

sons who are desirous of having an authentic Map of Upper Canada, from being imposed upon by *promises*, which it may take a great length of time to fulfil.

This Map is on the scale of ten miles to an inch. It will be mounted on canvass and rollers, and coloured. Copies may be had at the price of £2 10s Currency.

DAVID WM. SMITH.

York, April 8, 1823.

To be published by subscription, by Joseph Bouchette, Jr. Land Surveyor, a Map of the City of Quebec, upon a scale of 180 French feet to an inch, forming a Map of four and a half feet by three and a half. Which Map will be accompanied by a brief historical account of the rise and progress of the City of Quebec, taken from the best authorities.

The whole will be completed in the course of a year or eighteen months.

The subscription to be 2 1-2 Guineas, and the survey to be commenced so soon as a sufficient number of subscribers will be collected to cover the expenses which must necessarily be incurred to carry such an undertaking into effect.

Quebec, 25th April, 1822.

TO CORRESPONDENTS. A QUIBUNC will appear; as will PETER PARADOX, and LIEUT. LISMANAGO, at least the subject of their communications. A. M. H. PEEVING TON, and others, referred to Mr. Gossip. Paris is perfectly wrong, the editor pays no respect to persons, and is alone swayed in his rejection of pieces, by their intrinsic demerits: his second reply to a lady is still more reprehensible than the first. If the point of the epigram by AGATHIAS, had been less coarse, it might have been admitted. THE HARBOR OF ST. LOUIS STREET is inadmissible. Correspondents are reminded of the necessity of paying the postage of their letters; there are several, from Three Rivers, and other places, now lying at the post office, Montreal, which are refused, and can not be retired for want of the postage being paid.
