SEWERS! SEWERS!!

More Weary Hours of Discussion by the City Fathers—Sanitary Engineer Mohan's Salary.

Proposition From the Esquimaux Waterworks That the City Subscribe for Stock.

In olden times, when the hands of the big clock at the City Hall pointed to 8 o'clock, His Worship the Mayor used to mount the civic throne, and the nine aldermen, faithful and true, would file in and take their places at the board.

A report from the Finance committee recommending the payment of accounts amounted to \$4,600.20.

Ald. BRAGG—How much of that is for the sewerage engineer? THE MAYOR—\$250.

Ald. BRAGG—I would like one of the members of the Sewerage committee to tell the Council how long it is proposed to keep Mr. Mohan on.

Ald. BAKER didn't think the Sanitary Engineer was earning his salary of \$350 a month, and didn't see why a man of that kind should be kept in that position.

Ald. BELZEA wanted to know what the vote had to do with the personal trade against the Sanitary Engineer.

Ald. BAKER continued that such a sum of money should not be paid out of the revenue. Here was \$350 to be paid for the Sewerage Engineer and his assistants, and the city had not received ten cents benefit.

Ald. McKILLEAN—We ought to confine Ald. Baker to the question. He keeps on singing the same old song, and if that continues, we will never get through our business.

Ald. MUMF had been unable during the year to see where the city got value for the money paid the Sanitary Engineer.

Ald. BELZEA wanted fair play for his discussion. He did not think the public mind was yet clear on the "occasional point," and the matter should be more fully discussed.

Ald. BAKER and Styles filled in the time until 10:15 p.m. The report of the finance committee was then adopted on the following resolution.

Ald. BELZEA wanted fair play for his discussion. He did not think the public mind was yet clear on the "occasional point," and the matter should be more fully discussed.

Ald. BELZEA wanted fair play for his discussion. He did not think the public mind was yet clear on the "occasional point," and the matter should be more fully discussed.

THE GREAT ECLIPSE.

Scientists and Peasants Gather on the Chilian Mountain Top to Witness the Conjunction.

Pen Picture of the Scene by One of the Favored Few—Seenes Long to Be Remembered.

The strange vision continued for two minutes and a half, scientific cameras and drawing pencils making strenuous efforts to transfer something of the scene to the pages of bright paper.

At the sixth second a silver glimmering of light showed above the moon's upper limb, and the sun gradually uncovered, displaying all his old vigor by sending the mercuries up to 96°.

Mr. King, "Vivus per los astronomos" showed how relieved and grateful the unopinionated Chilian towards the wonderful magicians of the tube, and how thoroughly they appreciated the third contact.
