## WILL AID IN SURGERY

Teela Has Made the Human Body Transparent.

By X Rays He Has Seen Through Three Men a New Internal Organ of Living Person Clearly Visible by the Use of the Fluorescent Screen - Great for Surgery.

New York, April 17.—Nicola Teela has done what all the other exploiters of the Roentgen rays have failed to do. He has succeeded in looking through the human body. He has gone farther and seen through the bodies of three of his assistants placed in a line with the rays.

Ever since the discovery of Edison through a fluorescent screen experimenters with the X rays have been devoting their energies to trying to see through the body. The living skeleton has been photographed many times by the X rays. But no development of the light was found sufficient to penetrate the trunk of the body.

Teela believed that he had discovered the problem when he discovered the fluorescent screen. In this he was completely correct. He had been believed to be six times more fluorescent than any other substance known to man, and most of his successors used.

On the contrary, he has persevered in using the platinum-barium-cyanide for his fluorescent screen, and some few have succeeded in seeing through the body.

Teela has finally perfected the X ray tube to such an extent that the complete skeleton of a man can be seen as well as flesh. One of his assistants, who was the subject of his experiment, stood with his back to the vacuum tube where the X rays were being given off. He held a brass plate in front of his chest, moving it up and down.

The X rays had penetrated the body, and through the fluorescent screen, he could distinctly see the brass plate as it moved up and down.

"It is true that he succeeded in seeing through the body," said Teela to a reporter yesterday, "but only in a reporter's way."

Teela's wonderful discovery means that the internal organs can be inspected with perfect ease. It means that he has given to humanity a boon on a par with vaccination, anaesthetics and other marvelous discoveries in medicine.

## THE BRITISH PURSE.

Seems to be Well Filled in This Time of Need.

The British Budget laid before the House of Commons by the Chancellor of the Exchequer, Sir Michael Hicks Beach, has been a most successful one. It has shown that the British Purse is well filled in this time of need.

London, April 16.—At 4 1/2 o'clock Sir Michael Hicks Beach, Chancellor of the Exchequer, rose amid "Conservative cheer" to deliver the budget. He began by saying that despite the fact that the expenditure of the last fiscal year had been larger than that of any year since the last great war, the surplus in the Treasury was the largest that had ever been known and the credit of the country was never so high.

The deposits in savings banks and permanent accounts in ordinary banks had amounted to an unprecedented point and the production of the budget showed that the highest ever known. The amount of bullion in the hands of England was £40,000,000 and the reserve fund in the bank in proportion to its liabilities was £100,000,000.

The revenue for the fiscal year had been £27,000,000, while for the year ending 31st March it had been £26,000,000, showing an increase of £1,000,000 over the estimates. A great feature of the budget was the increase of the revenue from tobacco, wine and tea, the latter having steadily advanced.

The revenue from spirits had also advanced, and the total revenue had increased by £1,000,000 over the estimates. The amount of bullion in the hands of England was £40,000,000 and the reserve fund in the bank in proportion to its liabilities was £100,000,000.
