

DIAGRAM V.

SWEDEN.—SMALL-POX AND TOTAL DEATH-RATES, AND
STOCKHOLM SMALL-POX EPIDEMICS.

These death-rates have been calculated by myself from the official tables of Small-pox and total deaths, and populations in the Sixth Report, pp. 752-53.

The portion relating to Small-pox agrees with Diagram D, p. 129, in the Third Report of the Commission, but comes to a later date. The figures for the Stockholm epidemics are not given in the Reports of the Royal Commission except as regards the last and greatest of them. The others are from the same authority as in my former diagram—Dr. Berg, head of the Statistical Department at Stockholm, who supplied them to Dr. Pierce, as stated in his "Vital Statistics."

The Upper line, showing the death-rate from all causes, is from the five-year average mortality, and is on a smaller vertical scale (as shown by the figures at the sides) in order to bring it into the same diagram.
