Smoke-Screens in Naval War.

of different classes of war-vessels is at present much in the public mind. discuss the possibilities of this new be praised for all His mercies! all the other new things a multiple of our Societies and Institutions. parentage is almost the rule. The smoke barrage seems to have no near held on Thursday last when the Bishop course had been run; that it was only in China." Several hundred wome a nine days' wonder, and that it were packed into Canon Wood Hal would continue to live only in a few and many were unable to gain admis paragraphs of the history of the Great War. Some people think dif- ship was proposed by Mrs. Earp and ferently about it—that it is, even now, in its infantile stage; that, when the duction have been developed, it will in West China. This epoch-making turn out one of the biggest things of will be long remembered by all presthe war; that in future it will have its ent .- Notes From the Parish of St. status and function in all wars, and Thomas's. in all theatres of war, on land, on water, and in the air-wherever, indeed, the guns of war are in action.

The forte of the smoke barrage is that it offers an effective challenge to modern guns and gunnery. For six its own way. The evolution of the gun is the evolution of war-larger guns of the jury hereinafter set forth, and and higher explosives; still larger the judgment entered therein in this guns and higher explosives; and even action be set aside, and a new trial to-day our naval architects seem to had between the parties on the

The smoke barrage does not, of course, challenge the gun in its link, the aim of the man at the gun. If the gunner is unable to see his heard in support of the motion. target or objective, if he cannot lay his gun, if he cannot take aim, his heard against the motion. its effective fire must be enormously lessened. Smoke-screens can be made to cover, instantaneously, all targets or objectives of enemy gunfire, whatever these may be-a ship or ships; centration of forces, of men, tanks, Battcock & Co. of London. These the fisheries there.

pushed out, like a telescope; into some of the famous Sanident Tooth well. There are 64 dories and skiffs enemy lines, till they envelop the gun Brushes, which may reasonably claim fishing between Burgeo and Rose and the gunner, still further ensuring to be the finest tooth brush imported. Blanche and 61 between Francois and that aim and effective gunfire are im- Altogether, a very fine line of tooth Cul-de-Sac. In favorable weather possible. The whole fighting area, brushes. even to the full range of the biggest | For coughs and colds, and especialnaval guns, can be quickly enveloped ly bronchial coughs and colds, which

minutes. To the uninitiated it may 75c. seem a difficult problem to get as much smoke as all this. To those who are acquainted with smoke protection by bombs, who have seen how much smoke can be got from a pound of powder, there is no difficulty or doubt. be put under a smoke-cloud rivalling Island route. in density her choicest fogs. Warships would be just as likely to run short p.m. Saturday, coming East. of ammunition as to run short of smoke-screen outfit.

ance against enemy fire will, in war- ing for Catalina. The ship was reporttime, be in the possession of every ed from the latter place to-day having ship which sails the sea-from the anchored by edge of ice. super-Dreadnought down to the humble herring-boat. It is well known that in the late war a great many large vessels, with their human loads and valuable cargoes of munitions and foodstuffs, owed their escape from Tavern St. John's on February 5th, successful submarine attack to 1806, a preliminary meeting of those smoke-screens. So important was this desirous of forming the Benevolent protection deemed to be that Ameri- Irish Society. And how well the decan insurance companies would not sires of those who were the organizers insure unless the vessel had efficient were brought to fruition may be witsmoke-screen outfit.

Smoke protection is possible against all guns, from the hundred-ton gun down to the Holt pistol. In the case of torpedoes, so much depending on nicety of aim, it is likely to play an important countering part. The new auxiliary has the excellent quality that its production cannot be inhibited by enemy action, nor can the fair: 29 below zero. Bearchlight in a smoke-cloud, in MINARD'S LINIMENT, LUMBERpresence of enemy craft, is, of course,

out of the question. Moreover, it cost little or nothing compared with other war material.—Chamber's Journal.
