TUESDAY MORNING

Mining Markets Develop Further Sagging Undertone

Another Bad Day for Cobalts Cheaper Stocks Sell Lower

Reaver, Timiskaming and Rochester on the Down Grade-Little Public Interest in Market.

PRICE OF SILVER.

Bar silver in New York, 55%c 62. Bar silver in London, 25%d 62. Mexican dollars, 44%c.

Standard Stock and Mining Exchange.

New York Curb.

Dominion Exchange.

Quite a Family Affair. PORTLAND, Me., July M. Scores of

people of the Deering district are plan-

ning receptions to Thomas, Benjamin,

and Fred Bustin and Catherine, Agnes

and Melvina Hamilton, three brothers and three sisters whose unprecedented triple marriage has just leaked out.

All six came here recently from the Provinces of Quebec and Ontario-

World Office. Monday Evening, July 11.

Speculation in Cobalt stocks to-day was practically without feature, tradng holding at a very low level thruwas downward, and especially was this marked in the case of some of the this marked in the case of some of the period of 11-2 points during the session, the shares declining to 21 1-2 under realizing sales. The security was practically lacking of support and at times it was hard to place offerings.

imiskaming was another weak isane, dropping back a point at 61. Ro-I chester sagged to 30 3-4, and was of-dering round that price at the close of the session. The other cheaper stocks were about steady with last week's close, the some weakness de-veloped in Little Nipissing, quotations

eing fractionally lower. Public interest in trading was flat, and to this fact was attributed the declines in some of the general special-ties. There is little demand for mining stocks at the moment, and while outside conditions may be said to favor the market, the continued weakness on the larger exchanges produced any change for the better in the minds of most market followers.

The latest thing in prospecting is the country around Great Pike Lake, about 40 miles southwest of Porcuthe country around Great Pike Lake, about 40 miles southwest of Porcupine, and a small-sized rush for that place is being made now. pine, and a small-sized rush for that place is being made now.

The trail leads down the Mattagard from Porchpine. Most of the prospectors in the bush around this camp have picked up their tents and hit the trail for a look at the new district. The formation is granite and schist, and the gold seems to be in quartz veins and stringers at the contact. Some excellent samples have been brought back to Porcupine, showing free gold.

Assayed \$568 a Ton.

The McLean Prospecting Syndicate of Ottawa report a find of free gold on their claims in the reserve soul of lots 5 and 6 of Tisdale. The yellow metal is coarse and well distributed thrucut the vein matter and wall schist. An average sample went \$568 per ton across the vein:

AT THE LAST LAP.

COBALT, July 11.—At last the final link in the Porcupine chain is being forged. The government crew having completed the road from Kelso to Fredge to Hill's and will begin immater as the colling of the prospection of the prospection

ickhouse Lake have transported their camo to Hill's and will begin imma-diately to cut a similar roadway into Golden City from that point.

The last pine miles of trail should

e completed before the freezeup if the work goes on as fast as the last part of the Kelso road was pushed ahead.

SENSATIONAL DEVELOPMENTS Wonderful Gold Values in Porcupine Camp, Says Boston Financial News.

Camp, Says Bostor Financial News.

The gold development of the Porcuple district in Ontario is sensational, says The Boston Financial News. At the 100-foot level of the great Timmins gold mine the ore is the richest yet encountered. The vein is ten feet wide, and all the way down chunks of ore running thousands of dollars to the ton have been mined. It is impossible to tell the average, but it must run several hundred dollars to the ton. A drift has been started on the vein to connect with No. 3 shaft 700 feet away. Should these sensational gold values continue while drifting and sinking on this vein, the Timmins gold mine of Porcupine will rank among the most famous of the world.

But these wonderful gold values are being developed, and this wonderful field is being explored to the west of the Timmins mine for 25 miles, and sensational veins found there. Ontation has already astonished the world by the wealth of her nickel and silvermines, but if these wonderful gold developments continue, Ontario will assemble to the wealth of her nickel and silvermines, but if these wonderful gold developments continue, ontario will assemble to the wealth of her nickel and silvermines, but if these wonderful gold developments continue, ontario will assemble to the wealth of her nickel and silvermines, but if these wonderful gold developments continue, ontario will assemble to the wealth of her nickel and silvermines, but if these wonderful gold developments continue, ontario will assemble to the wealth of her nickel and silvermines, but if these wonderful gold developments continue, ontario will assemble to the wealth of her nickel and silvermines, but if these wonderful gold developments continue, ontario will assemble to the wealth of her nickel and silvermines and the following prices on the New York curb:

COBALTS 60 DAYS DELIVERY

There is a great opportunity at the present low prices to buy Cobalts for delivery two months hence. A premium has to be paid on the cash prices, but two months give a latitude for a rally in the market and profits can be made by those who deal in this way. Purchasers on these contracts deposit 25 per cent. of the cost of purchase in cash or listed shares. We buy either for future delivery or cash any of the Cobalt Stocks, and also deal in all unlisted securities.
