#### SCIENCE NOTES.

Recently a new boot has been introduced by a British manufacturer, in which a single spring is placed at the back of the boot, in the space above the heel. The elastic is said to be safer liable to wear out and to give the ankles more freedom to move.

Within a few months past markings have been seen on the surface of the relate to this importance and timely subsurface of the planet Venus which gives promise that we may be able to learn something concerning the poles, the mountains, the continents and the seas of that distant world. Mr. Trouvelot has discovered what he regards as probably the snow-clad summits of mountains thrust up through the cloudy atmosphere in the neighborhood of its poles. The mountains, if they exist, must be of its cost in labour, which is very nearly amazing height.

Herr Wenstrom, a Swedish engineer, has invented a machine for separating iron ore, apparently one of great utility. A hollow. cylinder is caused to rotate horizontally by means of cogwheels at its ends. In the centre of the cytinder is a kind of drum of iron bars which is made highly magnetic by an electrical apparatus. Iron ores are fed over the cylinder as it rotates, and the fragments adhere to it so long as the magnetic ac tion of the iron drum suffices to offer the necessary action, but fall off on the reverse side in three distinct heaps, according to the richness. The feeding must be done very carefully and the ores must first be crushed. The power required is very small.

The valley of Limagna, in Auvergne, affords a striking instance of the important functions which certain winds perform in fertilizing the ground. There the prevailing west and southwest winds traversing the chain of Domes, which contains vast deposits of volcanic ashes, carrying much volcanic dust to the valley, where it settles. As this dust contains a large proportion of phosphoric acid, potash, and lime it constitutes a manure of a very high fertilizing quality, and its minute state of subdivision admirably adapts it for ready assimilation amount of filth to be deodorized, and the by the soil over which it is distributed, length of time during which they will rendering the valley remarkable for its be effectual will depend upon local convegetation. The annual ash deposit ditions, there is estimated at from 348 to 400 grams per square metre.

A St. Louis man has invented a new instrument for the deaf. It consists of a contrivance which can be located in the handle of a cane, umbrella, parasol or fan, and which, when placed to the ear of a deaf person, will cause him or her to hear any sound audible to the ear of a person who is not afflicted with deafness. The device which produces these effects is a tube about six inches long. In the tube is a cone shaped electric coil beginning at a small battery at the lower end of the tube and terminating in a bird's bill. The vibration of this coil causes multiplication of any sound or noises passing into the tube through several slits, in the side of the cane. It is simply a multiplication of sound by electricity and the projection of a steady current of electricity against the weakened or paralyzed nerves and tissues of the ear. There it no degree of deafness in which a man cannot hear with this.

# THE ANTICHINESE CRUSADE.

The London Times, commenting on the anti-Chinese crusade on the Pacific coast says, "If Chinese immigration into the United States was thoroughly blocked for a period the Chinese might meet with favorable opportunities at home and their immigration into the United States altogether diverted. The attempt to turn back the tide of foreign colored labor by the means resorted to by mobs in the western part of the United States is odious, and the injustice done Chinamen in the recent attacks upon them is an act of spoliation committed against the world at large.

A young lady being very fussy about having her shoes small and neatly-fitting, her stern aunt said: "In 'my' time the men looked at the women's faces instead of their feet!" "Ah, but my dear aunt," retorted the pretty young lady, "you see that the world has improved, and is more civilized than it used to be-it looks now more to the understanding

At a negro wedding, when the minister read the words "love, honor and obey," the groom interrupted him and said: "Read that agin, sah; read it wunce mo,' so's de lady kin ketch de meaning. I'se been married befo'."

"Has my client anything right," aska counselor, out of patience of a brother wrangler at the bar. "I know not," was the response. But one thing is certain-have nothing left."

#### AGRICULTURE.

### News of General Interest. Culture of Wheat.

Now that farmers are contemplating the sowing of wheat, and at the same there from friction, and therefore less time considering the very unprofitable price at which grain selling and the poor hope for any advance, it is well that they should study the various quetions which ject. There is too much wheat on the market if we take one view of it; or, if we take another view of it, the cost of wheat is too great for profit. Which is most likely. A farmer whose wheat costs him 40 or 50 cents a bishel can make money even at the present low prices. The cost of wheat is regulated by the quantity grown per acre; or, in other words, by a fixed sum per acre. The farmer who grows 30 bushels per acre produces wheat at about 1 the cost of one who grows only 20 bushels. It is clear the lone farmer has nothing to complain of in res pect of the present value of wheat, it is ruinons .o the other.—N·Y.Times

#### Agricultural Notes.

A soil may be abundantly rich in everything except for instance, phosphoric acid. Ten dollars worth of dried bones applied to such a soil will be of more value than a hundred dollars worth of ordinary putrescent manures. The ground bones in supplying phosphoric acid, meet the deficiency, the only deficiency, of the soil; the putrescent manures, heavily applied, meet the deficiency also; but they increase ten fold the labor and expense by supplying at the same time otner things not needed.

Two pounds of copperas, or sulphate of iron, dissolved in a pail of water will greatly assist in purifying a privy or cess pool. A pound of nitrate of lead will when dissolved in the same way, cleanse sinks, drains, etc. Chloride of lime 18 also effectual, or a layer of charcoal dust will prevent offensive odors arising from decomposing substance. The quantity of these substances will depend upon the

CANADA.—By the Right Honorable Sir John Alexander MacDonald, C.C.B., Superintendent teneral of Indian afiairs. To all whom these presents may come, or whom the same may in anywise concern.—Greeting. Whereas it is in and by the Act of the Parliament of Canada, passed in the forty-seventh year of Her Majesty's Reign, chaptered twenty-seven and intituled "An Act further to amend the Indian Act, 1880," amongst other things in affect enacted, that the Superintendent General of Indian Affairs may when he considers it in the public interest to do so, prohibit, by public notice to that affect, the sale, gift, or dispressl to any Indian in the Province of Manitoba or in any part thereof, or in the Northwest Territories; or in any part thereof, of any fixed ammunition or ball cartridge; and every person who after such notice without the permission in writing of the Superintendent General, sells or gives, or in any other manner conveys to any Indian in the section of country thus prohibited any fixed ammunition or ball cartridge, shall incur a penaity of not more than two hundred dollars, or shall be liable to imprisonment for a term of not more than six months or te both fine and imprisonment within the limits aforesaid, at the discretion of the court before which the conviction is had; Now know ye, that I, the said Right Hondrable Sir John Alexander Macdonald, Superintendent General of Indian Affairs, considering it to be in the public notice that the sale, gift, or other disposal to any Indian in the Northwest Territories of Canada or in any part thereof of any fixed ammunition or ball cartridge is hereby prohibited, and that every person who, after this notice, without the permission in writing of the Superintendent General of Indian Affairs for the time being, sells or gives away, or in any other manner conveys to any Indian in the Northwest Territories of Canada, or in any part thereof any fixed ammunition or ball cartridge, whe incur the penalties of the said Act. In witness whereof I have hereunto subscribe

# IMPORTATION IN 1879,

49,312 Cases,

22,526 Cases more than of any other brand.

CAUTION,—Beware of imposition or mistakes, owing to the great similarity of caps and labels, under which interior brands of Champagne are sold.

In ordering G. H. MUMIN & COM Champagne, see that the lubers and ecolis bear its mame and initials.

## PROSPECTUS OF ST. MARY'S ACADEMY

Directed by the Sist of the Holy Names of Jess and ary,

WIN E MAN.

The Sisters are happy to inform their Friends and the Public that the new and commodious Building which they have recently erected will enable them to bestow additional care upon the education of their Pupils.

The Teachers will devote themselves with unremitting attention and labor to the intellectual culture and moral training of their Pupils' as well as to forming their manners to the usages of polite society.

Pupils of every denomination are admitted and no interference is made with their religious convictions; they are, however, required to conform to the general rules of the Institution, polestic forms

and no interference is made with their religious convictions; they are, however, required to conform to the general rules of the Institution.

The Scholastic Year, comprising ten months, consists of two sessions, commencing respectively on the Third Tuesday of August and the third Tuesday of January.

Terms—Board and Tuition, per Session, \$60.00. Music Lessons and Use of Piano, \$17.50 Private Singing Lessons, \$20.00 Oil Painting, \$20.00. Drawing and Painting (Water Colours.) \$7.00. Bed and Bedding, if furnished by the Institution, \$5.00, Washing \$15.00. Entrance Fee (payable once) \$5.00. Each Session is payable in advance. Singing in Concert. Calisthenies, Sewing and Fancy Work do not form extra charges. The uniform which is worn on Sundays and Thursdays, consists of a black Merino Dress for winer, and a black Alpacer for Summer. Parents before making the above dresses will oblige by asking information at the Academy, Ifdestrable, material will be supplied and made up at the Institution, when paid for in advance. Each pupil should be prayided with a Tollet Box, a Knife, Fork, Tea and Table Spoons, and a Goblet; also a sufficient supply of Underlinen, Six Table Napkins, Six Towels and a Black and White Bobinet Veil.

Parents residing, at a distance will please furnish sufficient funds to purchase such clothing as may be required, also materials for Drawing, Fancy Work, etc. Pupils from other institutions will not see admitted without a recommendation from Superiors. Books and Letters are subject to the inspection of the Directress. Pupils are admitted at any time, charges dating from entrance. No deduction will be made for partial absence, or for withdrawal before the close of a session, unless in case of Illness, or for other grave and unavoidable reasons. Pupils are allowed to three c'clock, and on Thursdays from one to five p. m. Only Parents, Guardians and such persons as are duly authorized, will be admitted. Address
