QUERY frequently made is whether cocoa may be used with good results for the dishes and purposes for which chocolate is advised.

Probably the most satisfactory reply would be-try it and see. How-

SUGGESTS PLAYS

American Plays Not Desirable for Canadians, Tells Woman's Canadian Club.

Previous to the address of Bernard K. Sandwell before the Woman's Canidian Club vesterday afternoon, there nay have been some who were largely in doubt as to the meaning of the subject, "Adjunct Theatre," upon which the visitor from Montreal was billed to speak. Before the end of he address all doubt had been renoved. The "adjunct theatre" means simply Canadian theatrical art under existing conditions, depending as they pifices of New York, a condition which places them in a subordinate situation to which the name adjunct was ap-plied by the speaker. Canada Has No Theatre.

Canada has no theatre, nor have any Canadian plays been produced outside of those produced in French and coming from the French-speaking stage of Montreal. Toronto is called a what plays will be produced in our

In the "Stage Year Book" Canada a not mentioned the six pages are evoted to the stage in Australia. Even Africa has its dramatic work. in deprecating the fact that Canada ispends largely upon the will of the pooking offices of New York, Mr. Sandwell said that some managers night arise and say that nothing appears upon our boards but what they wish to see there. In that case, said he these managers must want some strange and very inexplicable things. Remedies Suggested.

After tracing the course of the Brama of Toronto from the stock companies of the 70's to the occasional traveling company, and on to the systematized companies of the circuit, he suggested remedies. In the States today the drama is the most national thing in the country. Naturally this American drama is not exactly what Canadians are most desirous of hav-mg. To remedy this one suggestion was to have existing circuits supplied with plays from England, Germany France or elsewhere for Canada alon Another suggestion is that Montreal and Toronto get together to have a theatre controlled by them to be used for artistic purposes and to procure plays acceptable to Canadians. An Art League of Montreal was already formed and was working on the matter. Money was necessary. Mr. Sandwell stated that people gave money for every other form of art, but not a dollar to advance the cause of the theatre. The last statement of the speaker was that Canada is the land that has its theatre conrolled by a foreign country.

Free Demonstration Right In Your Own Home

Let one of our salesmen de monstrate to you the good points about our Economical Home Gas Lights and he will prove to you before you buy that these lights are second to nane. These lamps are marvels of efficiency, durability and economy. Just imagine having a 100candlepower light right in your own home, and at cost of only one cent for three hours' burning. It is the ideal home light. It gives gas light at half the cost of electric light, a steadier light of a better color, a greater volume of light and better distributed.

BECAME A TEETOTALER FROM OLD COUNTRY With the Help of Samaria Pre-

scription.

Sandwell to Improve Canadian Stage.

Many men can't help drinking, even when they try—oh, so hard!—to stop. Not much wonder, when you consider how whisky has inflamed the membranes and nerves of the stomach, creating an awful torturing craving that is almost impossible to resist. About one man in twenty who tries can stop drinking of his own accord. The rest need help, and Samaria Prescription will not only help maria Prescription will not only help the man who wants to stop, but it wil stop the man who wants to drink, by removing that awful craving, build-ing up the system, and making drink distasteful, even nauseous. Samaria is tasteless and odorless, and can be administered with or without the patient's knowledge, in tea, coffee or

Mrs. E., of Vancouver, saved he husband from his torturing, burning thirst, which was rapidly carrying him towards disgrace and death by sending for Samarla Prescription. Read what she says:

Vancouver, March 29.

"I purchased, some three or four months back, a course of Samaria Prescription from Harrison's drug store, cor. Robson and Granville streets, of this city, which my husband was very willing and anxious to take, in the hope of the idiar him to correcome the craywilling and anxious to take, in the nope of its aiding him to overcome the craving he had for whisky, I am thankful to say that he did not need to finish the treatment, as, with the help of Samaria and his own wish to overcome the trouble, he has quite lost the drink craving, and is now a strict teetotaler.

General Diet Principles

Too much monotony in the food spoils the relish; the greediness with which a child will devour a different kind of bread is pathetic. Some children seem to be never satisfied. They eat a large quantity of food at meal time, and seem ready for more in an hour. In such cases I think the amount of food should be limited and very strict attention paid to the mastication of the food. A small quantity of food well chewed will satisfy much quicker than a big meal bolted.

Lisuelly a child who eats no much in seems to require a sleeping. Usually a child who eats too much in bulk has some element of the food in insufficient quantity. It may surprise some people to hear that a child may drink too much milk. Some mothers are imbued with the idea that if their children will drink milk they are well fed. Milk is a good food, but it must not be given to the exclusion of other Sometimes during the second and third year it is necessary to take utmost value in our gardens, for inaway the milk altogether for a time stance the Sweet Williams, the Wall in order to make a child hungry enough to eat other things.

Children vomit very easily. This is a fortunate provision of nature, because they have not the discretion about eating that adults are supposed plants. ceived, the fault doubtless being large- to have.

times, nursing babies should not vomit then a yearly succession of bloom takes much after feedin, and it is particu-place, exactly as if these plants were role of Shylock. The interpretation was generally up to the standard of mere ambitious combinations. The tinuously, or just before another feed.

The interpretation larly significant of something wrong perennials, but remember, they are not perennials.

The best way to get up a good hardy scene in Portia's house between its mistress and Nerissa was especially attractive, the furnishings of the palms and drapings and the costumes of the ladies and her suitors, particularly and the food cannot possibly remain June, thin out the plant when the time scene in Portia's house between its ladies and her suitors, particularly that of the Prince of Morocco, forming where it should. Tight clothing is a comes, keep hoeing all summer long, frequent cause of vomiting. Biennials are those seed plants which complete their life cycle in the second year from seed germination

Sown one year, the seeds develop more or less slowly, small plants spring up, some of which need not be transplanted, but most of which absolutely need the stimulus of transplantation, and the second year bloom takes place

Biennials will not bloom the first year, no matter how early the seeding takes place. The nature of biennials seems to require a sleeping time in the middle of their life to strengthen them up for the arduous task of ble

The second year bloom arrives, later seeds form and the plant dies out. It cannot be coaxed to live the third year because that is not the nature of the plant.

Several hardy biennials are of the Flowers, Canterbury Bells, Digitalis, Hollyhocks, Dianthus, Iceland Poppy Campanula, Pyramidalis, Brompton Stocks, Sweet Rocket, and I am sure I do not know how many other splendid

Some of these old biennials can be However, as we have stated many sown for two years in succession and

well fertilized beds and borders for

Biennials thus treated cannot but be beginning of almost anything. All acute illnesses of childhood, grippe, tonsilitis, pneumonia, scarlet fever, may begin with vomiting.

Usually, however, it is only that the child has overloaded his stomach or child has overloaded his stomach or carten some wrong food. It is usually transplanting in the spring and will be a grand success the following year.

Some of our well-known biennials are the Snapdragon, Sweet Scabiouses. Penstemons.

bloom in midsummer. Wall Flowers may become perennial if left year after year, this plant being one of the very few exceptions to the rule. But the practice of leaving the roots is not wise, because the plants become coarse and the bloom degenerates both in form and color.

A REAL PIANO BARGAIN.

An opportunity comes today to secure from Ye Olde Firme of Heintzman and Co., Limited, 198-195-197 Youge street, Toronto, a Nordheimer Upright Piano, only slightly used, at a big reduction from manufacturer's price. This piano is in walnut case, handsomely figured, highly polished, Boston fallboard, with full length swing music desk—an extra fine instrument taken in exchange on a Heintzman & Co. Player-Piano, It will be sold on the firm's easy payment plan.

COWLEY PLANS TO TEACH DEFICIENTS
