other country, but it is not in a condition to throw stones. France is notoriously lax and Germany little better.

FASHION says "larger ties and room to show them."

The "REGINA" is a new model from London.

As you see, it has ample space to show the larger ties.

"WATROUS" is the same style but slightly higher.

al ready to his hand, and his job consisted in welding it together and turning out the finished product—a championally team. Whether Stahl can repeat is doubtful, in the opinion of most fans, for that old fox, Connie Mack, is still on the job and the Athletics are hungry for another slice of world's series coin.

That able young exponent of the art and science of flintcuts, Mister Thomas Murphy, will celebrate his 28th birthday today. Tommy is a native of New York city, and began boxing at the age of 15. In his early battles he was paid all the way from a dollar to five dollars for his services, and was a glass worker between bouts. His real professional career commenced ten years ago, and since then he has taken part in about 175 bouts. Murphy has had a lot of tough luck in his career. In his early days in the game he had Terrible Terry McGovern all but whipped, when Terry landed one that put the Harlowe kid to sleep. Tommy has shown best in long fights whipping Owen Moran in 20 rounds, giving McFarland a hard tussle over the same route, and recently getting a 20 round draw with Al Volgas.

The Goodyear Tire & Rubber Co. of Canada

Head Office, TORONTO. Limited. Factory, Bowmanville

Branches at Victoria, Vancouver, Edmonton, Calgary, Regina, Winnipeg, Hamilton, London, Toronto, Montreal, St. John

83 PRINCE WILLIAM STREET, ST. JOHN, N.B.

All kinds of Rubber Belting, Hoist, Packing, Bicycles and Motor Cycle Tires, Truck Tires

BRING an Auto expert with you when you examine this big, powerful car. Get his opinion of the motor and the whole mechanical construction. Have him examine the axles—the floating-type rear axle with shafts and gears carefully ground from chrome-nickel steel—the extra heavy front axle with Timken tapered bearings; the chrome-nickel accurately cut transmission gears. He will show you that the Tudhope "6-48" is a high engineering achievement—that it has strength at every vital point—that it is correctly built for riding comfort; long wheel-base (127 inches), big wheels (36 x 4 1/2), full-elliptic rear springs and shock absorbers.

The motor is the cast en bloc long-stroke type—a thoroughly tested, powerful and silent machine.

The TUDHOPE "6-48" is a modern car, superbly finished and of distinctive appearance.

It has Electric Lighting and Cranking (Gray & Davis equipment). Deep tonneau cushions. Large force-feed gasoline tank at rear.

Sold with complete equipment, Speedometer and spare tire, at the Tudhope duty-saving price, \$2,500 f.o.b. Orillia.

The TUDHOPE MOTOR CO., Limited, Orillia

TUDHOPE "4-36" has Gray & Davis Electric Lighting—115-inch wheel-base—34 x 4 tires—demountable rims—double-drop frame. Long-stroke motor (4 x 4 1/2) cast en bloc. Full-elliptic rear springs and shock absorbers. Highest grade, complete equipment, including Speedometer and extra tire. 8-Passenger Touring body and 2 Passenger Torpedo Roadster, \$1,625 f.o.b. Orillia.

Make your Car sure-footed

Men buy Goodyear Non-Skid Treads because they have overcome the faults common to other skid-preventing treads.

GOODYEAR NON-SKIDS GRIP. This perfect Non-Skid Tread, with its diamond-shaped blocks, its countless angles and edges facing in every direction, gets a firm grip of the road and adds much to the power and safety of the car.

GOODYEAR NON-SKIDS ARE SPRINGY. Heavy bars of rubber or uneven projections make hard, dead tires that jolt the motor and working parts of the car out of adjustment. Riding over Goodyear Non-Skids will prove that they are as springy and full of life as plain tires.

Fit all Standard Rims

NO-RIM-CUT NON-SKID TIRES

GOODYEAR NON-SKID BLOCKS DISTRIBUTE THE WEIGHT. Widely separated projections of hard rubber have been found to press in and bruise the fabric. The Goodyear diamond-shaped blocks are close together and wide at the base. Under pressure they spread out. The weight of the car is carried evenly over the whole tread.

GOODYEAR NON-SKIDS ARE SKID-RESISTING TO THE BMD. When, after thousands of miles, the centre blocks wear down, the angles and edges of the side-blocks take up the work.

GOODYEAR NON-SKIDS DO NOT OVER-HEAT. Most heavy tires heat up quickly. Goodyear Non-Skids are air-cooled. The small blocks are separated by deep air channels which keep the rubber cool.

WHERE can you get another such tread? AND this perfect Non-Skidding Tread comes on a No-Rim-Cut, 10% oversize Tire—the tire that saves the waste of rim-cutting—the tire that gives extra TIRE MILEAGE.

Do you want to STOP SKIDDING? Do you want INCREASED MILEAGE?

Look up the Goodyear Dealer.
