

# DELCO-LIGHT

## ELECTRICITY FOR FARM HOMES

### Increases farm efficiency

Delco-Light is a Producer of the most vital type. With electricity farm work is speeded up. Work formerly done by hand, is done by power in half the time. Better light speeds up all work indoors. No lantern to carry when doing chores.

Electricity attracts labor to the farm and keeps boys and girls on the farm. Lightens the burden of the housewife, too.

Delco-light is thoroughly practical and has satisfied over 50,000 users. Simple, sturdy, economical.

Illustrated literature, telling all about Delco-Light will be sent free by your nearest distributor. It is full of facts about electricity on the farm—about what it has done for other farmers. Send a post-card to-day.

Delco-Light, the complete electric light and power plant.

The Domestic Engineering Company - - Dayton, Ohio

**A WORD**

The editors hope this year's improvements made for old subscribers new serving features, a service.

During the next year the trying period of the year will determine the state of the weather—as to whether with propitious by placing upon the east burden of day. Every farmer should be a weekly during this period.

Back numbers of this year are available. Send in 75¢ to avoid missing a year. The yellow cover shows to what date. No other receipt is necessary. Send to the Guide, either by postal, bank, or express.
