Vol. I.

ST. JOHN, N. B., DECEMBER 1, 1882.

No. 4.

THE REMINGTON TYPE WRITER!

D. R. JACK,

Sole Agent for New Brunswick and Nova Scotia.

**This Machine is one of the most Wonderful Inventions
of the Nineteenth Century.**

IT SAVES INK

IT SAVES PEN-HOLDERS,

IT SAVES BLOTTING-PAPER,

IT SAVES TIME.

NO SPILLING OF INK,

No annoyance from Greasy Paper or Cold Hands.

To write with this Type-Writer, all that is necessary is to put in a sheet of paper and touch the keys. It is perfectly simple, and no difficulty whatever need be experienced by any one. A child that is learning to read can write with this Machine as soon as it can spell.

By using carbonized paper several copies can be made at one operation.

A press copy can be taken from any of the writings, that is as easy to read as the original.

Any person of ordinary ability can write two or three times as fast with this Machine as with a pen, in the course of a few weeks.

It requires no inking, all the ink is on a ribbon that moves across the surface of the paper as the writing progresses.

It very seldom needs oiling.

Call and examine the Machine at

ROOM 3, PUGSLEY'S BUILDING,

CORNER OF PRINCE WM. AND PRINCESS STS.,

Or write for particulars to

D. R. JACK,

P. O. BOX 223, ST. JOHN, N. B.
