Fax: 204-694-5586
Export Contact: Mr. T.J. Clark, President

Acme Chrome Furniture Limited, founded in Winnipeg in 1946, began as a manufacturer of tubular steel kitchen suites satisfying post-war consumer demand. It grew to include restaurant and hospitality furniture. By 1966 the product line had been further expanded to include furniture for education facilities necessitating the construction of a new 6,000 sq. meter factory designed specifically for the manufacture of steel furniture.

Office products manufactured include a complete line of ergonomic and stationary seating, and library and computer tables. In addition, they have also acquired the capability to provide furnishing for acute and extended health care facilities. In 1989 a new electrostatic powder coat finishing facility was opened to provide company products with the latest technology in environmentally favourable metal coating capability.

The long service contribution of many key employees has allowed the company to provide consistent quality to the market place. Today more than 60 employees work together to manufacture products for the contract industry which are marketed under Accro Furniture Industries. Every day thousands of people utilize furniture manufactures by Acme Chrome Furniture Limited in a wide variety of installations throughout Canada and many parts of the United States.
