--Country Merchants Are in a Happy Mood and Anticipate Big Things-En-ingred Wants of the Farmer. Just as the movement of saw logs in mid-stream is accelerated as the rapids are approached, so the movement of merchandise is quicker and heavier as the zenith of the fall trade is reached. Around the ware houses, in the stread stores, in the banks and in the streads increased activity is every-brighter. The farmers have been running as close to shore as possible for the last few years, Now they have got bigger and better crops than

as close to shore as possible for the last few years. Now they have got bigger and better crops than for some twenty-five or thirty years. On top of this they have good prices and with excellent prospects of their being main-tained. As a natural result they will sail in bigger boats and consequently farther from shore. The country merchants, who have kept their stocks at the lowest possible ebb, will need larger supplies than usual. Al-ready the first breezes of the good times in store have touched their sails and they find it, necessary to re-plenish with a regularity pleasing to the wholesalers. Next month the activity is expected to be more marked. The woolesale trade is determined to take advantage of the present bright condition of things to enforce payment of bills due at maturity. "We are," said one leading whole saler to The World, "pushing the retailers for payment in every instance. They in turn will of course push the farmers who are indebted to them. The farmers have good

THIS YEAR'S GREAT CROP. turn will of course push the farmers who are

crops and good prices, and it is their duty to Mr. B. E. Walker's Visit Through the indebted to them. The farmers have good sell their grain and liquidate their liabilities to the country merchants." Mr. B. E. Walker, general manager of the

of holders has received a noticeable shock and we think news of to day is likely to bring a good many selling orders to morrow. Corn was af-fected more than wheat by suspension, as the firm has been principally representative of the Eastern built clique. On the opening decline, shipping houses were heavy buyers of near de-liveries which caused active buying of late futures to cover short sales and worked a partial recovery, but we can see no tendency toward a permanent advance in October corn. Provisions By virtue of a Warrant, as subjoined, issued by the Mayor of the said City of Toronto, and bearing date the Tenth Day of September, one thousand eight hundred and ninety-one, for the collection of arrears of assessments due upon the undermentioned Lands in the said City, all such being patented Lands, I shall

Beena attention pain to the fork Stock Exchange. of stocks deakt in on New York Stock Exchange. Kennert, Hopkins & Co., to R. Cochran: Shorts absorbed the offerings of September and October corn on sort spots all day long and it is believed this interest is now pretty well out. There was also peod buying by shippers, one firm alone having taken 1,500,000 bushels. It is usual for receivers to carry stocks for conveni-ence at other lake ports than Chicago. Latterly it ins practice has been abandoned, but with the breaking of the corner, it is likely to be again resumed. The decline in values has also greatly stimulated export trade and it will have a tendency to check the receipts for the present. This moy offset the effect of closing up so large a short interest and prevent materially lower prices until there has been a further readjust-ment of conditions. Oats have been weak in sympathy with corn, but jook like a purchase on little breaks. The bears underfook to raid the provision market at opening, on the suprestion that it would follow corn, but offerings were quictly absorbed by good parties and prices re-covered easily. We would not trade in the short. Proceed to sell the said Lands by Public Auction, or such portions thereof as shall be necessary to pay such arrears, together with all charges thereon, unless the same be sooner paid.
