In recent years the Health League of Canada has achieved notable successes - as explained in previous letters - with the aid of public spirited citizens like yourself.

This year an even greater educational job must be done, and your support is again earnestly invited.

We have a War to win - and national Health is Vital to Victory. It is estimated that 54,000 Canadian men are ill at any given time. This is equivalent to more than three divisions of Canadian soldiers.

Today every Canadian civilian is needed for active service at home to give the utmost support to our boys at the Front. Let us get together to fight Sickness and Disease as vigorously as our soldiers are fighting the German invaders.

Save the money that Sickness is stealing from you, and put it to work productively for your family and your country.

The Health League of Canada is READY, EAGER, and EXPERIENCED to do that - with your help.

Sincerely yours,

P.S. One of the Health League voluntary canvassers will call upon you during the current week. May I bespeak for him a sympathetic reception.
