

The New Fisher Automatic Variable Speed Sander Combines all the Best Features Known to the Woodworking World

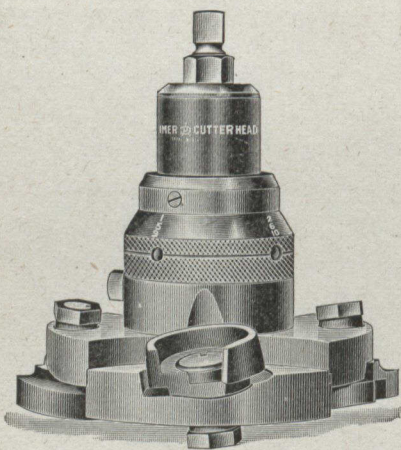

View of Sanding Machine

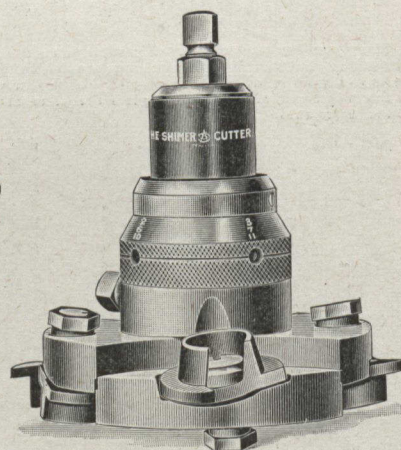

Takes either veneered or solid stock direct from the press and finishes **without any hand work** ready for the varnish room. The Variable Speed of pressure shoe prevents blistering or burning of stock. Owing to the open end the operator can sand material double the length of the table and can sand out any flaw in stock without reducing the thickness of edge. Operator has full control of all adjustments while machine is in operation.

THE SHIMER CUTTER HEADS SAVE TIME AND TROUBLE

THE SHIMER CUTTER HEADS for flooring, ceiling, siding, ship lap, jointing, double ceiling, doors, sashes, blinds, etc., do more good work with less labor and expense than will any other. The Bits are securely bolted to convex seats that give to their cutting edges a clearance peculiarly suited for FAST CUTTING AND SMOOTH FINISH. They are ever ready for service and turn out positively uniform patterns. A fine adjustment for the Cutters is provided for by the Expansion feature.

Send for our Catalogue and Pattern Book. It gives illustrations and complete description of a number of these tools, some of which will be of advantage to you.
