FIRST MAN WHO BORE THE NAME MYSTERY TO OLD CHRONICLERS.

Death of Edward the Confessor-Name Made Famous in Reign of Edward the Third-The Present Earl Was Once Governor-General of Canada.

the name of Stanley is a mystery that has baffled the most industrious of the old chroniclers, but it appears tolerably certain that the family was settled at Stoneley in Derbyshire be-fore the death of Edward the Conlessor, and subsequently became allied with the Norman Audleys. It was not, however, until the reign of Edward III, that the name was made famous by John Stanley, whose prowess at the battle of Poictiers was remarkable even on a day of great deeds. The family tree may then be said to have been planted by this daring and successful soldier, whose next exploit was a combat with a French knight that won him his bride. After Poictiers, Stanley's hardest struggle was at Shrewsbury, a battle that had special significance for his race, for there Northumber-land was slain, and amongst his forfeited lands the kingdom of Man was bestowed by a grateful Sovereign up-on his trusty and well-beloved lieu-tenant. Sig John married the heires of Lathom, and thus became possessed of Knowsley, Prescot, the seat of his descendants ever since.

For several generations the family is less prominent in our annals until

we come to Sir Thomas Stanley, who married a sister of Warwick, the king-maker. He was one of the few supporters of Richard Crookback who managed to keep his head on his shoulders and eventually to get safely out of the clutches of the tyrant. Whether it was Sir Thomas, or his brother William, who placed the "Crown of ornament" on Henry's head after Bosworth Field is not certain. tain; but the victor's manner of re-warding these noble brothers who had risked their lives for him was remarkable. Thomas he created Earl of Derby; William he executed for alleged complicity in the conspiracy of Perkin Warbeck, and hastened to Perkin Warbeck, and hastened to confiscate his estates, a step that was only too pleasing to King Henry VII. The earldom of Derby, it should be explained, had long been merged in the Crown. It was first bestewed by King Stephen on Robert de Ferrers, who led the men of Derbyshire at the battle of the Standard. Nevertheless historians have ard. Nevertheless historians have agreed to consider Sir Thomas Stan-ley as the first earl. tas, died of a mysterious illness, pos-sibly due to poison, and his brother, who was his successor, had been so long abroad that it required a law suit of se eral years' standing to conrightful heir. James, the seventh holder of the tifle, surnamed the Great Earl, was a brilliant figure in the Civil War. His countess was worthy of her husband, and her defence of Lathor with a handful of men against a determined host Roundheads for three months was considered as great a feat in her time as the defence af Mafeking in our own day. In "Peveril of the Peak" Sir Walter Scott represents her as a Roman Catholic. Worcester, that was Cromwell's crowning mercy, sounded the earl's death knell, for while Charles was safely hid in his oak tree, Derby fell into the hands of his enemies, and after swift trial was executed at Bolton, the town which he and Prince Rupert had brilliantly taken by storm some years before. It has been said of Charles I, that "nothing in his life became him like the leaving of it. Derby's life was without stain without reproach, and he met death no less firmly than his Royal master; indeed, so admirable was his compo sure that on the very scaffold he de livered an address in praise of princes and of laws, which so stirred the copie that the soldiers had difficulty n preventing a general uprising in his favor, even as he laid his head upon the block. A romance of the stage is associated with the name of the twelfth Earl of Derby, whose second wife was Elizabeth Farren, of Drury Lane. This fascinating and talented actress is said to have numbered Charles James Fox amongst her admirers, but Lord Derby was the man she chose to merry, their union was in every respect a happy one. The earl was a noted patron of sport, particularly of cock-fighting, and he was fond of introducing the birds into his drawing ducing the birds into his drawing room to the amusement of some of his friends and the consternation of collection of birds and mammalia

He was Colonial Secretary in 1823, and left the Cabinet in disgust when Johnny (Lord John Russell) upset the coach" by voting for the dises-tablishment of the Irish Church. Both Disraeli and Lord Salisbury held office in the Derby Administration of 1852, and six years later it fell to a Derby Cabinet to add India to the vast possessions of the Crown.

A great banquet at Liverpool was amongst the compliments showered upon Lord Derby, and this was followed by a review of 11,000 Volunteers at Knowsley—the Earl was far-seeing enough to perceive that a great future lay before the much abused citizen soldiers. the Rupert of debate settled down in peace to complete his translation of Homer's Iliad, but the country could not allow him to plough his lonely furrow too long, and soon he was back in the political arena, making the whole country laugh at his hum orous criticisms of Russell's "meddle and muddle" policy. His last adand muddle" policy. His last ad-ministration closed in three years by his illness and resignation, and he died in 1869.

Lord Stanley, afterwards fifteenth Earl of Derby, had the unique experi-ence of being a member of a Cabinet presided over by his father. He was the first Secretary for India, and the first Secretary for India, and later as Foreign Secretary it fell to him to draft the terms for settling the Alabama claims. In 1870, as Lord Derby, he married the widow of the second Marquis of Salisbury, for whose sake, it is said, he had remained single three and twenty years. From the Disraeli Cabinet, in which he was Foreign Secretary. which he was Foreign Secretary, Lord Derby retired after the Russo-Turkish war, strongly disapproving the foreign policy of Lord Beaconsfield, and went into Opposition. Un-der Mr. Gladstone he held the seals of the Colonial Office until the disso lution of 1885, when he practically disappeared from the foremost rank of politics. He was born in 1826, and was succeeded at his death in 1893 by his brother, Lord Stanley

The present Earl, born in 1841, of Preston. has had a wide experience of public life. After holding the posts of a Lord of the Admiralty, Financial Secretary for War, and subsequently to the Treasury, Secretary for War, and afterwards for the Colonies, he and afterwards for the Colonies, he was President of the Board of Trade in 1886, and two years later went out to Canada as Governor-General, returning in 1893. He has been Lord Lieutenant of Lancashire since

It has already been shown how the Isle of Man came into the possession of the Stanleys. On the death of the eleventh earl, it passed to James Murray, Duke of Atholl, whose grandmother was a daughter of the seventh earl. In 1763 the "interests and privileges" of the historic island were sold to the Lords of the Admiralty for £70,000, and in 1806 the sovereignty of Man was purchased outright by the British Government, and what privileges remained were bought in by the Crown twenty years

Frightful Dangers of the Bath. The London Lancet, which has for many years been engaged in the work of protecting humanity from the dangers that keep continu ally springing up, comes forward with a timely warning against too much bathing. In the spring when people's underclothes begin to stick to them the bath becomes particu-larly seductive. People who can go for a week in the winter without bathing frequently desire when the weather warms up to plunge into the tub every few days. This condition

loves The Lancet to say Too much bathing is harmful, as t tends to maceration of the superficial part of the epidermis, which is too frequently removed, and ocliferation of the cells of the mal-

oighian laver. Let people who are in the habit of giving themselves up to the pleasures of the bath pause and consider It is doubtless a serious thing to bring on maceration of the superficial parts of the epidermis, and are free to confess that we should shrink in dread from one who care-lessly went about with a proliferation of the cells of the malpighian

It is fortunate that The Lancet has pointed out the danger in time to head off an epidemic of the trouble mentioned, and we have no doubt that the warning will, in most quarters, be gladly heeded.

The speech delievred by Carlyle at the dinner given to Allan Cunning-ham at Dunifries, in 1831, has been unearthed by John Muir from the re port of a contemporary newspaper and it was worth unearthing, if only for the reference made in it to communication which had recently passed between the speaker and the then idol of his literary and philo-sophical worship, says the Literary Era. In the course of the remarks with which he prefaced his proposal of a toast to the memory of Robert Burns, Carlyle told his audience that within the last two months he had 'learned from Goethe, the greatest living German poet, that the works immortal bard are translation in Berlin, so that foreign countries will speedily be as happy with them as ourselves." Whether the translation was_completed and appeared, and whether Carlyle's anticipation of the "happiness" of the German reader of "Willie Brewed a Peck of Malt" in the language of the fatherland were realized But that we meet with no further reference to it in any Carlylean writings suggests that it may have proved a little disappointing.

political expression keeping your fences fixed," said an old campaigner, "is due to a remark once made by Senator John Sherman.

"It was at a time when the senator had amassed the most of his fortune. He had a farm near his home town, and while preparing to drive out to it one afternoon he was accosted by a book agent, who labored hard to sell one of his books. Mr. Sherman was not in a mood to make any such purchases, and he finally silenced the man by saying: 'I can't afford to buy your book. It takes all my money to keep

my fences fixed.' "In reality Mr. Sherman referred to the fences on his farm, but some of his political associates, hearing of the remark a few days later, took it up at once and made a political phrase of it. It was first confined only to the state of Ohio, but it has now become so common that no one ever takes the trouble to wonder where it originated."
