

To Nursing Mothers!

A leading Ottawa Doctor writes: "During lactation, when the strength of the mother is weakened, or the secretion of milk scanty, WYETH'S MALT EXTRACT gives most gratifying results."

SIR JOHN S. D. THOMPSON.

Canadian Premier, born at Halifax, N. S., Nov. 10th, 1814, died at Windsor Castle, England, Dec. 12th, 1894.

Ab! little we wot at the dawn of the day, What shall hap' ere the evening's decline; We map out the plan and we measure the way;

Rare projects the heart doth enshrine, But an angel unseen stands off in our path, And a limit is set to our range; We see not the end, and we fume in our wrath;

Yet the changeless doth compass the change, Sore tidings flash from strand to strand, 'Er sea-wide lake, o'er mountain steep; And the firmest-minded in our land, Bows down his silvered head to weep.

In ancient Windsor's kingly pile, Anigh Europa's mightiest throne, 'Neath lustre of a sovereign smile A nightingale monarch claims his own.

And she, whose throes in travail pond Press wept the widow's lonely tear, Hath stood in reverence by the shroud, And 'berred with flowers the stranger's bier.

To stately ship of Britain's line! Peace to thy path, and peace to foam; Who roysal' by right divine, Thou bring'st in state unto his home.

Ho city, all fair, by the sea! Receive with due welcome thy son, Who cometh to rest him in thee, Unalarmed, the victory won.

Earth, gently lay the sleeper down! Earth's withering laurels shrink and fall, What recketh he for minor crown Who listeth to that loftier call!

of those whose memory we hold dear, is a constant inspiration to the soul. "We read in Exodus that the Lord commanded Moses to 'make two cherubims of beaten gold,' on the two sides of the oracle. In the books of Kings we find graphic descriptions of the carved figures of palm tree and cherubim that adorned Solomon's temple. An irresistible impulse is instilled in the human heart, to produce representations and enduring symbols of everything the heart of man holds dear. Why should religion not turn this noble impulse to good purpose and convey its sacred lessons impressively on the imagination and the soul? Spoken words are pictures presented not to the eye, but to the ear of man, communicating to the mind the lessons we wish to impart. Much of what we hear is soon forgotten; memory cherishes no words that enter through the window of the soul. The pictures on the printed page, wrought by the type-setter's art, eloquently appeal, it is true, to the imagination and sense, but they are meaningless symbols to him who cannot read, or who is slow to apprehend the teaching often hidden in subtle phrase. But the counterpart of the subject which words but faintly describe, is the object lesson, which even duller minds can understand, and which readily reaches the most acute and cultured soul.

From the fragments of statuary found in the catacombs of Rome, as well as from remains of Early Christian art, we learn that the Church, from the earliest ages, adopted and encouraged the most practical method of conveying instructions to the mind, now become so popular in all our schools, the method, namely, of teaching by object lessons. Our Divine Redeemer on the Cross, the Virgin and Child, Joseph, the foster father, and the majestic law giver, Constantine, the first Christian emperor, these symbolized in stone, by the hand of genius, convey to the human mind more lasting lessons than can be imparted and made by any other human means.

"We Americans have our stately hall in our beautiful Capitol building at Washington, in which we cluster the counterparts in stone or in bronze, of the nation's representative men. To each State of the Union is assigned the honor of placing a statue of its chosen representative in this gallery of fame. No room in our national Capitol has greater attractiveness for the American patriot. No sane man thinks of accusing the American people of transgressing the first commandment of the decalogue, and of worshipping idols, because we thus give becoming honor to our men worthy of renown. Yet people who at least think they are sane, who are not suspected of any mental malady, continue to condemn Catholics as guilty of idolatry, because they give expression in their churches to the instinctive longing of the human heart, to realize in artistic symbol the abstract conceptions of the mind and to honor the best representatives of Christian virtue with religious reverence and praise."

Mgr. Satelli on Schools. In an article on the Catholic school system in the December number of the North American Review, published recently, Mgr. Satelli makes his first contribution to American periodical literature. Mgr. Satelli devotes his article to a review of the foundation of Catholic schools in Rome by private funds independent of the Italian school system, after the government had succeeded in eliminating Catholic influence from the educational institutions. He says that in number the Catholic schools exceed the government and municipal schools combined.

In regard to the qualifications of teachers, and the method of teaching, the Catholic schools endeavor to adjust themselves as far as possible to the requirements of the State. The religious corporations stopped at no expense or sacrifice to provide for their own schools, and the teachers, who were furnished with the proper diplomas, would gain by their ability, zeal and conduct the confidence of the public. And the Pontifical commission provides for the other schools through normal colleges, where teachers and women were prepared for their career as teachers. Special text books, however, had to be written for the Catholic schools, but in compiling the curriculum, the endeavor was made to bring them as far as possible into harmony with those in use in the public schools, both as regards the division of classes and the course of study.

"In endeavoring to conform to the Catholic programme," says Monsignor Satelli, "with that of the government the fact was not lost sight of that, although the State may theoretically and in the abstract describe the representative of the people, it is practically and in concrete dominated by a party and favors the system of education which is advocated by the party in power, rather than that which is best adapted to the needs of the people. Even in connection with the method of teaching—in which the Catholic schools differ greatly from the public schools—the Pontifical commission was at pains to conform to the requirements of the State."

"The number of pupils in the elementary Catholic schools exceeds that in the municipal schools, and if the number in the Catholic high schools is a trifle smaller than that in the corresponding State schools, this is because it is much easier for the young men who attend the State schools to obtain diplomas, as the examiners for diplomas are the teachers in the State schools. In spite of the humiliation and opposition to which Catholics are subjected, the parents have not lost confidence in the Catholic schools, and the results are more than satisfactory.

"Taking into account the contributions made for the purpose of Catholic education in Rome from all quarters, the expenses from primary Catholic education in Rome would reach a total of at least one and quarter million lire yearly. This amount comes from direct donations of the Holy Father, from the estates of the Holy See, from donations of certain

corporations, churches, congregations and individuals and from the fees of certain institutions. Monsignor Satelli emphasizes the claim that the Catholic schools in Rome are more patriotic, more Italian in spirit and in methods than the secular schools, since it has been their special aim to deviate as little as possible from the national traditions which so harmoniously combine faith and science and to furnish the boys and girls of the new generation with that grade of culture which is best adapted to their social position.

Talking Before Children. Did you ever notice what a lasting influence conversations carried on between adults have on children who happen to be listening? Why, Aunt Bessie can remember bits of talks, dictated to her, because she did not fully understand what was being talked about, that she heard when a mere child, and she hasn't the faintest recollection of what she read at the same period. Grown people are dangerously thoughtless about the little ears that are taking in everything around. That reminds Aunt Bessie of a dear little girl just past four who shocked her family one day by admonishing her doll to behave herself in language so awfully profane that there was no expressing it. Her mother was stunned. Swearing and disgraceful language of that sort was not tolerated in the house, and if the men folks ever vented their feelings that way, it wasn't as the hearing of the words adopted and encouraged the most practical method of conveying instructions to the mind, now become so popular in all our schools, the method, namely, of teaching by object lessons. Our Divine Redeemer on the Cross, the Virgin and Child, Joseph, the foster father, and the majestic law giver, Constantine, the first Christian emperor, these symbolized in stone, by the hand of genius, convey to the human mind more lasting lessons than can be imparted and made by any other human means.

Errors of Romanism. The lecture of Right Rev. John J. Keane to be delivered in the chapel of the University of Pennsylvania, December 20, being, I suppose, the first time a Catholic prelate has been heard within the classic walls of old Penn., recalls the occasion upon which a few years ago Bishop Keane addressed the faculty and students of Harvard. An annual lecture had been founded about a century back by a stern, sincere old Puritan, the object of which was to be forever "The Exposition of the Errors of Romanism." Yearly the lecture had been given and varied, and various, we are sure, had been the expositions of "Romanic errors" from the cruder applications of apocalyptic figures in "ye olden times" to the supposedly more logically conclusive arguments of our own day.

Finally there came a time when it occurred to some one that the most fitting person to expose the errors of Romanism would be one who knew them better than any other could who had been brought up amongst them, and so the great Catholic prelate, the rector of the Catholic University, was asked to deliver the lecture. "Romanic Errors" we are certain had never before been handled in quite the style that they were handled on that occasion. The old walls must have listened "aribus erectis" to the very different story that was told to what they were wont to hear. The auditors were none the worse for getting at the truth, even of error, from the fountain-head.

The liberty spirit displayed by the descendants of the old Puritans was worthy of the sincerity of their ancestors. It was more; it was an index of that broader, truer, Christian tolerance that respects the conscientious beliefs of all men, that feels that there is a brotherhood of mankind as sons of God that is deeper, wider, higher than any mere sectarian distinction. It was that divine charity, fortunately now not so rare as it used to be, that has patience with the religious beliefs of all men, not for any such specious reason as that "it makes no difference to which a man gives his allegiance," but because they all represent in an imperfect because human way man's highest, purest, noblest aspirations to the God that made him.

J. J. W.—In Catholic Times. Did you ever make any; finding afterwards you might have been better suited, perhaps for less money. If you needed a padlock, wouldn't 50 be better than 5 to select from? Suppose it were a stove or a pocket knife, is not choice an important matter. Some dealers dabble in a multitude of things. There is a right place to go for all things. Ours is the right place for many. We are not dabblers. Call and see if we have not just what you want—or send for prices. The Model Grand Range still takes the lead.

"Comment to Your Honorable Wife" and tell her that I composed of clarified cottonseed oil and refined beef suet; that I am the purest of all cooking fats; that my name is Cottolene. The learned physician exposed what he termed the "incredible frivolity" of Zola, and of the extraordinary carelessness he displayed in narrating his "case." As an example, Dr. Boissaire said that he had a two hours interview with the novelist, who never so much as took a note of the lengthy and intricate narration of cures which was given him. It was a case of one ear and out of the other.

As a result the statements made in "Lourdes" were absolutely unreliable. Dr. Boissaire then presented to the meeting the persons on the platform who had been cured, and whose cures were certified as supernatural by the medical committee at Lourdes. The cases were explained one by one; the condition of the sufferers beforehand, the manner of cure and their present state of health. The lecture became thereby of absorbing interest. Cheers after cheers arose from the excited meeting, and when the doctor had finished he was greeted with frantic applause. A resolution that Lourdes was entirely miraculous, and therefore, not a proper object for science, was put to the meeting and carried by acclamation.

A Table of 800,000 Pianos. Charles F. Adam, who is employed at general repair work by the Braas Company, has just completed a table containing 800,000 pieces of wood. He started it in 1891, and has worked on it at odd times in all 3,364 hours. It is a yard square. In the centre of the revolving top is a picture of the White House at Washington, surrounded by the stars and stripes. Along the sides are shown Washington's birthplace in Virginia, his familiar Mount Vernon home, the birthplace of Grant in Ohio, the house where he attended school as a boy. Later over with these are many quaint designs. The support consists of two pieces of oak placed together in the form of the letter X. On these oak supports are sixteen panels on which are shown trees, birds and leaves. On the lower part are shown the American eagle with spread wings and a cluster of arrows in its talons, a deer's head, a stork, a sparrow, and two roosters, Washington's Valley Forge headquarters, the birthplace of Lincoln in Kentucky, Ford's Theatre, where Lincoln was shot, and the place near by where he died, the birthplace of Columbus at Genoa, a cloister in Spain visited by Columbus, the ship Constitution, Libby Prison, a cluster of daisies, lilies, a Scotch thistle, and twenty-six varieties of leaves, with ferns and fruits. The Masonic Temple at Waterbury is given, as are several private residences.

There is nothing in the nature of dye, paint or stain in the whole work. The various effects are brought out solely by the natural colors of the different woods, of which there are seventy-three varieties in the table.

Weak Nerves are Made Strong by HAWKER'S Nerve and Stomach Tonic. It gives new strength and vigor to Nerves, Brain, Stomach, and Blood, and all weakened organs.

Is your digestion weakened by all-grippe? Use K. D. C. For immediate relief after eating, use K. D. C. K. D. C. the household remedy for stomach troubles. K. D. C. Pills tone and regulate the liver.

Why Our Churches Have Images. The Rev. James M. Cleary, in a lecture recently delivered at Minneapolis, Minn., in which he discussed the subject of "Image Worship," erroneously imputed to Catholics by the uninformed, explained the true intent and meaning of the use of images in churches and households. He said: "Catholics adore their churches with statues and paintings as their means may permit. Pictures and ornaments are not absolute essentials to religious worship any more than ornamentation is an imperative need of human subsistence. But the presence of artistic ornamentation is an evidence of cultured intelligence. So, also, in our churches, the presence of artistic representations of inspiring scenes, is an evidence of religion's effort to turn to wholesome purpose the artistic sense in man, a proof that it understands the needs of the soul, and is ever ready to respond to its most noble and refined aspirations. The presence of the form and outline

of those whose memory we hold dear, is a constant inspiration to the soul. "We read in Exodus that the Lord commanded Moses to 'make two cherubims of beaten gold,' on the two sides of the oracle. In the books of Kings we find graphic descriptions of the carved figures of palm tree and cherubim that adorned Solomon's temple. An irresistible impulse is instilled in the human heart, to produce representations and enduring symbols of everything the heart of man holds dear. Why should religion not turn this noble impulse to good purpose and convey its sacred lessons impressively on the imagination and the soul?
