

CARE FOR YOUR HAIR

By Frequent Shampoos with Cuticura Soap. Trial Free.

Precede sharpess by touches of Cuti-cura Ointment if needed to spots of dan-druff, itching and irritation of the scalp. Nothing better for the complexion, hair, hands or skin than these fragrant super-creamy emollicate. Also as substitutes for expensive touch preparations.

Sample Each Free by Mail With 32-p. Skin Book. Address post-card, Cutioura, Dept. L, Boston, U.S.A. Sold throughout the world.

CARDINAL FACTS

This is Canada's war.

What will the harvest be? Increase of knowledge means in-crease of production.

The first essential for the highest yield is good seed.

Not only grain growers, but breed-ers and all preducers are making his-tory at this juncture.

Value of the crop is increased if treated for smut prevention. Failure to scoure suitable varieties

is a frequent cause of poor ensilage. All grain intended for seed should e cleaned and graded, in order to retain only the strong kernels.

Farmers who have separate houses for their laborers have no difficulty in securing help.

Good labor is worthy employment in winter as well as in spring, summer

If labor is scarce now, it will not be more pleatiful in another year, so it Is wise to encourage present help.

A bureau of employment could find useful work in every town of size.

Austria has decreed that every acre must be utilized for production. Wast-ing land is the worst form of extra-Live stock is the foundation of per-

manently successful farming to-day, as it has always been.

The farmer who conserves his best stock for breeding will profit greatly in the future.

When manure is piled and allowed to have the vitality of most of the

to heat, the vitality of most of the seeds is destroyed; but when drawn to the field from the stable, or not left long enough in the pile to become well rotted, manure is one of the most important means of seed dispersal.

Canada is many times larger in area than Belgium, but in population there is not a great deal of difference, that is, considering Belgium before the wear, Britain is the protector of small states. The greater the area and variety of area, the more protection is needed when emergency arises.

AN EXCELLENT REMEDY FOR LITTLE ONES

Mrs. Sidney Dalby, Audley, Ont., writes: "I have used Baby's Own Tablets for the past twelve months and have found them an excellent medicine for my little girl." Thousands of other mothers say the same thing—once a mother has used the Cablets she would use nothing else They are pleasant to take; the result is sure, and above all they are guaranteed by a government analyst to be absolutely free from injurious drugs. The Tablets are sold be medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Shoes in Olden Days.

Early Britons wore shoes of raw cowhide, with their hairy surface outward. The Anglo-Saxons showed an advance, for they were black and lac-ed by a leather thong. Then came ed by a leather thong. Then came what might almost be termed the bag what might almost be termed the bag shoe of the Merovingian period, tied around the ankle, a similar easy sort of covering obtaining in Germany, and so by gradual stages from the mediaeval shoes to the poulaine shoes, a queer early German specimen, the band round the ankle being of en-graved brass.—London Spectator.

Minard's Liniment Relieves Neuralgia

THE OLD MAID. (Buffalo News)

Married people—and what ungenerous spirit ever prompted 4f?—long ago fashioned a legend about celibates that pictures them chochety, graceless, ugly and selfish. Little boys and little girls—yes, and grown-up jesters—fashioned and silly story to the ones least able to defend themselves, the unmarried women of middle age or more.

Now the little boys have grown to be bigger boys, with work to do, with moments to pause along the way and sit awhile with the recollection of other days.

light of hallowed memory shines kindly around a shawled figure in arden path. A face softened rather embittered, by sweet melancholy; similing through solitude to sacred he world to share—a creature alter lovely, giving her spacious heart te roses and the children of her

stairs to the supperiess. Now the friend of his individuality.

Most men who have reached high places have some such mentor to thank. One of the tragedies of life is that man may never know just how much he has been helped by her blessed memory, her prayers and her hopes. And for no reward other than grateful remembrance.

Cld maid There is no irreverse in the term.

It isn't because he is lacking in will that many a fellow doesn't marry; it's because of the girl's won't. TORONTO & WINNIPEG

Housekeeper

Put a little saltpetre in the water you use for your bouquets and the flowers will last for a fortnight.

Cream or tartar ruppeu on solled white gloves cleans them.

When rinsing ecru curtains, stir a little vellow ceber late the versa.

when rinsing ecru curtains, sur a little yellow ocher into the water and they will be of just the right color. Keep flowers fresh by putting a pinch of soda in the water.

pinch of soda in the water.

To restore gold ace that has become tarnished brush well with powdered alum.

To save yourselves steps (going back and forth to the stove) and economize on heat, buy a square of soapstone and use it for an iron stand on ironing day. The irons will retain their heat twice as long as when placed upon other materials.

To clean an unpainted kitchen table, scrub it first with het water and soda, then sprinkle silver sand over it and finish scrubbing it. Rinse this off,

finish scrubbing it. Rinse this off first with hot and then with cold

To remove inkapots from any kind of lines, soak the spots for several days in turpentine and then in water strongly seapy three or four times, if necessary. The treatment is said to be infallible. Paste soft blotting paper on the

Paste soft blotting paper on the bottom of flower bowls and they will not mar polished surfaces.

To clean white satin slippers, take a little alcohol and drop three or four drops of lemon juice in it, then apply it to the slippers with a piece of soft white cloth or linen.

To keep brooms in proper shape, souse them down in the suds, after boiling the clothes on wash day, bending them into shape as you do this: then rinse, shake well and stand to dry upside down.

To clean a violin, wash it very care-

To clean a violin, wash it very carefully with soap and water, seeing to it that not a drop runs inside, or dip a piece of soft silk in paraffin oil and rub the violin with it. The interior of the violin should be cleaned with dry rice.

Facts for Health Seekers To Ponder Over

Nearly every disease can be traced to clogged or inactive stomachs, livers or intestines. Indigestion, biliousness, headaches and insomnia all emanate from this cause. Keep these organs in working order and you'll have con-tinuous good health. No case was ever treated with Dr. Hamilton's Pills and not cured; their record is one of marvellous success. Dr. Hamilton's Pills are very mild, yet they cleanse the bowels promptly and establish healthy regularity. You'll eat plenty, digest well, sleep soundly, feel like new after using Dr. Hamilton's Pills—one a dose -25c. a box everywhere. Be sure you get the genuine Dr. Hamilton's Pills, in a yellow box always.

AGRICULTURAL BULLETINS.

So great has been the demand for bulletins, pamphlets, records and reports upon the publications branch of the Department of Agriculture at Ottawa as a resuit of the Patriotism and Production Movement, that it has been found impossible to comply with all the applications as promptly as could be desired. For some of the bulletins the supply has been exhausted and no time has been afforded for reprint-ing, while of others the quantity ask-ed for individually has been such that instant compliance would mean many applications might have to go without. This has meant extra correspondence and consequent delay. The situation success of the campaign, and the widespread interest created, but the inability to respond on the instant with the multitude of applications is greatly regretted. At the same time it is impossible that the size of the demand could have been foreseen. As fast as possible the requests will be attended to, but in the meantime there will have to be reprinting and in gases revising. In such circumstances, withough appears to be a destances patience appears to be a desirable and necessary quality.

Minard's Liniment Cures Burns, etc. WAR-TIME AND TANGO.

(Philadelphia Record)

The impending inhibition of the tango in Paris is probably a part of the increasing seriousness of the pecole in the presence of an appalling war. It is impossible that a whole nation should go into mourning, or that it should wholly abandon its recreations. But there are considerations of propriety, and the tango may well be looked upon as an unsuitable recreation under present conditions. A nation struggling for its existence, and in which almost every family has been bereaved, may very well proscribe the wilder manifestations of mirth and the gross forms of dissipation.

Matches may be made in heaven, but there are lots of match-making mam-

Danger Signals Warn You of Approaching Paralysis

Slowly and Surely Exhaustion Goes on Until Collapse of the Nerves is the Natural Result.

You may be restless, nerveus, irritable and sleepless, but you think there is nothing to be alarmed at. You have no appetite, digestion is impaired, and there is weakness and irregularity of other bodily organs. You feel tired in bedy and mind, and find that you lack the energy to attend to the daily task.

You may not realize that these are the symptems of nervous prostration and the danger signals which warn you that some form of paralysis is the next step of development.

Dr. Chase's Nerve Foed is the most successful restorative for the next successful restoration and the next successful restorative for the next successful restoration and the next successful restorat

DEATH HOOK OF THE AIR.

Bomb Device Evolved by an American to Destroy Dirigibles.

The horrors of the Zeppelin dirigi-The horrors of the Zeppelin dirigibles seem now to have encountered an invention that will put them out of action and end their apparently irresistible bomb dropping. It is an American invention, that of Joseph A. Steinmetz, president of he Aere Club of Philadelphia. It is a destroyer of aircraft, said to be farther reaching than any bomb dropping device or aerial gun invented. It bears the same relation that the torredo destroyer relation that the does to a navy. that the torpedo destroyer

does to a navy.

An aeroplane cannot carry the amount of explosive that a dirigible can, but it is faster and the Steinmetz device is to destroy dirigibles as well as other aeroplanes, for it is to be mounted on the swiftest of planes. It

is a bomb with contact devices, hooks springing out on all sides.

It is let down by a slender wire from the aeroplane, which swiftly meunts above the slower dirigible. When the latter comes in contact with the wire this draws up until the hooks of the bombs, like the tentacles of a spider, become attached, and the explosion follows. The apparatus is simple and is characterized as one of the most terrible of death dealing devices.

> NO SQUEALER (Detroit Free Press)

Johnson may have lived like a deg, but he died like a man. His most bitter hater, white or black can do him that honor. There have been champions of the Caucasian race who say their laurels stripped from them with less commendable bearing.

And he took his defeat man-fashion.

There has no whimper, no excuse, no plea that he was drugged. 'I was beather by a better man, was his only comment. It is the fitting farewell of a champion to his honors.

BETTER THAN SPANKING

Spanking does not cure children of bed-Spanking does not cure children of bedwetting. There is a constitutional cause for this trouble, Mrs. M. Summers, Box W. S. Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Safest of Vaults.

The bank vault in the new office of The bank vault in the new office of J. P. Morgan, at Broad and Wall streets, New York, is the largest in the world, and, it is sought, the most secure. It represents an expenditure of \$200,000, and the door alone, which of \$200,000, and the door alone, which was made of Harveyized armor steel, cost \$75,000. The vestibule of the door is 11 feet 6 inches in diameter, and the door itself 9 feet in diameter, with the door itself 9 feet in diameter, with a thickness of 45½ Inches. It is controlled by two 5-inch bolts, which in turn are controlled by two combination lecks, and these by a time lock. The door swings on a crane hinge with heavy-pressure mechanisms to force it to its seat and to make the joint tight. This prevents the introduction of any explosive of a liquid nature. The plates are made of the nature. The plates are made of the full thickness, and are not held to-gether by screws or bolts, but are dovetailed on the haer edges. After dovetalled on the inner edges. After being fitted tightly together wedges are driven on the inside to hold the plates solidly to their place. The door and vestibule attached to it weigh 120 tons. Despite its enormous size, the door has been so accurately constructed that when closed it will make an air-tight and water-tight joint. Minard's Liniment Cures Dandruff.

Metals at Absolute Zero. Prof. Dien has recently published some interesting observations on the behaviour of metals at the absolute zero of temperature. The infinite electrical conductivity of metals at absolute zero, which has been rendered very probable by the work of Kamerlingh Onnes, is explained if we assume that the distribution of molecules at the lowest temperature is per-fectly regular, so that the displacement of electrons along certain lines encounters no resistance. By increasing the temperature the molecules are set in a state of thermal agitation and the free path of the electrons is reduced; whence the electric conductivity is reduced also. It appears probable that temperature evaporation affects only the mean free path and not the num-ber of electrons nor their mean velocity.

ANTHEM TITLES.

Immune.

A mounted policeman riding through Central Park came upon some little girls picking handfuls of flowers.

"Hurry up," he heard them say.

"Teacher is liable to eatch up any min-

otte."

Dismounting from his horse, he grasped one child by the arm.

"Stop it!" he thundered. "You know it's against the law to pick the park flowers! Why, I could arrest you for this, and I'm not at all sure that I won't go ahead and do my duty!"

The small girl wriggled from his grasp. "Ohe stop your fushing and so

The small girl wriggled from his grasp. "Oh, stop your fussing, and go along!" she said contemptuously as she watched a tall woman hurrying along the path "You can't pinch us. Why, we're pinched already. We all come from the reform school."—Everybody's.

WEIGHT OF AIR.

One Cubic Foot of Atmosphere Weighs More Than an Ounce.

The common belief that air weighs nothing or almost nothing, a belief which has given rise to the simile,

"light as air," needs correction.

A toy balloon filled with a cubic foot of air weighs 564 grains more than the same balloon collapsed. This shows that the weight of a cubic foot of air is 564 grains, which is a good deal more than an ounce. Accordingly a small room (15 by 15 by 10) containing 2,250 cubic feet of air would weigh 2,900 ounces, or 183.7 pounds avoirdupois, as much as a large man. Could you lift a room full of air?

The air in an automobile tire under pressure of 150 pounds a square 11ch weight proportionately ten times as much, while air under the pressure of 1,600 times as heavy as gaseous air, or as heavy as water.-St. Louis Post Dispatch.

To whom it may concern: This is to certify that I have used MINARD'S LINIMENT myself as well as prescribed it in my practice where a liniment was required, and have never failed to get the desired effect.

Why We Oppose Pockets for Women. 1. Because pockets are not a nat-

ural right. 2. Because the great majority of wo

men did not want pockets.
did, they would have them.
3. Because whenever women 3. Because whenever women have had pockets they have not used them.
4. Because women are expected to carry enough things as it is, without the additional burden of pockets.

5. Because it would make dissension between husband and wife as to whose pockets were to be filled.

6. Because it would destroy man's chivalry toward woman if he did not have to coarry all her things in his

have to carry all her things in his pockets.
7. Because men are men and wome

face of nature.

8. Because pockets have been used by men to carry tobacco, pipes, whiskey flasks, chewing-gum and comprokey flasks, chewing-gum and compromising letters. We see no reason to suppose that women would use them more wisely.—New York Tribune. Minard's Liniment for sale every-

"BILLY" SUNDAY'S WORK.

"BILLY" SUNDAY'S WORK.

(The Presbyterian)

Rev. W. A. Sunday, popularly designated "Billy" Sunday, has closed an eleven weeks mission in Philadelphia. An exchange says that over two minor presents and about forty thousand made confession of Christ. Philadelphia religious workers say that they have seen nothing like the work that Mr. Sunday has done since the great revival there under George Whitefield.

THE JITNEY BUS.

Live Subject Treated by a Disgruntled Patron.

Live Subject Treated by a Disgrum
Patron.

A San Francisco paper printed
beautiful and touching peem:

At twas palaing
And it was late
And a fitney bus
Game along
And it was felt.

And a patron
And it was felt.

But they went right on
Picking em up
Picking em up
Picking em up
Picking in up
Picking in
Picking in up
Picking in

Give everybody
Seats."
And he put his head in
And dripped water
All ever me
Agaia
And said:
"Would you mind
Reaching out
And taking held
Of the sleeve
Of my ceat?
I can't held on
Any longer."
And I did,
And we get off
At the same corner
And he kept me standing
In the rais
Walle he roasted the
Street-car company.

EFFERVESCENT DRINKS.

They Allay Thirst Quickly, but the Effect is Not Lasting.

The reason why we like effervescent drinks is that the slightest stinging or pricking of the palate that follows on drinking liquids charged with earbonic acid gas produces immediately an increased flow of saliva and thus diminishes for the moment the sensation of thirst. But the relief they bring is only

temporary and is followed by a renc-tion in which the thirst is actually in-creased. The salivary giands are not more susceptible to respectual stimulation than any other, and after each period of excitement one of depression supervenes. Young soldiers en route marches quickly come inderstand this and to discover that the more water they drink the more thirsty they get and that it is best, therefore, to limit the quantity of liquil swallowed. Moreover, the saliva contains matters of treat investment for the saliva contains matters of great importance for the digestion of tood particularly of starchy foods, and if it all be washed down the throat into the bowels as soon as it is secreted a great part of its usefulness is loct.

It would therefore seem that a less wasteful way, physiologically, of moting the flow of saliva might adorted with porfit. The consumption of fruit containing subacid juices is about the most excellent way.—St. Leuis Post Dispatch.

title of a book review in one of the literary periodicals. The book is "Sword Blades and Poppy Seed," by Miss Amy Lowell, and contains bobtail verses not worse and certainly not better than most of the semi-rhythmic chunks of language issued nowadays from time to time under the poetic license called "vers libre." Here is a sample—"A London Thoroughfare at 2 a.m.":

It has white lamps, She cannot light the city Through the plum-colored night.

Clear and round, The moon cuts Opposite my window
A river leading nowhere: With the silver barred street in the

midst. Night waikers pass along the side-Tramps doze on the window ledges.

Between them I hear the shuffling

And then another

Barred with silver and black— Like a slow-moving river

Cold, white lamps It shines in the glare of lamps. They have watered the street.

Oh, shucks! The linotyper went and printed this backward. But that is one of the nice things about this "vers libre"; it doesn't matter much where you begin or which end you bite off first. As Miss Lowell's reviewer (and first. As Miss Lowell's reviewer (and publisher) puts it in an esoteric weekly: "Though it lacks the serviceable first aid to the memory of rime, how haunting and in the finest sense memorable, is the picture. It is hard..." Yes, brother, it is even tough. But wouldn't a real live poet like Walt Whitman have chuckled at the pale echoes we have nowadays of his old full-bodied work?—Collier's. ARE YOU!

DON'T WASTE TIME.

Many Men Have Accomplished Wonders in Their Spare Moments.

Great men are economical in their ise of time. They not only work hard for hours together, but they also save the spare minutes which most persons waste in profitless employ-

ment. As the distinguished naturalist Cuvier rone from place to place he FUTURIST POLTRY

"Poetry for Poetry's Sake" is the read and thought, and the results of his saving these odd quarter nours are seen in his books.

Napoleon, as he hurried over Europe in his camp carriage, was busy in planning for the government of conquered countries and in contriveighteen languages and twenty-one dialects by the economical use of time. While he worked fourteen hours a day at his trade of a blacksmith

he found a few minutes each morning evening to study Latin His Greek grammar would fit into the crown of his straw hat, and as he stood at his furnace, waiting for the fusing of the metal, he would eatch it up and commit to memory a part of a Greek verb.

Sir William Jones, the Oriental scholar and a judge, in the suprema

scholar and a judge in the supremo court of India, had so well improv-ed his time that before he reached the age of twenty-one he knew Greek Latin, several modern languages and had studied the Arabic and the Fer-sian. His use of the spare minutes nade him both learned and farnous.

John Wesley said: "Never be unemployed; never be triflingly employed; never while away time."

So Goethe, the great German poet and thinker, said:

"The not wait for extraordinary one

"Do not wait for extraordinary opportunities, but make use of common situations."

Be careful of the minutes, and the

hours will take care of themselves.

Odd Effects of Hydrochloric Acid Some very singular and unexplained effects of hydrochloric acid upon

silica are brought out in M. Armand Gantier's paper recently read before the Academie des Sciences. In his rethe Academie des Sciences. In his re-cent experiments on this subject Gan-tier finds that the effect of the acid varies widely according to the form of the silica. In the shape of rock crystal the acid attacks it but slightly. Some action can be detected when the crystal is cut parallel to the axis, but it is practically nothing upon the surface when cut across the axis. The reason for this difference is unknown
