

# FRANK ACKNOWLEDGMENT

BY A  
CHICAGO PAPER.

In commenting on the Canadian Exhibits at the World's Fair, "The Farm Implement News" (published in Chicago), the leading Implement Trade Journal of the United States, says of the Massey-Harris Exhibit, in their issue of Sept. 28th last, as follows :

"In the Implement Annex they [the Canadians] occupy more space than any other foreign people and their exhibit attracts much attention from practical visitors, especially Americans, on account of the advanced style and excellent construction of their goods.

"And further, we must frankly acknowledge that one Canadian concern, MASSEY-HARRIS Co., Ltd. with head office in Toronto, and factories in Toronto, Brantford and Woodstock, have the largest, the fullest and the finest exhibit in the whole building. It is hard for an American to concede so much to a foreign company, but we can do so more readily and gracefully inasmuch as Canadians are also Americans, and are the whole very good neighbors.

\* \* \* \* \*

"The Massey-Harris 'Wide-Open' Binder, standing in the south-east corner of the space allotted to be the best finished and most expensive binder on exhibition, and certainly it seems as if taste and workmanship could go no farther. The same can be said of other machines shown, and there are so many of them in all that it would be useless to attempt to describe in detail their distinctive features and merits. It is sufficient to say that the machines and implements composing this full and complete exhibit are the latest and most improved styles in their several classes, and are uniformly symmetrical in form, their work being modern productions throughout."
