

sordid lust for gold, but, according to \$1.20 per day, which is more than the the version accepted by the jury, it maximum obtained in the Canadian serwas the infatuation of Armand Peltzer for the fascinating wife of Bernays. The latter had given grave offence to his wife, who lived practically apart from him under the same roof, but who, notwithstanding her deep sympathy for Armand Peltzer, was too pure a woman to requite another man's love as long as she had a lawful husband. Hence Armand's idea of doing away with Guillaume Bernavs. The trial also revealed brotherly affect'on and gratitude carried to the lengths of crime, Leon Peltzer having come all the way from America to commit the murder, out of sheer, although misguided, devotion to his elder brother, who had, years before, factificed his fortune to save him from bankrupter.

Murden as a Fine Art Fint the most wonderful thing of the the genius and forethought displayed in the preparation of the terrible deed, fully realizing De Quincy's notion of "murder considered as one of the fine arts." The two brothers had, beforehand, given tangible existence and wide notoriety to "nothingness' by creating a being who, under the name of Henry Vaughan, and in the guise of a wealthy Anglo-American steamship company promoter, was to shoot Bernays dead, during a con-

The so-called Henry Vaughan was none other than Leon Peltzer under a wig and an inscrutable disguise, thanks to which he ostensibly visited unrecognized Paris. London, Manchester Brussels, and many German towns, on the apparent business of company pro moting, and managed to entrap Bernays, and to shoot him in a lonely house in Brussels, where the corpse remained undiscovered for days, until a letter addressel from Germany "to the coroner" by the alleged Henry Vaughan, "accidental murderer of Bernays," disclosed its whereabouts, marine and fishing depot being conand sent the whole police of Europe on the track of the Anglo-American financier, Leon Peltzer having, in the meantime thrown off his disguise, and calmly begun preparations for return ing safely to America.

Such an astonishing plot which would have baffled Sherlock Holmes, was only miraculously, as it were, laid bare by pure accident through the misreading of a ciphered telegram from Leon to Armand, and the sudden clue it afforded to a bosom friend of latter, Dr. Lavise, who, indeed, a day. They struck for an eight-hour struggled hards against himself and his wife before consenting to the direful duty of acquainting the police with his startling discovery.

Before the court Leon took upon himself the whole responsibility for the crime, which, he maintained, had been unpremeditated, but the jury found that Armand had been "the brains" and Leon the arm in the awful business, and both were sentenced to death, a penalty afterwards reduced to perpetual solitary confinement at the prison of Louvain, where Armand died less than three years after, from remorse according to some, from the grief of tortured innocence according

to others. Leon, who has now been in prison twenty-nine years, is said to have read and pondered immensely in his cell, and to have become a great philosophical mind, capable of adding to the intellectual wealth of the world. King Leopold II. to his death sternly refused to listen to any request in favor of his release, "the greatness of such a crime entailing the enforcement of the sentence to the bitter end." but th present minister of justice has been won to the cause of pity, and King Albert is also credited with a strong inclination to clemency, so that the return to the world of the once famous and bogus "Henry Vaughan," is considered as a mere matter of days of weeks.
