WHAT HAS HE DONE?

A few days ago this journal pointed out the fact that A. B. McCoig, Kent's representative in the Ontario Legislature, has neglected to give to the electors an account of his conduct since his election. Up to date Mr. McCoig has still failed to do so and has never either by speech or through the columns of his local newspaper organ, pointed out one single thing that he has done during the recent busy session, which will be of any benefit to either his own constituency or to the country at large. He is a public man entrusted with the interests of the people of this riding. His actions are open to criticism and the people who elected him have a perfect right to know how he has been spending their time at Toronto. The people who elected him are anxious to hear from him, but as we have stated before, he has chosen to keep a "clamlike silence." Why this silence? What has he done? Has he adhered strictly to his election pledges, and why should he set himself up as the man who will seek the suffrages of the electors for the next Dominion Parliament? Mr. McCoig has the floor, and these are questions which it is impossible for him to evade.

If Mr. McCoig has done nothing, as seems to be the case—then of course it would be impossible for him to make a very long speech or to write a very lengthy letter, and his silence is easily understood. A poor showing might be more disastrous than none. The electors may draw their own conclusions, and if they wish a figure head instead of a wide awake and progressive young representative at Ottawa, Mr. McCoig may get a few votes in the next Dominion campaign.

The Liberal organ, however, is less astute than the man whom they wish to blindly boost. Their weak attempt to make an explanation which appeared in their front page last evening headed in bold black letters "editorial," might never have found its way to such a conspicuous place if they had had the foresight to consult with Mr. McCoig, the man most vitally interested. In attempting to boom their man they have made a miserable failure and have merely held him up in a more ridiculous light. If the Banner man had not been quite so hasty, and had given a little thought and study to his subject, the results might have been far more beneficial for Mr. McCoig. In other words, the article might never have been printed.

In the first place, the article was one continuous string of abuse. In speaking of the statements made by this journal the words, "false statements," "tissue of falsehoods," of the "meanest" kind, etc., were frequently used when the writer's vocabulary became limited, and in speaking of Mr. Clements, words of such vulgarity were used that they are excluded from this Great HOME Journal. The abusive part of the article was generously overlooked. The average intelligent citizen shrinks from passionate and ill-advised epithets, and their use by any writer only serves to weaken his arguments and lower the standard of his writing.

The Planet's premier query was, What has Mr. McCoig done to merit the approval of his constituents? Mr. McCoig is silent. The Banner has attempted a reply and they have evidently found it an impossibility to point to one of the many important and progressive measures passed during the session just closed, which Mr. McCoig has even supported! A perusal of the article will satisfy any elector of this fact.

It was stated during the debate on the immigration swindle that Sir Wilfrid Laurier advised his supporters to answer charges of wrong doing by making attacks on the reputation of opponents. This is a manoeuvre to which politicians who have no better reply, frequently resort. The Banner has evidently heard of the Premier's advice, and has very clumsily adapted it to its own case. In the words of their bold but transparent

ensive they attempt to divert the attention which is at present awkwardly fixed on Mr. McCoig by a labored and uncalled for attack on Mr. Clements. That gentleman is at present in the midst of a parliamentary session at Ottawa, where he is faithfully looking after the people's interests. When the proper time comes his actions will come in for their share of discussion. Mr. Clements has nothing to hide and will give full and proper account of himself when the opportunity arrives.

Mr. McCoig's work at Toronto is temporarily over. He has returned home with the closing of the session, and every elector is waiting for any words which may fall from his lips. He has the centre of the stage. Let the Banner refrain from avoiding the issue and let them direct their attention to Mr. McCoig. The Banner credits Mr. McCoig with saying that he knows of no split in the Liberal party in the House, and yet the news comes from several reliable sources that Mr. Preston, of Brant, may be the leader of the Opposition when the next session rolls around—the Opposition members themselves having become dissatisfied with G. W. Ross. The split between Mr. Ross and Mr. Harcourt is still fresh in the minds of those who followed the proceedings of the Legislature. Is Mr. McCoig out of touch with the members of his own party at Toronto? There is a time for everyone, and now is the time for Mr. McCoig to speak out. How long will the electors be forced to wait?

It Actually "Grows,"
Skin!

A New and Wonderful Discovery

One of the greatest triumphs of recent years is the discovery of a unique preparation for growing new, healthy skin. Indeed, accident and skin diseases are so common today that there is no ender who will not feel that the discovery meets a real and distinct need in home, factory, and field.

Ever since man acquired the instinct to rub a place that hurts, attempts have been made to find the right article for him to rub with. In the times of Ancient Greece, warriers and gladiators used a secret balm upon the injuries they received in the arena or in battle.

These articles, like the cheap ointments, salves and embrocations sold to-day, were very crude and unreliable. Until recently there was one fatal objection to this class of preparation—that they were too coarse for the pores of the skin to absorb their healing and soothing ingredients or the presence of rancid animal fat and mineral poison rendered them not only inefficient, but even dangerous for the average skin.

These long standing and serious objections have now been entirely overcome by the introduction of Zam-Buk, a natural skin healer composed entirely of herbal essences and extracts. A study of the problems connected with the skin's growth led up to the idea that Nature having given to man the instinct to rub, might well be supposed to have secreted somewhere the proper substance to rub with. Certain rare medicinal herbs were taken, and the gums and juices which they yielded were combined in a unique manner, and found to possess healing, soothing and curative properties to a wonderful degree. Experiments with mixtures and blendings of these juices resulted in the production of Zam-Buk, which can be fairly claimed to meet all requirements as an excellent skin preparation.

Zam-Buk is entirely free from the objections levelled against ordinary ointments. It is entirely free from mineral substances, being instead a refined herbal preparation, capable of regenerating old or diseased tissue. Zam-Buk virtually produces new and healthy skin. It gives naturally, asking for, without pain, swellings, eruptions or inflammations occur. Zam-Buk allays all forms of irritation, stops disease, stops suppuration, stops festering, and virtually "feeds" the skin, toning it up in Nature's own way.

Zam-Buk is invaluable for cuts, burns, bruises, eczema, pimples, running sores, spreading scabs, festering sores, poisoned wounds, bad legs, diseased ankles, abscesses, bad sores, piles, chronic sores, ulcers, hemorrhoids, erysipelas, scrofula, psoriasis, barber's rash, blackheads, acne, chapped hands, chilblains, cold sores, chills, chafings, cuts, bruises, burns, scalds, abrasions, back pain, sprains, stiffness, rheumatism, and all injured, diseased, or inflamed conditions of skin and tissue. Of all chemists at fifty cents a box, or post paid from the Zam-Buk Co., Colborne street, Toronto, upon receipt of price. To obtain a free sample box cut out this article from The Planet, and mail it with one-cent stamp (to pay return postage) to the Zam-Buk Co., Colborne St., Toronto. This is a unique offer.

The Planet Patterns

DESIGNED BY MARTHA DEAN.

A BECOMING DRESSING SACK.

6160. Simplicity is a great factor in the designing of beautiful apparel. Some of the most attractive gowns are almost unadorned. Here is sketch of a little dressing sack of white Swiss lined with pale blue, while the only decorative consists in the French knots of blue adorning the front facing, cuffs and belt. Four small tucks provide an extra fullness over the bust, the fullness being then drawn down trimly into the belt. A simulated box pleat reveals the back from too much plainness. The design is so excellent for home construction as to little labor is involved in the making. As to materials, lawn, damask, or a soft silk or challis may serve. In the medium size 3-1-2 yards of 36-inch material are needed.

6160—size 32 to 42 in. bust measure.

ANNOUNCEMENTS.

At the Grand—

The Tenderfoot—May 16.

(Supplied to The Planet by Press Agents.)

There is one actor in "The Tenderfoot," Richard Carle, and H. L. Hearty's delightful operatic comedy of western life, who has no lines to speak, but who occupies a large share of the attention of the audience. He is Rupert, the donkey, who furnishes a great deal of comedy on account of his pious demeanor. Rupert has turned out to be something of a pest for the members of the company, as he has suddenly developed an amazing fondness for skirts and trousers as eatables. Rupert has already ruined three skirts for members of the chorus, and torn the trousers of Oscar L. Figman, the star, so that he had to get a new pair. In addition to this he ate a lunch which had been ordered by Miss Ruth White, the prima donna, during a rehearsal, which was a net loss of \$1.65. Rupert has taken these meals so slyly that it was almost impossible to punish him, and Manager W. P. Cullen is wondering what the end of the season will bring him in the way of bills for the maintenance of the irrepressible "donk."

"The Tenderfoot" will be seen at the Grand to-night.

Funeral Drivers Strike.

New York, May 12.—Several hundred funeral drivers in the boroughs of Manhattan and the Bronx went on strike yesterday in support of a demand for increased wages. At the Church of the Guardian Angel, in West 23rd street, where funeral services were in progress, a walking delegate ordered the drivers to leave. They obeyed, and the bearers placed the casket on the hearse. A walk until an undertaker's wagon had been secured.

The strike of 1,500 funeral drivers ordered tied up the undertaking business in New York City so completely that about 150 bodies remained unburied.

Six Months
in "2 in 1."

A Consulting Chemist Makes a Novel Experiment. An Unsolicited Letter that Explains Itself.

"I write to state that on account of your '2 in 1' Shoe Polish being criticised, and the charge made that it injured leather, I made this test as follows:

I mixed the contents of a box of '2 in 1' Shoe Polish, bought at a retail store from regular stock, with four ounces of water and into this mixture put a kid glove, and left the said glove in the mixture in a bottle from June 15th to December 15th, 1905—a full six months. I then took the glove out, washed it and examined it. The fine leather of the glove was not affected in the least. It was as pliable and soft as when new, and was not affected in condition, nor was it affected in any way. This test, I consider, proves that '2 in 1' does not injure the finest leather.

I hereby state that these facts are correct and true.

Thousands of women suffer untold misery every day with aching backs that really have no business to ache. A woman's back won't made to ache. Under ordinary conditions it ought to be strong and ready to help her bear the burdens of life.

It is hard to do housework with an aching back. Hours of misery at leisure or at work. If women only knew the cause. Backache comes from sick kidneys, and what a lot of trouble sick kidneys cause in the world.

But they can't help it. If sore work is put on them then they get out of order. Backache is simply their cry for help.

DOAN'S
KIDNEY
PILLS

will help you. They're helping sick, overworked kidneys—all over the world—making them strong, healthy and vigorous. Mrs. P. Ryan, Douglas, Ont., writes: "For over five months I was troubled with lame back and was unable to move without help. I tried all kinds of plasters and liniments but they were no use. At last I heard tell of Doan's Kidney Pills and after I had used three-quarters of the box my back was as strong and well as ever."

Price 50 cents per box or three boxes for \$1.25, all dealers or The Doan Kidney Pill Co., Toronto, Ont.

CARL SCHURZ DIES.

Prominent Figure in United States Politics Passes Away.

New York, May 15.—Carl Schurz, widely known as a publicist, and former Cabinet member, died at his home in this city at 4:35 o'clock yesterday morning.

He was born in the Village of Liblar, near Cologne, in 1829 and had exciting experiences in the revolutionary movement in Germany, while attending the University of Bonn. When the uprising came in 1848 he served as a private in the ranks of the insurgents.

Soon after his marriage Schurz came to this country, locating first at Philadelphia. Three years later he removed to Wisconsin, and during the succeeding 20 years he was one of the prominent figures in the political history of the country.

He went to Spain as United States Minister in 1861, later resigning to return and serve in the army, during which he earned the title of major-general. In 1869 he was elected to the United States Senate from Missouri.

In 1887 he became secretary of the Interior in the Cabinet of President Hayes. During his tenure of office Mr. Schurz effected wide reforms in the administration of the Department.
