GRAIN-GUIDE

GLANDERS IN WESTERN CANADA

GLANDERS IN WESTERN CANADA

For the year ending March 31, 1916, there were 241 horses slaughtered in Canada on account of Glanders. Of these the province of Saskatchewan contributed 191, the remainder being scattered among the other provinces with the exception of the maritimes, in which no cases were found. Practically the entire number, however, were confined to the three prairie provinces. The more recent settlement of Saskatchewan, the importation of horses to supply the wants of new settlers and the delay which often occurs in reporting suspicious cases to inspectors are the probable causes of the number of outbreaks in that province.

There is a gratifying reduction in the number of horses destroyed for glanders each year. In 1906 there were 1387 horses destroyed in Canada, for which \$108,045, was paid in compensation. In 1907 there were 1,324. Since that time there has been a great reduction in the number of horses killed on account of this disease until it has been brought down to 226 during the last year. For these 226 \$21,548 was paid in compensation.

Tast year 220 horses were destroyed in Canada on account of dourine. For these \$16,666 was paid in compensation.

Last year 39 outbreaks of hog chulera

these \$16,666 was paid in compensation.

Last year 39 outbreaks of hog cholera occurred in Manitoba, in which 922 hogs, valued at \$8,981, were destroyed at a cost of \$5,987. These were in the Winnipeg, Brandon, Dauphin and Provencher district. In Saskatchewan 22 out breaks occurred, necessitating the destruction of 479 hogs, valued at \$4,415, at a cost of \$2,943. These were in Assinaboia, Saskatoon, Battleford and Moose Jaw districts. In Alberta there were seven outbreaks, in which 288 hogs, worth \$3,526, were destroyed, at a cost of \$2,350. They were in Macleod, Edmonton, Strathcona and Medicine Hat districts.

LIVESTOCK IMPORTS LAST YEAR

For the year ending March 31, 1916, 89,820 horses, 417 mules, 1,384 cattle, 78,109 sheep and 24 hogs were imported into Canada from United States and Newfoundland. Of course, practically all of these were from United States. At the same time 67 horses, 144 cattle, 2 hogs and 70 sheep were imported from Europe or other countries.

In pure bred horses 58 horses.

imported from Europe or other countries.

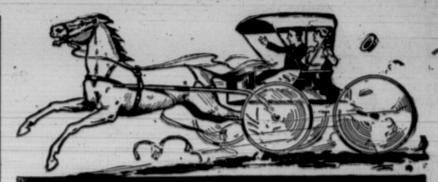

In pure bred horses 58 head were imported from Great Britain and 189 from United States. There were none from any other countries. In pure bred cattle 144 head were imported from Great Britain and 62 head from United States. Two pure bred hogs were imported from Great Britain and 10 from United States. 70 head of pure bred sheep were imported from Great Britain and 22 head from United States. Of the latter all those imported from Great Britain were of the Cheviot breed while 15 of those from United States were Karakule and seven Romney.

INTERNATIONAL SHORTHORN JUDGES

Robert Miller and William Dryden of Ontario will place the awards in the Shorthoga division at the International Livestock Exposition in December. Mr. Miller will judge the milking Shorthorn classes. Mr. Dryden will pasa upon the steers. They will work jointly or alternately, as may be most convenient, in the regular breeding classes. Originally arrangements were made with Argentina judges, as was done a year ago, but a cable advised that, owing to the uncertainty of ocean sailings they had decided not to undertake the journey. The international classes will be in capable hands. There is every praspect that the Shorthorn display will not only be extensive, but of outstanding individual strength, well conditioned in spite of soaring feed coats.

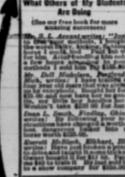

Prod's Pal: Did your old gent set up the fatted calf for you?

Prodigal: Yes, pooraald duffer and got a fierce call down from the food dictator for not conserving the future beef auraly!
