The Arrogant Turk.

The Turkish Nationalists since their defeat of the Greeks, and the flinging of the latter out of Asia, have become exceedingly arrogant and are in the humour to defy the whole of Europe. The conference at Mudania seems to have become nothing but the word formed by the three first letters of the name of that village as the Turks (Kemalists) have torn up the agreement and peremptorily ordered the Allies to move out of Constantinople in short order. In effect they are not requested to stand upon the order of their going but to go at once. It is not conceivable that, under the circumstances, the Allies will obey the Nationalist demand. To do so would leave all the Christians and non Mohammedans in the Turkish Capital at the mercy of their hereditary enemies and the consequence of leaving these without adequate protection can be readily imagined. Left to the fury of the Turk, the tortures to be inflicted on these patient sufferers of past iniquities would be indescribable, as all the pent up rage of the Ottoman soldiery, infuriated over their short expulsion from Europe would be vented on those who were unfortunate enough to be left behind. Already Stamboul Christians are seeking shelter from the fear of a Turkish massacre, notwithstanding that the new Government has issued orders that all disturbances will be vigorously put down and those responsible rigorously dealt with. It is easy, however, to saddle the blame on the person whom it is desirable to accuse, and the Turk is not at all likely to accuse himself, should disorders break out. The old Turkish regime was bad. The new one may not be defined until it is tested or has proven itself superior and more tolerant toward Christians than its predecessor. The Near East situation is fraught with grave difficulties, all of which will necessitate careful handling, but in any case the Turk—young or old—must not be permitted to become the dictator of Europe.

Sent to the Woods.

Whether or not the Humber Project has been finalized by agreement between the Prime Minister, the Reids and Armstrong-Whitworth Company, the dispatch of a squad of laborers to the woods across country to perform some necessary railway construction, should not be taken as conclusive proof that these are but the advance guard of the thousands that will subsequently be employed immediately as per promise of the promoters of the deal on all three sides. The particulars of the new arrangement cannot be known until the return of the negotiators, and not then perhaps until the Legislature meets. It is not good business to consider a tentative proposition as accomplished without all the details thereto being made known, and should the Colony become involved in any expenditure on account of construction work, unauthorized by the House of Assembly, the net result may be disastrous. To take the plunge hurriedly, and without due advisement, into such a

stupendous proposal as that of the guarantee suggested for the Humber Project, would assuredly be the work of madmen, but unfortunately there have been a multiplicity of incidents since the present Administration assumed power in 1919 to demonstrate their utter incapacity and absolute unfitness to be the rulers of Newfoundland.

Spanish Trade Agreement.

NORWAY RECEIVES REDUCED TARIFF.
With regard to the Anglo-Spanish trade agreement, the following message has been received by the Secretary of the Board of Trade from Messrs. Hawes & Co., Alicante:—
"Campos and self have seen Spanish Embassy and understand Norway enjoys reduced tariff applicable under the new treaty between England and Spain. It is necessary that Newfoundland take immediate steps to be included."
We understand this to mean that under a new trade agreement between Great Britain and Spain, Newfoundland can be given reduced tariff on fish entering the latter country now enjoyed by Norway, provided Newfoundland takes immediate steps to be included.

The Moonlight Dance in the second part of the Highlanders' Dance programme will be a new attraction. Don't fail to procure tickets for November 9th, C.C.C. Hall.—nov7,31

McMurdo's Store News.

TUESDAY, Nov. 7.
Cold in the head, or acute catarrh is not only very unpleasant in itself, but sometimes leads to more serious troubles, coughs, bronchitis, etc. It is therefore very important to stop a cold in the head at the start or as soon as possible after its onset. This checking of a head cold can best be accomplished by means of local applications, and of these Plaston's Catarrhal Balm ranks high. A bottle of the Balm applied, several times during the day and at bedtime, to the inside of the nose, will purify the air passages, stop the unpleasant running from the head, soothe the irritated membranes, and soon set things right. Price 40c. a tube.

Undertow in Harbor.

H.M.S. Wisteria, which was lying at Harvey's coastal premises hauled off this morning and anchored in the stream. There was a very heavy undertow in the harbor, and ships were pounding at their piers. Work of unloading S.S. Manoa had to cease for some hours and on this account the ship will in consequence be delayed in sailing.

SABLE I. OUTWARD.—S. S. Sable I. sailed for North Sydney this morning, taking a small freight and one passenger, J. Durand.

FISHERMEN! CONSIDER THIS.

Squires is Taxing You Over 110 per cent. on a Part of Your Outfit.

Compare the Tables Beneath and Judge For Yourself.

That statement of planters account, with duties thereon, under the present tariff, published by our evening contemporary yesterday is so misleading in its comparison, that we are constrained to prepare a similar list and apply to the items the tariff rates of the year 1918-19, in order to convince the fishermen that they are paying—according to an official list of duties prepared specially for the Advocate—more than one hundred and ten per cent. over and above the same rates of duty as collected during the year previous to the assumption of government by the Liberal Reform party. At present on a part outfit of provisions and motor oils, valued at about eight hundred dollars, the planter contributes to the revenue the sum of eighty-eight dollars and six cents. Under the Finance Administration of Sir Michael Cashin, the total duties collected on a similar outfit, did not amount to forty-two dollars. Therefore it is conclusively proven by no less authority than the Advocate itself that to-day the planter who purchases an outfit for the fishery as furnished below is paying in duties over double the sum demanded of him four years ago. As every item shown in this list, carries a specific tariff rate, the value does not make any difference to the revenue collected, so that relative values may be assumed for the purposes of proof that the Squires tariff bears a great deal more heavily on the fishermen than that of the previous Government. These are figures that will not only talk, but will convince fishermen that the Advocate has discovered a mare's nest and fallen into it. Follows the list published by that paper of yesterday:

1922-23 TARIFF.			
Article	Total Price	Unit Duty	Total Duty

		\$41.87	

The difference between \$88.06 of Squires taxation on the above articles mainly used by fishermen, and the \$41.87 of the old tariff is \$46.19. Just that sum in excess than fishermen of Newfoundland is being extorted from you by such Liberal-Reformers as Squires, Coaker, Campbell, et al. Do you need further proof. Is it not high time to begin making a change!

Newfoundland Coal.

WHAT ARE THE COMPANIES DOING!

Editor Evening Telegram.

Dear Sir—We have been told through the columns of the Press from time to time so much about the latent possibilities of this country that it seems strange to the average citizen that nothing tangible has been accomplished up to the present time. Some two or three years ago a local company was floated to develop certain of our coal areas, and at one period it was common property that there was an abundance of superior coal and we would not have much longer to wait for the real goods. Many since that time have been living in hopes that have not been realized.

In winter when cheap fuel would mean much to those of limited means, the hardship of scanty fires brought about by high prices must cause considerable discomfort. Coal dealers are to-day procuring coal from England and selling it to the consumer for \$12.50 per ton; why then are we compelled to pay \$15.00 for Sydney coal? It seems strange that Sydney coal should be \$15.00 a ton dearer than English coal, when the English coal has to be carried more than three times the distance. And it is stranger still that we cannot get our own coal cheaper than either of the above, when the distance of haulage is considerably less than either the Eng-

lish or Canadian coal. It seems not a question of, is there a nigger in the wood pile, but how many niggers are there in the pile? Are we going to allow ourselves to be apparently overcharged any longer, when it has been proven that the coal exists in Newfoundland in vast volume. I trust some other pen than mine will take up this matter in the interest of the common people.

Yours truly,
ECONOMIST.

Orphanaid Dance.

ATTENDED BY 300 PEOPLE.

About 300 people attended the dance held last night in the C.C.C. Hall. The affair was organized by Misses Helen Noonan and Gladys Wiseman in aid of the C. of E. Orphanage. Music was supplied by the Majestic Orchestra. Supper was served at 11 o'clock, after which dancing was resumed and continued until an early hour this morning. The affair proved highly enjoyable.

Bay D'Espoir Development.

MR. H. J. CROWE READY TO BEGIN—DOES NOT REQUIRE ANY GUARANTEE.

We understand that the Bay D'Espoir Development which Mr. Henry J. Crowe has been strenuously working for some years, a brief account of which was published from one of our correspondents on the South Coast last week, is full of great possibilities because of a powerful group of financiers and producers which Mr. Crowe has behind him in this undertaking. While the name of the capitalists interested, have, we are informed, been given to some of the members of the Government, they cannot be given out for publication at this time, but from what information we have been able to obtain we believe that they have been behind some of the largest water power and industrial developments on this Continent and propose establishing, not only a good size pulp and paper plant on the South Coast, but will utilize the Water power, which exceeds one hundred thousand H.P., for treating certain minerals and for the industrial purposes. The power has been proved to their satisfaction, we believe, as a result of the extensive examinations made at Bay D'Espoir this summer. If Mr. Crowe succeeds in this undertaking he is to be congratulated for working out a project that will result in large labor giving industries on a part of the Island that has always been regarded more or less as a barren waste.

Mr. Crowe's record since coming to the island over twenty years ago, is more as an operator, than Company promoter, for he has operated the properties, which he conveyed to the companies he organized. After closing with the Lord Northcliffe Company, the Grand Falls project, he operated and delivered to their mills, one hundred thousand cords of pulp wood, but it is in the lumbering operations that Mr. Crowe has put in most of his energies, he built settlements, also sawmills in different parts of the island and successfully opened up a market in South America for our lumber where he shipped about one hundred million feet. To give some idea of the extent of his lumbering operations before he brought about the Grand Falls and Bishop Falls pulp and paper developments, the following are some of the properties he secured and operated, namely:—Gambo, Gander Bay, Glenwood, Indian Arm, Notre Dame Junction, Norris Arm, Botwood, Point Leamington, Badger and Millertown, and in these operations he has always endeavored to foster labor and improve the living conditions of those in his employ. With few exceptions, the properties referred to were abandoned or about to be abandoned when Mr. Crowe came along and gave them a new lease of life, expending millions in the purchase and operation of same.

The New Commander-in-Chief.

COMES OF A FAMOUS NAVAL FAMILY.

Vive-Admiral Sir Michael Culme-Seymour, who has been appointed Commander-in-Chief of the North American and West Indies Naval Station, in succession to Admiral Sir William Fakenham, was born August 29, 1867, being a son of the third Baronet of that name, who was also a naval man one hundred years ago. He served during the Boer War in 1902, and taking part with the Naval Brigade at the Crimea. The Younger Sir Michael has been second in command in the Mediterranean since 1920, a post which the Admiral, his father, held in 1893. He was married in 1896 to Florence Agnes Louisa, youngest daughter of the late A. L. Nugent, by whom she has one son and one daughter. His Lieutenantcy in the Navy dates from 1889. In 1906 he was Captain, and promoted to Rear Admiral in 1916. He served at the Battle of Jutland in that year and was mentioned in despatches. Since the close of the war he has been Rear Admiral commanding the Black Sea and Caspian Sea Squadron.

ARRANGEMENTS FOR TWO MINUTES SILENCE.

Through the co-operation of the proprietors of the city manufacturing plants arrangements have been made for the synchronization of a 10 seconds whistle blast from the city manufacturing plants in conjunction with the gun signal for the proper caution of citizens during the two minutes silence on Remembrance Day, November 11th. This arrangement has been necessitated by the fact that the gun signal as fired from Signal Hill is of insufficient volume to warn citizens that 11 a.m. has arrived, which is the time set apart for a complete cessation by citizens of their avocations in grateful memory of the men who laid down their lives in the Great War. It is hoped that this arrangement will meet with the whole-hearted support of the community in seeing that we as Newfoundlanders do not forget our dead during the great two minutes' silence.

Memorial Service.

PRESBYTERIAN COLLEGE—LATE PRINCIPAL ANDERSON'S PICTURE UNVEILED.

A beautifully simple and impressive service was held in the Presbyterian College on Friday afternoon last, when a picture of the late Principal, Thomas Anderson was unveiled in the presence of the staff and pupils. The service was conducted by Rev. Robert J. Power of St. Andrew's. Mr. Anderson's favorite hymn was sung, "Faith of our Fathers." Mr. Power in a short and sympathetic address spoke of the qualities that had marked that Mr. Anderson a prince among men—his sincerity, his thoughtfulness, his kindness, his devotion to duty, his faith in God and man. "We shall never see his like again," said Mr. Power and in that feeling all who were present concurred. It was a fitting tribute to one whose memory shall be treasured in the school for which he did so much.
