more, or even predicting what they have, their moral proofs of supporting the party as a conspirator, for six months to the latest.

Report's column, 10,000 strong, has, since it crossed the Rubicon, given, made, no other movement than that of five battalions against the heights of St. Aquila.

The position of Bilton, is becoming more critical, and it is doubtful whether the town will be able to hold out above ten days.

General Committee arrived at Weston; General Committee arrived at Weston; General Committee arrived at Weston; the government of Algiers, and besieged France for that purpose.

The *Star* says—It is affirmed that the speech from the throne will announce that the recruits for the current year have exceed the expenditure. Government hope that this state of intelligence may counteract the evil effects of the measures proposed by the shock at Constantinople.

Brazza. Dec. 14.—Numerous conjectures are cast on the untimely steamer of the Grand Duke Michael from Russia. Some believe him at odds with his mother, the Empress; others with his wife, Princess Helen, with whom he is reported to have been on the best terms; but there is no sign for winter, at least, he will not go back to St. Petersburg.

Taranto. Dec. 10.—The English frigate *Excellent*, arrived here after days, which is to carry King Otto and the young Queen to Athens. Hence we hope to see that the King will embark here, and set sail.

The Packet Ship *Pennsylvania*, has the largest freight list of any Packet which has arrived at New-York. The cargo is composed chiefly of Dry Goods, and according to the tickets of entry at Liverpool, was there valued at more than a million of dollars.

The Liverpool Packet Ships that sailed on the 1st, 8th, and 14th December, are still to arrive at New-York.

It is spied among the recent English news as a proof of a sure premonitory symptom, that specie is about to flow back again to England, from the United States; and an Insurance had been applied at Lloyd's on bullion from the United States.

We perceive that some journals are absurd enough to invoke the intervention of the Legislature to prevent the export of broad stuffs from the Province. If this silly wish were gratified, it is very likely the evils of scarcity and high prices would be increased. It is the uniform effect of Free Trade to keep down prices. A good market will always attract supplies. Were, moreover, the consumption to be encouraged by the price of broad stuffs being kept down by artificial means, while there existed a sufficient supply, famine would invariably ensue.

Dr. CHARLES DUNGEON's petition to the House of Commons has been sifted by a Committee of the Upper Canadian Assembly, and the result is nothing flattering to the gentleman. Six thousand copies of the Committee's Report, documents, and evidence, have been ordered to be printed. None of the leading radicals will confess to having had any hand whatever in the Doctor's mission to England.

The Post Office Department has again become a subject of consideration with the House of Assembly. A Committee has reported on it, and offered a number of recommendations, many of which would prove extremely advantageous. We are now anxious to see something done in regard to the Post Office, as there has been quite enough of talk about it.

The return of the U. S. Minister from Mexico, has given rise to a little speculation on the probabilities of a war between the two Republics. It is far from likely that Mexico, in her present emboldened and disengaged condition, would venture to proclaim war against so powerful a neighbour, and after the experience she has had in the war of American provinces.

Public attention is called to the news from Mexico. What the Government can hope to gain by a rupture with the United States, we are told by its friends, is the removal of us by force, through a series of civil conflicts, and reduced by a series of civil wars, so that it is in no condition to measure arms with us. But she may hope to gain, as she herself has nothing to lose. A war with Mexico will be productive of evil consequences to our Gulf trade. The adventures of others, and losses out of our ports, California has suffered, and the Government, from declaring war against the United States, has come into power, as we may suppose, for he will surely be inclined to follow his belief that will soon open him new opportunities. The same is true of the Anna and Maria, though the former is not yet fully established. In short, a violent civil commotion will take place in Mexico, and the present party may take time by the forelock, and sustain war against us all. We wait with great anxiety the result of these movements, and trust our government to do the best, and progress will be slow.

It is said that Santa Anna was to leave Washington on the 20th ultimo, for New-York, probably embark with all convenient speed for some port in Mexico.

Mr. JOHN BROWN, Whig, arrived in the Province on 1st December, 50 days from Europe.

To the Editor of THE MORNING COURIER.—
