the development of science along certain lines has made it very necessary to de-termine the degree of heat in furnaces and contained in masses of metal such as hugh steel billets. The discovery that two bifferent kinds of metal welded together produced a cur-rent of electricity was the means of in-venting a method of determining the quantity of heat, no matter how intense, says a writer in Harper's Weekly. The cerrunt is measured by voltage, and cer-tain temperatures produce certain values, in clourical strength, and that is the way the amount of heat is measured. spees of near and this has been found to be accurate. The principle is applied in a wonderful device known as the radiation pyrometer. It can stand at a considerable distance from the furnace or mass of moiten metal that is being tested and it will record the intense heat conditions accurately. It is an aid to better steel and iron produces, and as the world progresses it will be recorded as one of the great agencies of man to enable him to delve into the mys-teries of nature's laboratories. erles of nature's laboratories.

London Chamber of Commerce Urges Government Service.

Government Service. LONDON, Nov. 29.--(C.A.P.)-Chas. Bright in an address before the London Chambers of Commerce last night, up-on the position of the Atlantic cable, advocated the appointment of a com-mission with overseas representatives to investigate the question of imperial telegraphs. Referring to the recent analgamation of the Western Union and the Anglo-American and Direct Cable Company, he said that the Bri-tish interests were completely wiped out thereby. He said: "If Britain were to be de-pendent for communication with Can-ade and other oversea dominions upon American controlled cables, we should have to face the prospect of messages leaking out in Washington. No re-tiance can be prospect of messages leaking out in Washington. No re-tine codes." Mr. Brisht supported the view of the Imperial Conference as to the desirabil-ity of laying a state-owned cable be-tween the United Kingdom and Canada. It was decided to make strong repre-sentations to the government to co-overate with the governments of the dominions, especially Canada, for the stablishment of an independent, strict-ity all-British trans-Atlantic cable and land line, connecting with the imperial Pacific cable.
